

K92
MINING INC.

Growing Production & Transformative Discoveries

INVESTOR PRESENTATION • February 2026

Forward-Looking and Cautionary Statements

This Presentation is being provided for information purposes only and does not constitute or form part of, and should not be construed as, an offer or invitation to sell or any solicitation of any offer to purchase or subscribe for any securities of K92 Mining Inc. (the "Company" or "K92") in Canada, the United States or any other jurisdiction. Trading in the securities of the Company should be considered highly speculative.

CAUTIONARY STATEMENT REGARDING FORWARD LOOKING INFORMATION

Certain statements, beliefs and opinions in this presentation, including any information relating to K92's future financial or operating performance contained in text, graphs, tables and charts are "forward looking" under applicable Canadian legislation, which reflect the Company's current expectations and projections about future events. Forward-looking statements are generally identified by the use of terminology such as "plans", "expects", "is expected", "budget", "scheduled", "targeted", "estimates", "forecasts", "intends", "anticipates", "projects", "potential", "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "should", "might" or "will be taken", "occur" or "be achieved" or the negative connotation of such terms.

Forward-looking statements are based on estimates and assumptions as of the date of this presentation regarding K92's future financial or operating performance that, while considered reasonable, are subject to known and unknown risks, uncertainties, and other factors which may cause the actual results and future events to differ materially from those expressed or implied and which are beyond the Company's ability to control or predict. Forward-looking statements contained in this presentation regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future and are not guarantees of future performance. All statements regarding: the definitive feasibility study (DFS) of the Kainantu Gold Mine; the Stage 3 Expansion and Stage 4 Expansion; expectations of future cash flows; expectations of future production results; expected success of the proposed plant expansions; the generation of further drilling results; potential expansion of resources or reserves are forward-looking and may or may not occur. Information contained herein is based on certain factors and assumptions including: there being no significant disruptions affecting the Company's operations; political and legal developments in Papua New Guinea being consistent with the Company's current expectations; the accuracy of K92's mineral reserve and mineral resource estimates; exchange rates between the Canadian dollar, U.S. dollar, and the Papua New Guinea Kina being consistent with current levels; prices for key supplies being consistent with expected levels; equipment, labor and materials costs increasing on a basis consistent with K92's expectations; all required permits, licenses and authorizations being obtained from the relevant governments and other relevant stakeholders within the expected timelines and the absence of material negative comments during the applicable regulatory processes; the market price of the Company's securities; metal price; taxation; the estimation, timing and amount of future exploration and development; capital and operating costs; the availability of financing; the receipt of necessary regulatory approvals; environmental risks; title disputes; failure of plant, equipment or processes to operate as anticipated; accidents; labor disputes; claims and limitations on insurance coverage and other risks of the mining industry. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental events and hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, and flooding and gold bullion losses, and the risk of inadequate insurance or inability to obtain insurance to cover these risks. Risks and certain other material assumptions regarding such forward-looking statements are discussed in K92's annual information form, annual management's discussion and analysis ("MD&A"), and annual financial statements filed on SEDAR+ at www.sedarplus.ca.

Accordingly, all of the forward-looking statements contained herein are qualified by these cautionary statements. K92 expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, events or otherwise, except in accordance with applicable securities laws. No person should place undue reliance on forward-looking statements, which speak only as of the date of this presentation.

NON-IFRS MEASURES

This presentation includes certain terms or performance measures commonly used in the mining industry that are not defined under International Financial Reporting Standards ("IFRS"), including "cash operating costs", "earnings before interest, taxes, depreciation and amortization" ("EBITDA"), and "all-in sustaining costs" ("AISC"). Non-IFRS measures do not have any standardized meaning prescribed under IFRS, and therefore they may not be comparable to similar measures employed by other companies. The data presented is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS and should be read in conjunction with K92's consolidated financial statements. Readers should refer to K92's MD&A under the heading "Non-IFRS Performance Measures", available on SEDAR+ and K92's website, for a more detailed discussion of how the Company calculates such measures and a reconciliation of certain measures to IFRS terms.

CAUTIONARY NOTE TO U.S. READERS CONCERNING ESTIMATES OF MINERAL RESERVES AND MINERAL RESOURCES

Information concerning the properties and operations of K92 has been prepared in accordance with Canadian standards under applicable Canadian securities laws and may not be comparable to similar information for United States companies. The terms "Mineral Resource", "Measured Mineral Resource", "Indicated Mineral Resource" and "Inferred Mineral Resource" used in this presentation are Canadian mining terms as defined in the Definition Standards for Mineral Resources and Mineral Reserves adopted by the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM Definition Standards"), and incorporated by reference in National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

The SEC amended the disclosure requirements and policies for mining properties ("SEC Modernization Rules") to more closely align with current industry and global regulatory practices and standards, and became effective in 2019, with compliance required for the first fiscal year beginning on or after January 1, 2021. We have replaced the historical property disclosure requirements for mining registrants that were included in SEC Industry Guide 7. The SEC now recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources". In addition, the SEC has amended its definitions of "proven mineral reserves" and "probable mineral reserves" to be substantially similar to the corresponding definitions under the CIM Definition Standards. While the SEC Modernization Rules are "substantially similar" to the CIM Definition Standards, readers are cautioned that there are differences between the SEC Modernization Rules and the CIM Definition Standards. Accordingly, there is no assurance any mineral reserves or mineral resources that the Company may report as "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had the Company prepared the reserve and resource estimates under the standards adopted under the SEC Modernization Rules.

United States investors are also cautioned that while the SEC now recognizes "indicated mineral resources" and "inferred mineral resources", investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. Mineralization described using these terms has a greater amount of uncertainty as to their existence and feasibility than mineralization that has been characterized as reserves. Accordingly, investors are cautioned not to assume that any "indicated mineral resources" or "inferred mineral resources" that the Company reports are or will be economically or legally mineable. Further, "inferred mineral resources" have a greater amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, United States investors are also cautioned not to assume that all or any part of the "inferred mineral resources" exist. In accordance with Canadian securities laws, estimates of "inferred mineral resources" cannot form the basis of feasibility or other economic studies, except in limited circumstances where permitted under NI 43-101.

The mineral reserve and mineral resource data set out in this presentation are estimates, and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. The Company does not include equivalent gold ounces for by-product metals contained in mineral reserves in its calculation of contained ounces and mineral reserves are not reported as a subset of mineral resources.

QUALIFIED PERSON: The scientific and technical information contained herein has been reviewed and approved by Mr. Andrew Kohler, PGeo, K92's Mine Geology Manager and Mine Exploration Manager, and a Qualified Person as defined by NI 43-101.

NI 43-101 – NI 43-101 – the Updated Definitive Feasibility ("Updated DFS") that includes the DFS and previous resource estimates is included in a technical report titled, "Independent Technical Report, Kainantu Gold Mine, Updated Definitive Feasibility Study, Kainantu Project, Papua New Guinea" dated March 21, 2025, with an effective date of January 1, 2024. Readers are encouraged to review the full text of the technical report, which is available on K92's website and under the Company's profile on SEDAR+.

K92 Mining – A Unique Tier-1 Opportunity

Rapid near-term growth to Tier 1 Mid-Tier Producer towards 500 koz AuEq pa at industry leading low costs

- Stage 3 Expansion to 300 koz AuEq pa (1.2 mtpa plant commissioning complete and first saleable production recorded early Oct/2025) average AISC of \$920/oz AuEq.
- Stage 4 Expansion to +400 koz AuEq pa (commissioning targeting late-2027)

Large, high-grade resource with significant growth potential from multiple deposits

- \$31-35m exploration budget in 2026, potential to increase to \$40m upon delivery of Stage 3 Expansion
- Arakompa Maiden Mineral Resource targeting H1 2026.

Experienced team with proven track-record in Papua New Guinea

Significant re-rating potential ahead and during execution of near-term expansions

- Consensus P/NAV of 0.9x NAV vs Mid-Tier Producers at 1.3x NAV⁽¹⁾

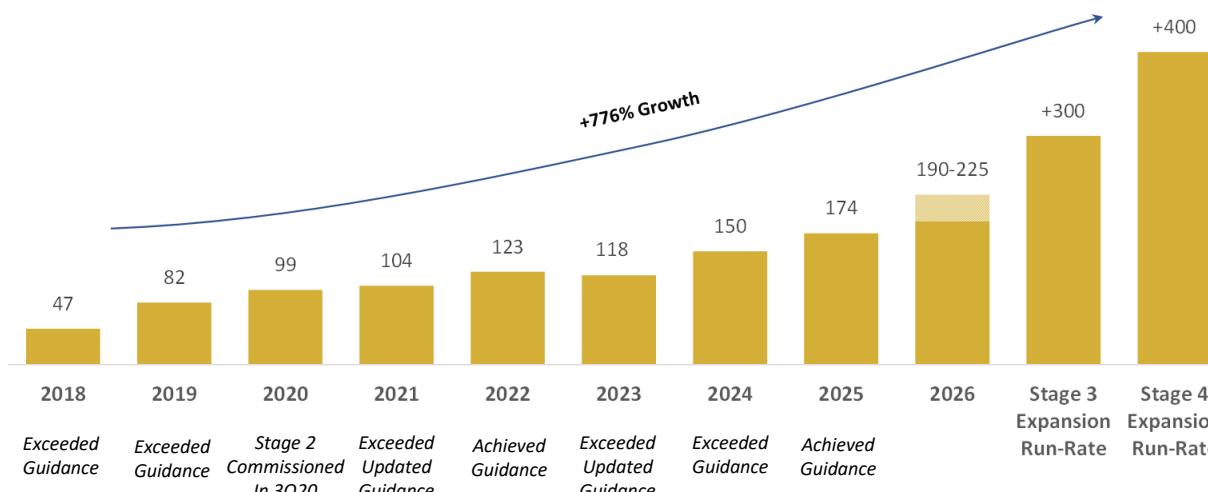

Strong balance sheet and mine cash flow supports mine transformation

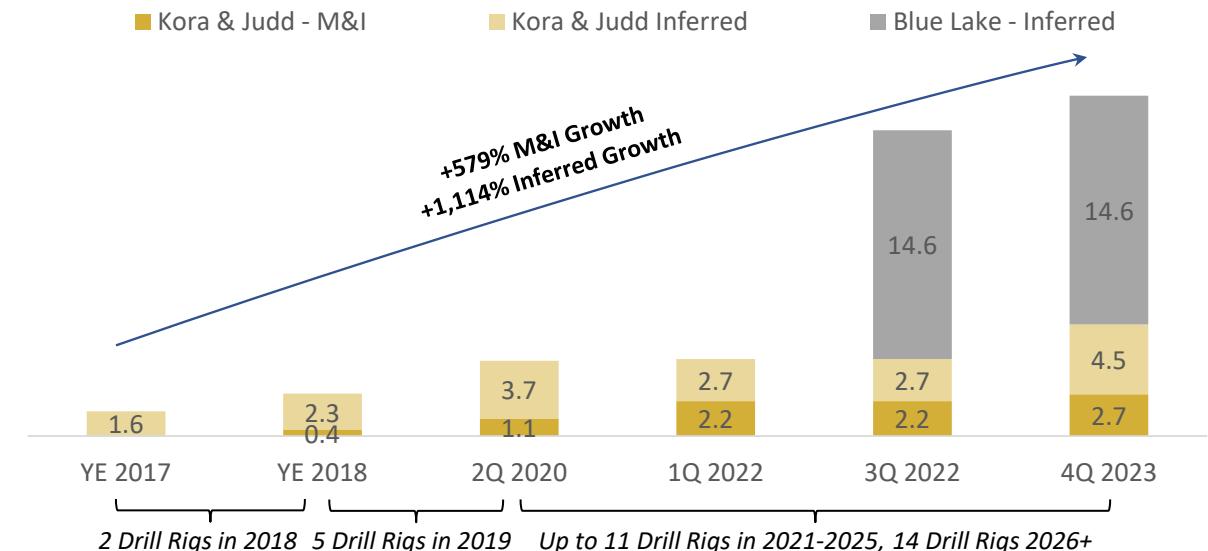

ESG focused with strong relationships with government, community and workforce

Mid-Tier Producer Growth Profile (koz AuEq)

K92 Resource Growth Profile (moz AuEq)

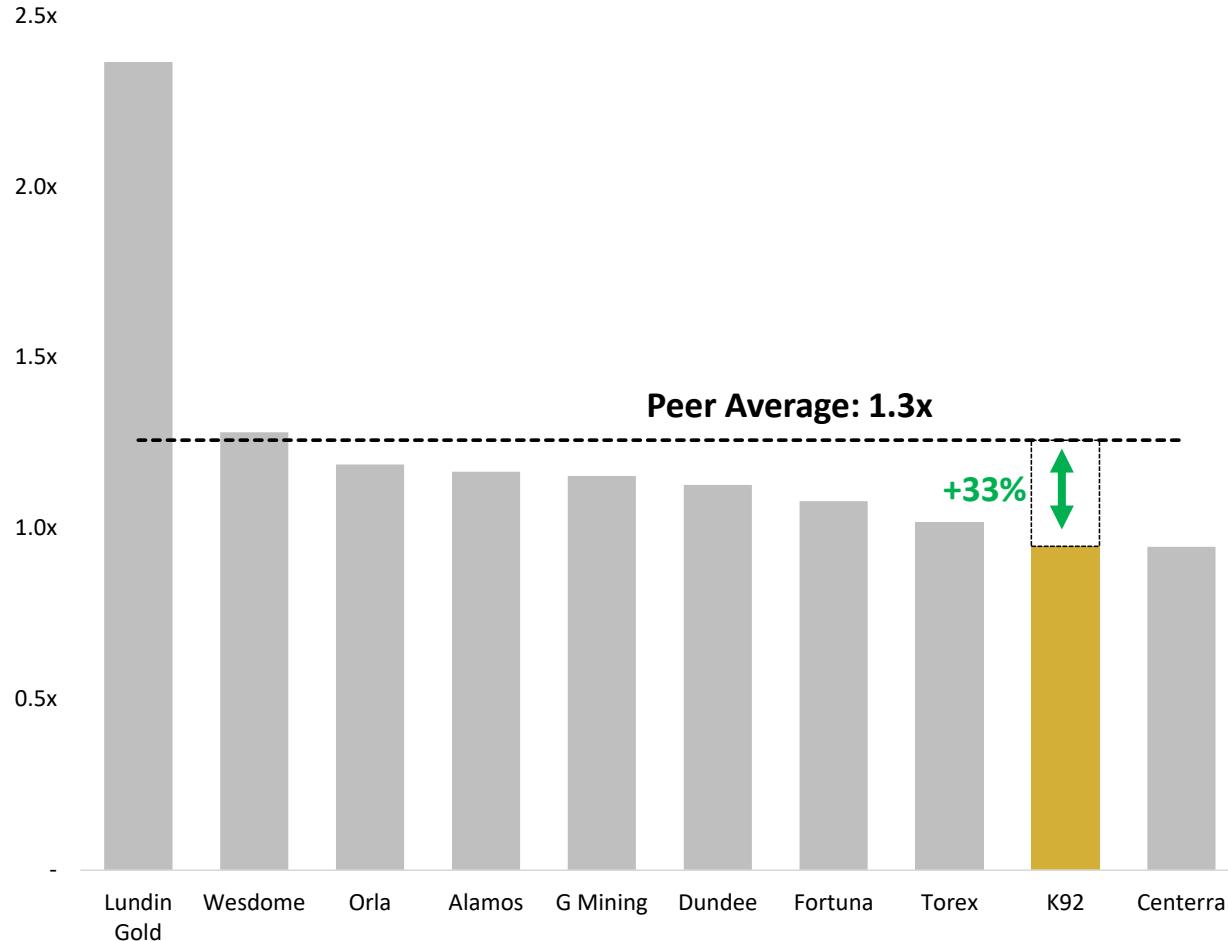

Note 1: Data based on analyst consensus estimates provided by BMO Capital Markets.

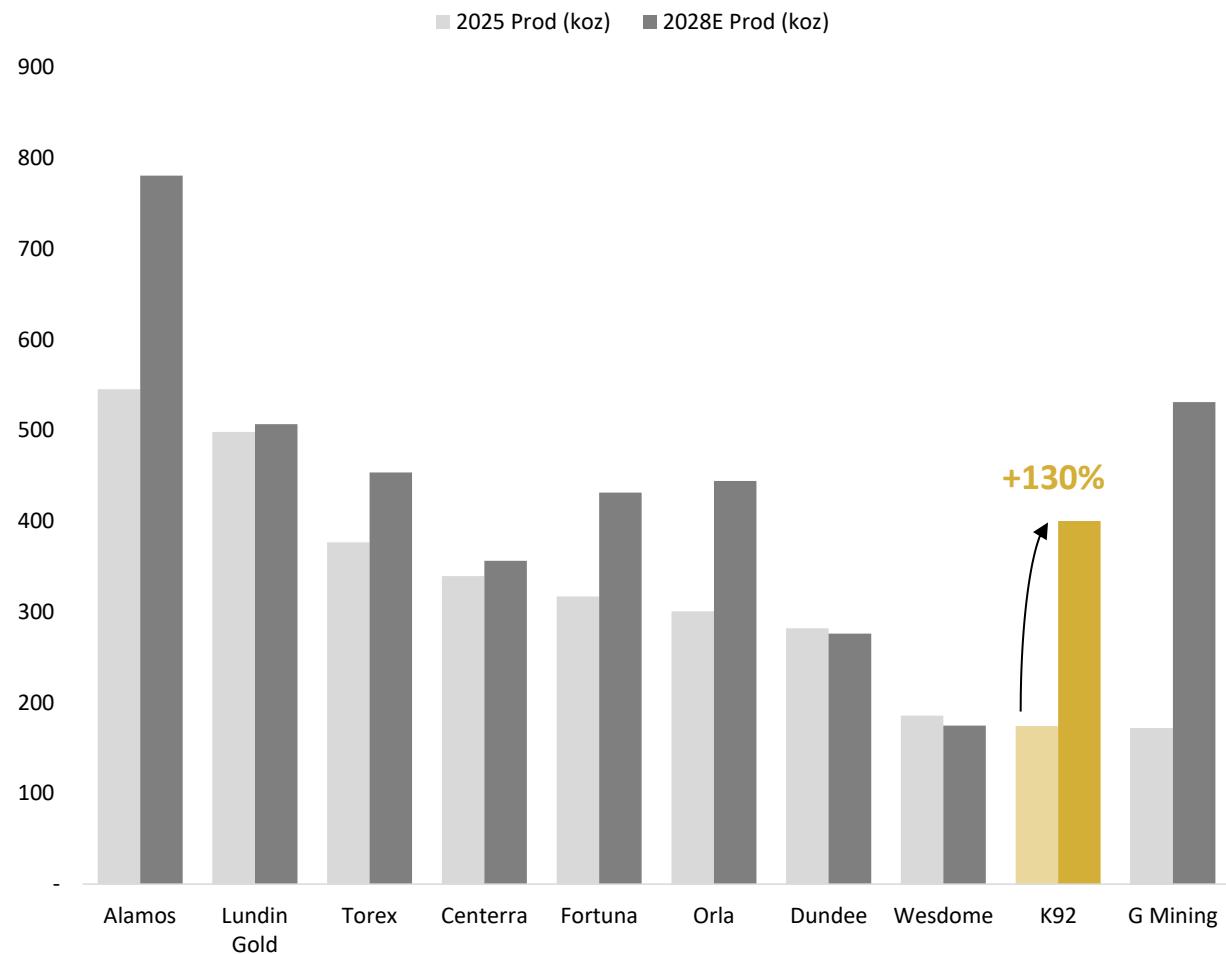

Note2 : Kora and Judd resource estimates - refer to technical report dated March 21 2025 and titled, "Independent Technical Report, Kainantu Gold Mine, Updated Definitive Feasibility Study, Kainantu Project, Papua New Guinea". Blue Lake resource estimate – refer to Technical Report dated March 21, 2025 and titled, "Independent Technical Report, Mineral Resource Estimate Blue Lake Porphyry, Kainantu Project, Papua New Guinea".

Attractive Valuation - Compelling Re-Rate Opportunity

P / NAV

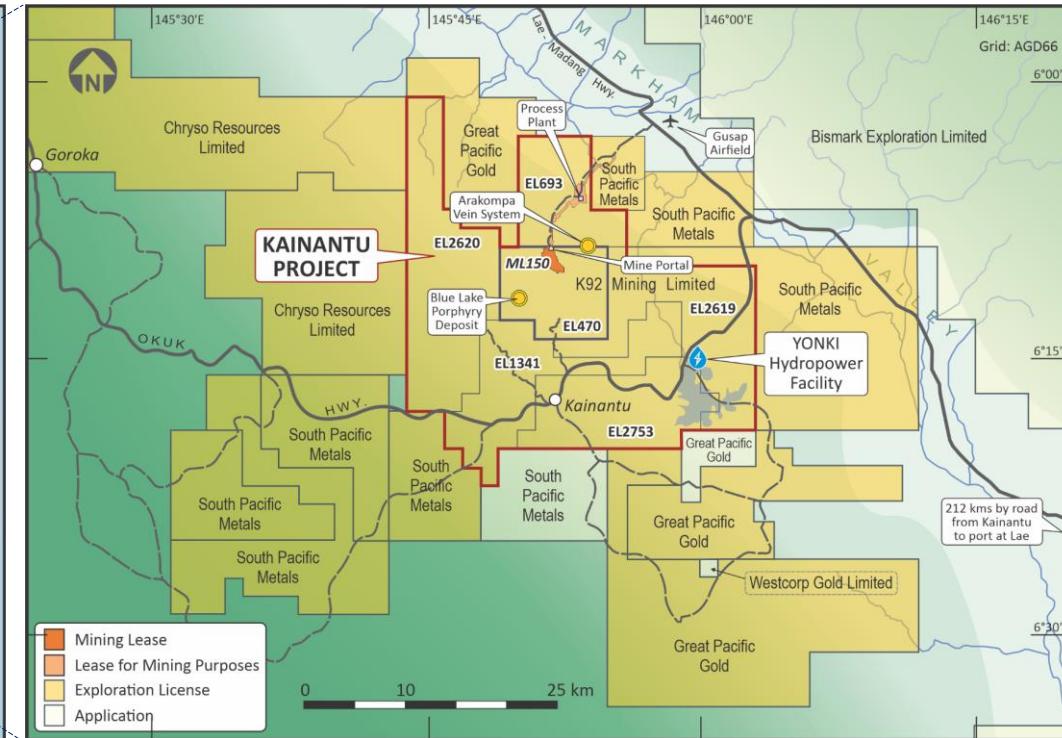

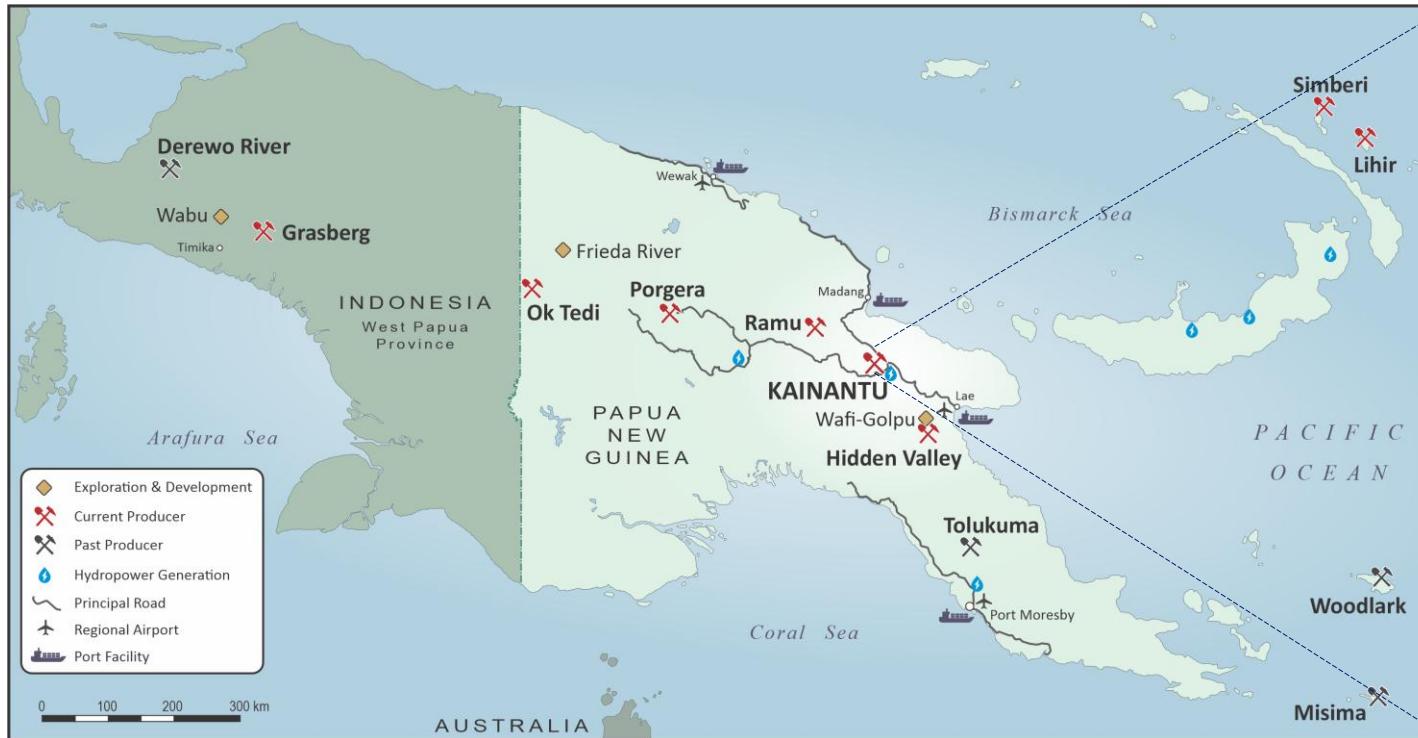

2025 – 2028E Production Growth (koz AuEq)

Significant Re-Rate Potential As K92 Transitions Into Becoming a Tier-1, Mid-Tier Producer

Located Amongst World Class Geology and Excellent Infrastructure

Natural Resource Friendly Jurisdiction

- Multiple Senior Mining Companies Operating (Barrick, Harmony, Newmont)
- Vibrant democracy since independence in 1975
- ~87% of exports from mining, oil and gas⁽¹⁾

Large ~830 km² land package along major regional structure hosting multiple large world-class deposits/mines (Ramu, Wafi-Golpu, Hidden Valley)

Excellent and Well-Developed Infrastructure

- Plant, tailings dam and infrastructure located ~6.5 km from mine portal in Markham Valley (lowlands, plenty of land for construction)
- Sealed road from Port of Lae
- Hydro grid power (full standby diesel gen sets)
- Commercial airstrip

Located along Prolific Pacific Ring of Fire, hosting multiple world-class deposits in both PNG and West Papua

Corporate Structure

Key Financial Data (as at September 30/25)

Symbol	TSX: KNT, OTCQX: KNTNF
Fully Diluted Shares Outstanding	247.1
Cash and Cash Equivalents	US\$185m
Debt	US\$55m
Remaining Additional Liquidity	Up to US\$90m

Fully Funded to Execute Growth Trajectory

- ✓ Strong Cash Balance
- ✓ Significant Available Liquidity From Credit Facilities
- ✓ Record Production and Record Gold Prices = Strong Operational Cash Flow
- ✓ Downside Protected During Construction

Puts Purchased for US\$5.9m in November 2025 covering 10,000 oz Au per month at \$3,500/oz for 12 months (starting Jan/2026), to protect against commodity price risk during the construction. **This is not a hedge, this is insurance, and we retain FULL EXPOSURE TO THE UPSIDE IN COMMODITY PRICES.**

Note 1: Insider data includes dilutables. Shareholder information based on data from Irwin.

Delivering Sustainable Value – 2024 Sustainability Report

Communities

- Outstanding Community Humanitarian Initiative awarded by the PNG Chamber of Resources and Energy in 2024 for the K92 Sustainable Livelihoods Agriculture Program
- Creating business opportunities for landowner groups via Joint Ventures with local businesses, including \$28M spent in 2024
- 400+ community graduates from K92's Adult Literacy Program in 2024

People

- Over 9 quarters without a lost time-injury¹
- Currently employ +2,300 people (employees plus contractors) with ~92% of total workforce from PNG, including nearly one-third from local communities
- Developing skills through multiple MOUs with PNG tertiary institutions
- Providing tertiary education scholarships for PNG students with 66 awarded in 2024
- Kainantu Endowment established in 2023 to provide tertiary scholarships for students in PNG

Environment

- Operate a low-footprint underground mine with downstream tailings impoundment and no permanent surface waste rock facilities
- No cyanide used for processing
- Target a 25% reduction in GHG emissions by 2030 (against a business-as-usual forecast)
- Hydropower is a significant power source at the Kainantu Gold Mine, with solar power now being investigated

Government

- \$62.6M in taxes and royalties paid in 2024 (second highest mining corporate income taxpayer in PNG)
- \$6.6M allocated for Company's inaugural project under the Infrastructure Tax Credit Scheme ("ITCS") of the Government of PNG
- Future ITCS projects currently being planned with focus on education, health, infrastructure, and law & order projects

SPOTLIGHT SUSTAINABLE LIVELIHOODS AGRICULTURAL PROGRAM

K92 Mining Inc. 2024 Sustainability Report | Responsible Governance | Empowering Our Workforce | Socially Responsible Mining | Environmental Stewardship

In 2024, K92 was awarded the Outstanding Social Contribution Award by the PNG Chamber of Resources and Energy for nearly 10 years of its operations. As the region's largest non-mineral sector, it plays a unique role in the local economy, development and rural development. With vast arable land and great potential, PNG's agriculture sector holds great potential for growth, particularly through improved infrastructure and access to markets. In addition, strengthening agriculture is key to long-term economic development and long-term prosperity.

This is why K92 maintains a key strategic focus on agriculture, providing training and support to communities near the Kainantu Mine as part of its community investment and sustainable development.

Since 2016, K92 has implemented its Sustainable Livelihoods Program, which now spans 10 farms across 6.5 hectares. The program provides training and support to local women. Cash crops are delivered to local vendors, including the Kainantu Market, the second-target city and a major regional wholesale market. The program has also inspired our camp driving facilities and company agricultural camps.

1 Q3 2024, K92 Office - Development Projects & SLAP Award

In 2024, K92 was awarded the Outstanding Social Contribution Award by the PNG Chamber of Resources and Energy for nearly 10 years of its operations. As the region's largest non-mineral sector, it plays a unique role in the local economy, development and rural development. With vast arable land and great potential, PNG's agriculture sector holds great potential for growth, particularly through improved infrastructure and access to markets. In addition, strengthening agriculture is key to long-term economic development and long-term prosperity.

This is why K92 maintains a key strategic focus on agriculture, providing training and support to communities near the Kainantu Mine as part of its community investment and sustainable development.

Since 2016, K92 has implemented its Sustainable Livelihoods Program, which now spans 10 farms across 6.5 hectares. The program provides training and support to local women. Cash crops are delivered to local vendors, including the Kainantu Market, the second-target city and a major regional wholesale market. The program has also inspired our camp driving facilities and company agricultural camps.

¹ Q3 2024, K92 Office - Development Projects & SLAP Award

SPOTLIGHT BUILDING A SKILLED WORKFORCE THROUGH STRATEGIC EDUCATIONAL PATHWAYS

SPOTLIGHT WASTE OIL RECYCLING PROGRAM

Our operations generate a diverse range of waste streams that must be managed efficiently to minimize environmental impacts and health and safety risks. Since 2016, K92 has implemented its Waste Oil Recycling Program, which now spans 10 farms across 6.5 hectares. The program provides training and support to local contractors, Dunlop PNG, to recycle waste oil off-site and return it to the mine stream. Through this partnership, we ensure that our waste oil is collected, processed and recycled in a safe and sustainable manner, reinforcing our commitment to environmental stewardship and resource efficiency.

Dunlop Local subsidiary, Caltex Recycling PNG, is a trusted service provider in the country, accredited and permitted by PNG regulations to manage waste oil.

In 2024, approximately 242,000 litres of our waste oil were collected and recycled through Caltex Recycling PNG's facilities for processing. We look forward to continuing to work with Dunlop PNG to support our commitment to sustainable waste management and environmental stewardship.

¹ Q3 2024, K92 Office - Development Projects & SLAP Award

K92 maintains a strong commitment to the prosperity and development of PNG and our host communities through responsible mining practices and a strategic commitment to delivering sustainable value.

Value Creation Through Discovery

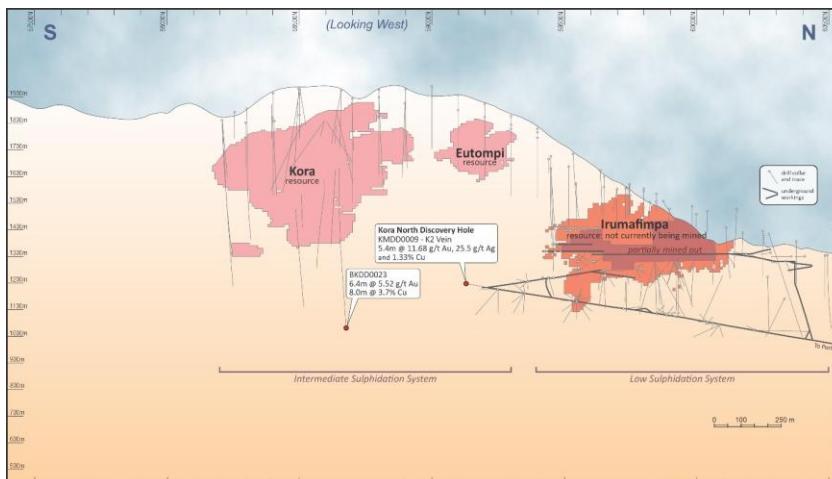

May 2017

October / December 2021

September 2023

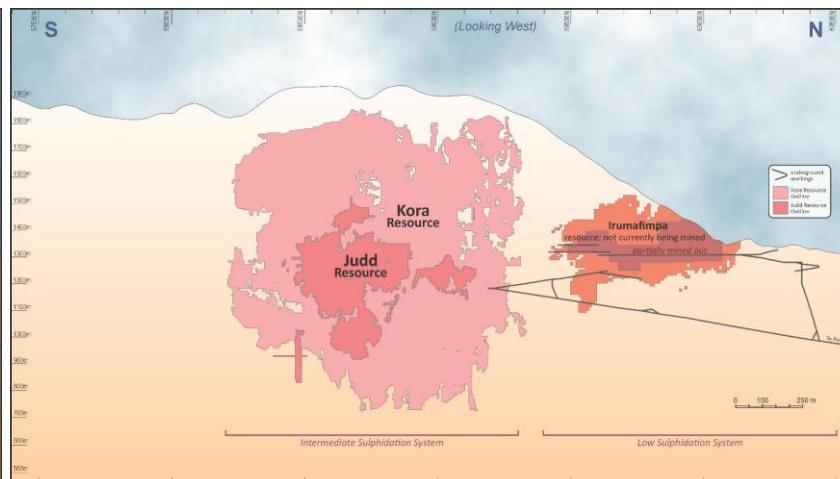

(Long Sections, Looking West)

Kora North

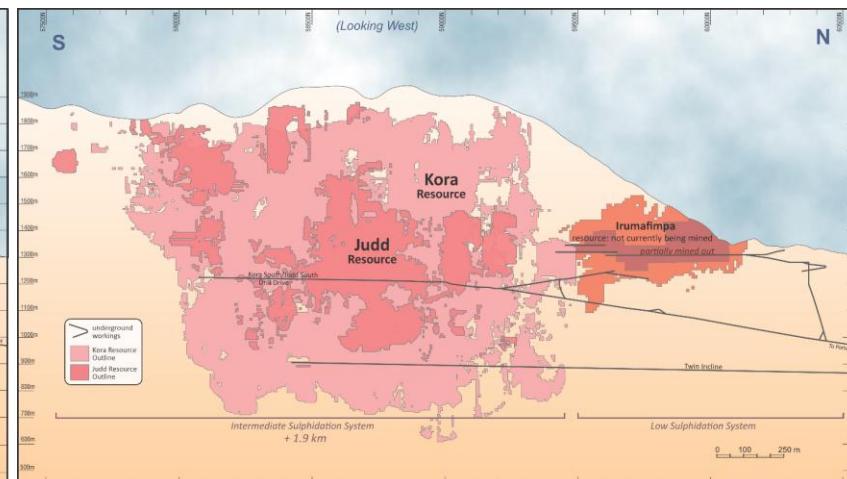

1.7 moz at 11.6 g/t AuEq Inferred¹

Kora and Judd

2.3 moz at 9.3 g/t AuEq Measured & Indicated
2.6 moz at 9.1 g/t AuEq Inferred²

Kora and Judd

2.6 moz at 10.0 g/t AuEq Measured & Indicated
4.5 moz at 8.5 g/t AuEq Inferred³

K92 has and continues to create significant value through exploration and expansion

1) Inferred Resource Grade: 11.6 g/t AuEq (7.1 g/t Au, 34 g/t Ag, 2.2% Cu).

2) Measured and Indicated Resource Grade: 9.3 g/t AuEq (7.7 g/t Au, 18 g/t Ag, 0.9% Cu). Inferred Resource Grade: 9.1 g/t AuEq (6.8 g/t Au, 26 g/t Ag, 1.3% Cu).

3) Measured and Indicated Resource Grade: 10.0 g/t AuEq (7.8 g/t Au, 21 g/t Ag, 1.2% Cu). Inferred Resource Grade: 8.5 g/t AuEq (5.7 g/t Au, 27 g/t Ag, 1.5% Cu).

2025 Was A Transformational Year for K92

Stage 3 Expansion Process Plant Grand Opening on October 16 – Delivered Under Budget

2026 Operational Guidance – Another Major Step Forward Planned

Key Figures

	Amount
2026 Production	190,000 to 225,000 oz AuEq
2026 By-product Cash Cost	US\$710 to US\$770/oz Au
2026 By-product AISC	US\$1,250 to US\$1,350/oz Au
2026 Co-product Cash Cost	US\$980 to US\$1,040/oz AuEq
2026 Co-product AISC	US\$1,480 to US\$1,580/oz AuEq
2026 Exploration	US\$31 to US\$35 million
2026 Growth Capital <i>Stage 3 Expansion Capital</i> <i>Stage 4 Expansion Capital</i>	US\$100 to US\$108 million US\$25 to US\$28 million US\$75 to US\$80 million

2026 plans to deliver record production at low costs while also leveraging K92's strong financial position, proven Project Owner's Team and already mobilized contractors to bring forward key growth and Stage 4 Expansion projects

Key Highlights

- **Production Growth:** Production in H2 2026 is expected to be the strongest, driven by the ramp-up of ore tonnes mined and processed from two new mining fronts & the completion of major expansion enabler projects in 1H 2026
- **Record Exploration Program:** Total rigs to increase to 14 in Q1 2026 from 12 rigs currently – focused on highly prospective near-mine and regional targets
- **Growth Capital:** As at December 31, 2026, 95% of the Stage 3 Expansion growth capital is either spent or committed, and the project remains on budget. Given the strong financial position with record net cash achieved at YE 2025, Stage 3 Expansion capital expenditure nearing completion, already mobilized contractors and a proven Project Owner's Team, K92 is bringing forward several growth and Stage 4 Expansion projects in 2026, including the following key items:
 - *Stage 4 Expansion Power Plant Upgrade to 15.3 MW (\$6 million)*
 - *Stage 4 Expansion Haul Road Upgrade (\$5 million)*
 - *132 kV Power Supply and Line Upgrade (\$9 million) – Increase reliability and delivery capacity of clean hydro electricity for the Stage 4 Expansion. Key part of our 2030 GHG Reduction Target strategy. Long-term recovery of capital from reduced operating cost expected.*
 - *Stage 4 Expansion Water Treatment and Management Upgrade (\$8 million)*
 - *Stage 4 Expansion Engineering, Project Management & Owners' Team (\$10 million)*
 - *Camp Expansion and Facilities Upgrade (\$5 million)*
 - *Stage 4 Expansion Vertical Mine Development (\$11 million)*
 - *Port Upgrade (\$3 million) – Improve efficiency and capabilities in handling larger volumes of concentrate for the Stage 4 Expansion at the Port of Lae.*
 - *Kainantu Community Affairs Office (\$3 million)*

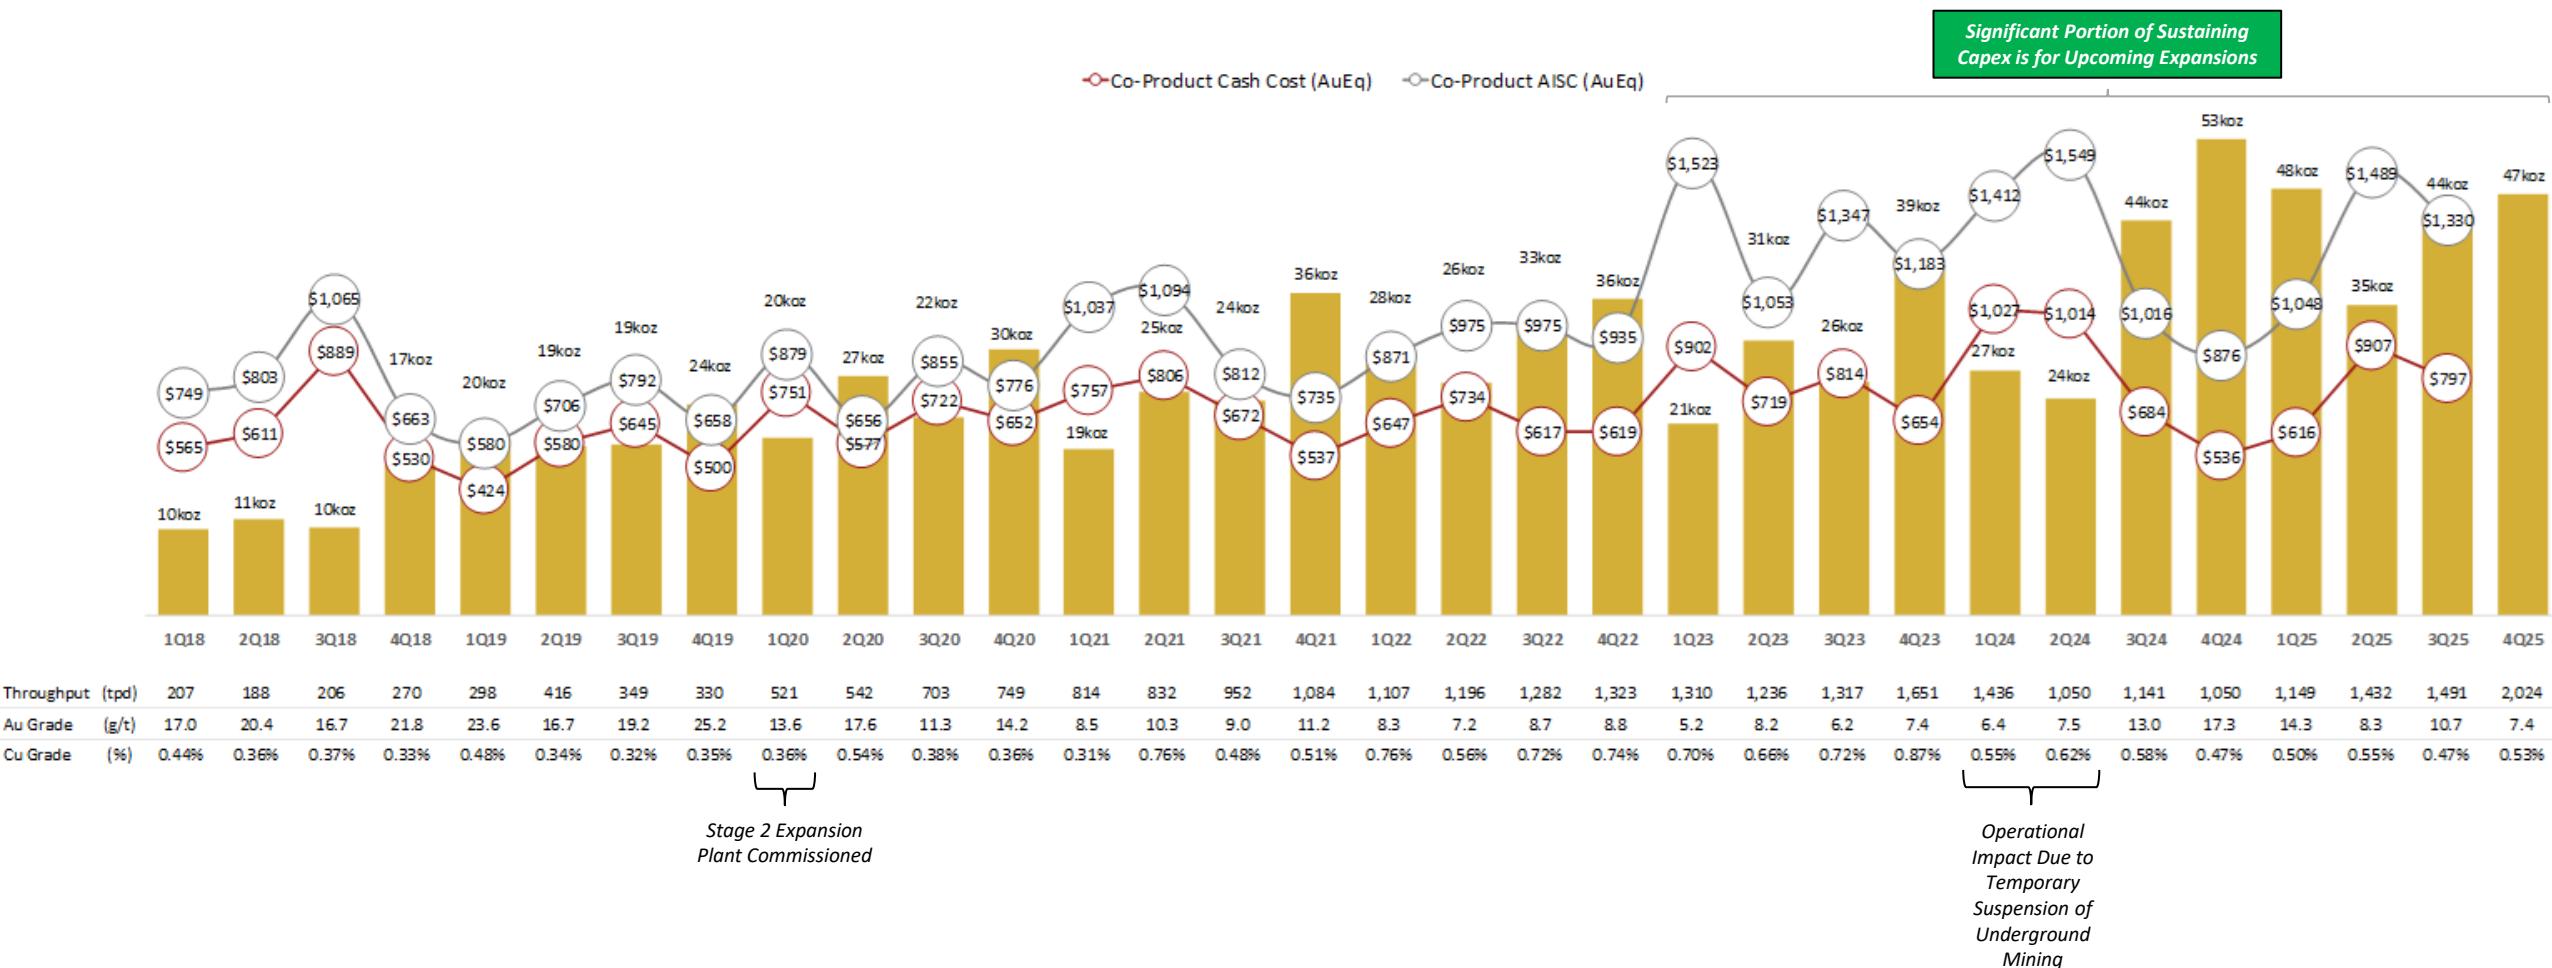

Systematically Executing to Become a Tier 1 Mid-Tier Producer

The Stage 3 and 4 Expansions are fully financed. As of YE 2025, 95% of Stage 3 Expansion growth capital has been spent or committed. The project remains on budget, first saleable production from new plant delivered in October 2025 and commissioning completed in December 2025.

Operational Performance – Since Commercial Production

AuEq Production (koz), Cash Cost (\$/oz AuEq) and AISC (\$/oz AuEq)

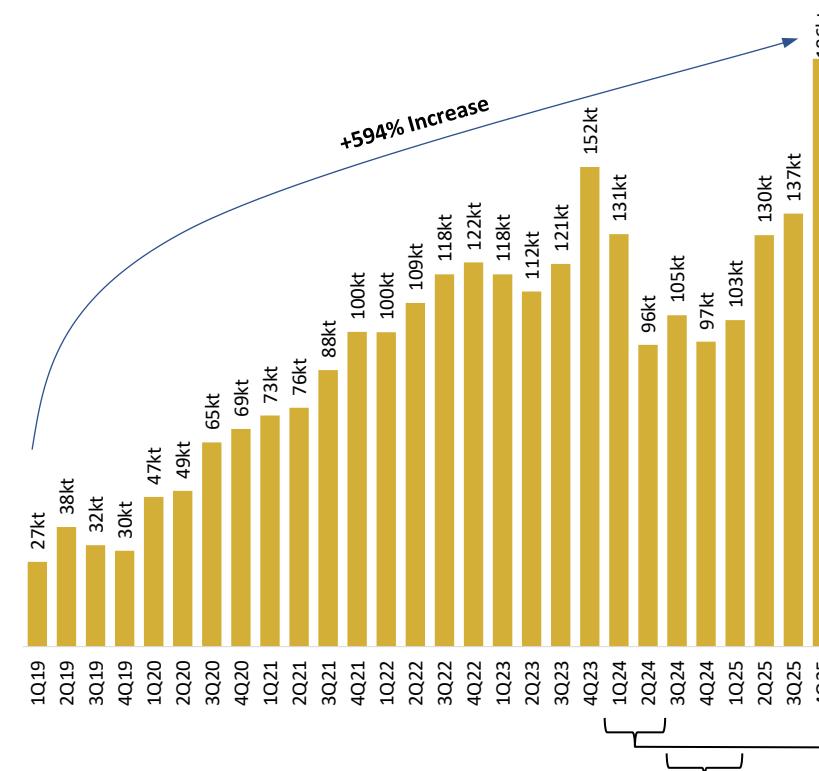

K92 Achieved Record Annual Production of 174,134 oz AuEq Within the Upper end of 2025 Guidance

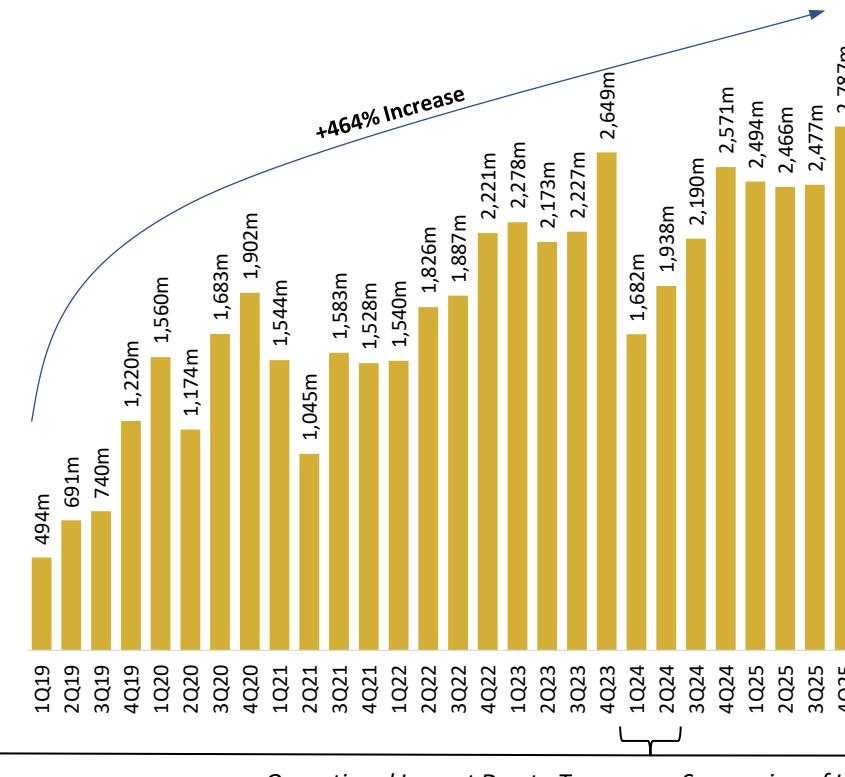

Major Sustaining Capex Investment Since 2023 is for Upcoming Expansions

Kainantu Mine Execution

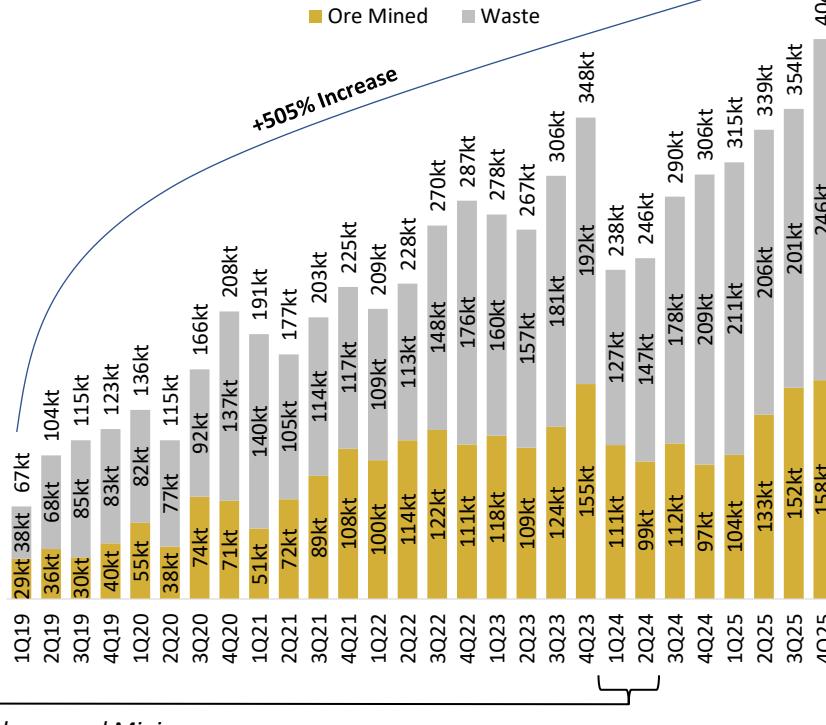

Total Ore Processed (kt)

Total Development (m)

Total Mined Material (kt)

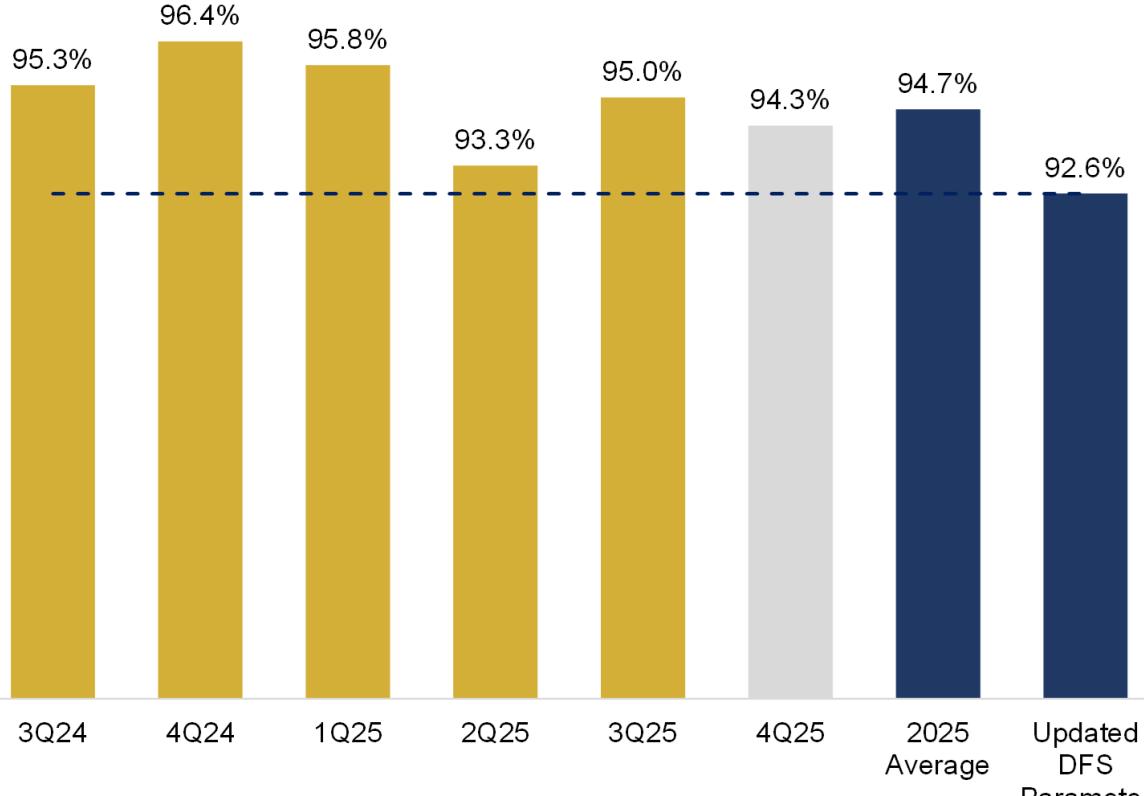

Q4 achieved record material mined (ore + waste) via combination of commissioning of material pass and surface trucks operating in twin incline. Record development of 1,027m in October – Exceeding Stage 3 Requirement of 1km per month.

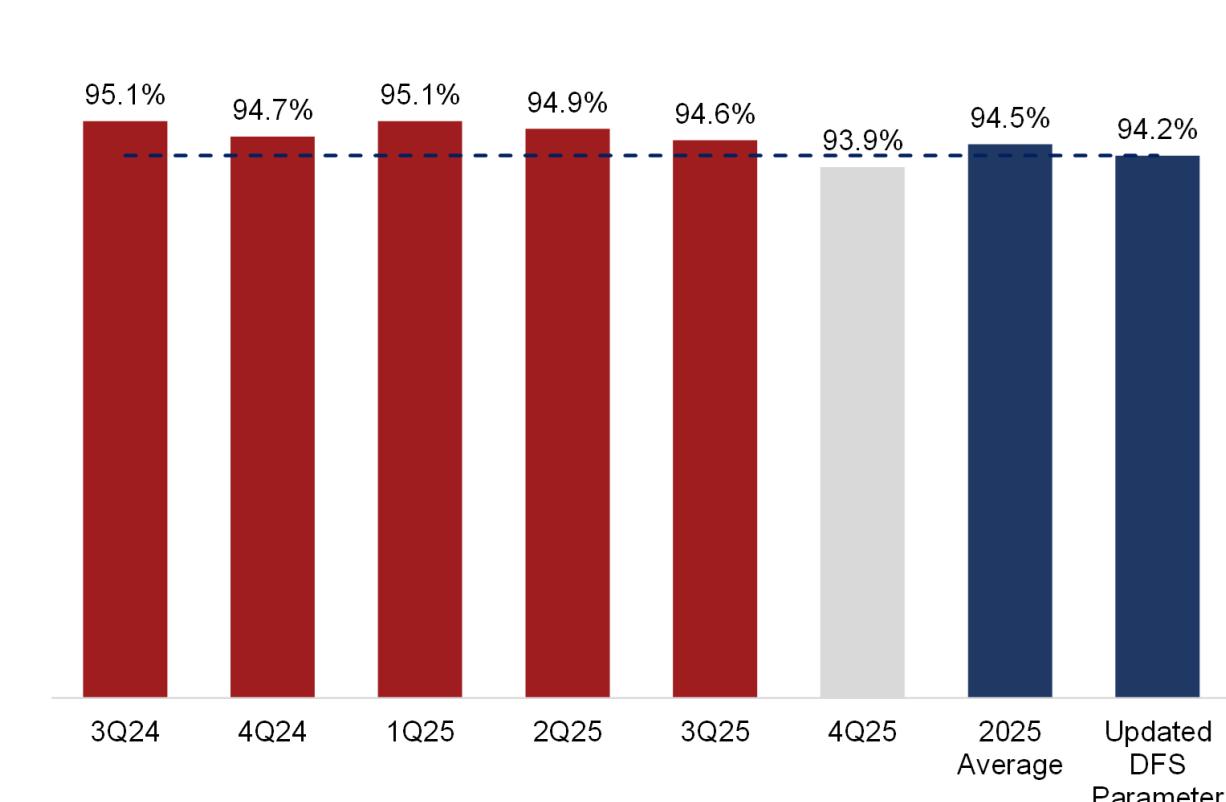

Strong Process Plant Performance

Recoveries

Gold

Copper

New Stage 3 Expansion Process Plant performed well in its first operating quarter (Q4 2025), delivering strong recoveries & multiple daily throughput records above the 3,290 tpd design (Dec 13: 3,794 t, Dec 14: 3,822 t)

Seven Consecutive Quarters Exceeding Updated DFS Gold Recovery Parameters

Near-Term Mine Transformation: Major Infrastructure Upgrades

1

Twin Incline

Scope: High Speed 2.9km twin incline, capable of +5 mtpa with conveyors

Status: Effectively Complete

Impact: Transforms material handling efficiency with large and high-speed travel way.

2

Ore Pass System

Scope: Raise Bore Ore and Waste Pass System to connect Main Mine with Twin Incline

Status: First pass operational, second pass scheduled for completion in Q2 2026

Impact: Transforms material handling efficiency, improves mining cycle at the Main Mine. Vast majority material to travel via the highly efficient twin incline.

3

Puma Vent Incline

Scope: Twinning of the existing puma incline for vent

Status: Underway (targeting completion Q1 2026)

Impact: +50m³/s upon breakthrough, up to ~3x airflow increase to main mine with fan upgrades from current flow rates, meets Stage 3 & 4 Expansion requirements. Additional operational efficiency via allowing one-way traffic flow in twin incline upon electrification of fan chamber (late-Q1 2026).

4

Internal Ramp System

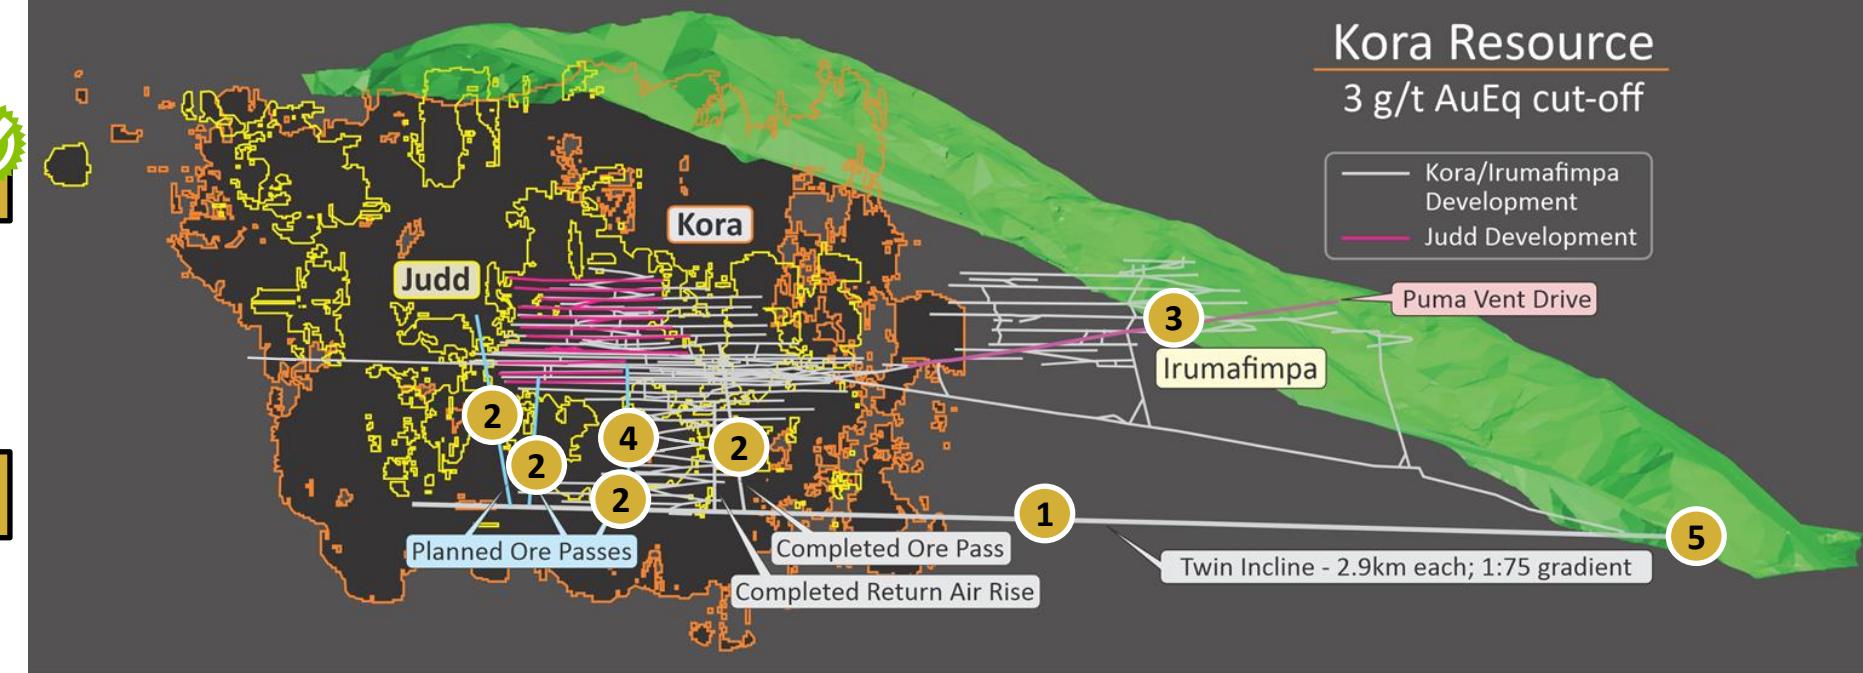

Status: Internal Ramp Connecting the Main Mine to the Highly Productive Twin Incline

Status: Complete

Impact: Major operational efficiency improvements as the Main Mine is accessible to the highly productive twin incline and all mining fronts connected via an internal ramp, allowing for one-way traffic flow.

Kora-Irumafimpa Planned Twin Incline and Development Long Section (Looking West)

5

Pastefill System

Status: Targeting commencement of commissioning in mid-Q1 2026, practical completion of commissioning in H2 2026

Impact: Significant improvement to mining method plus mine flexibility via enabling mining in two directions vertically instead of currently one.

Underground Productivity To Be Transformed Through Various Near-Term Infrastructure Upgrades

Rapid Ore Transport - Twin Incline Complete

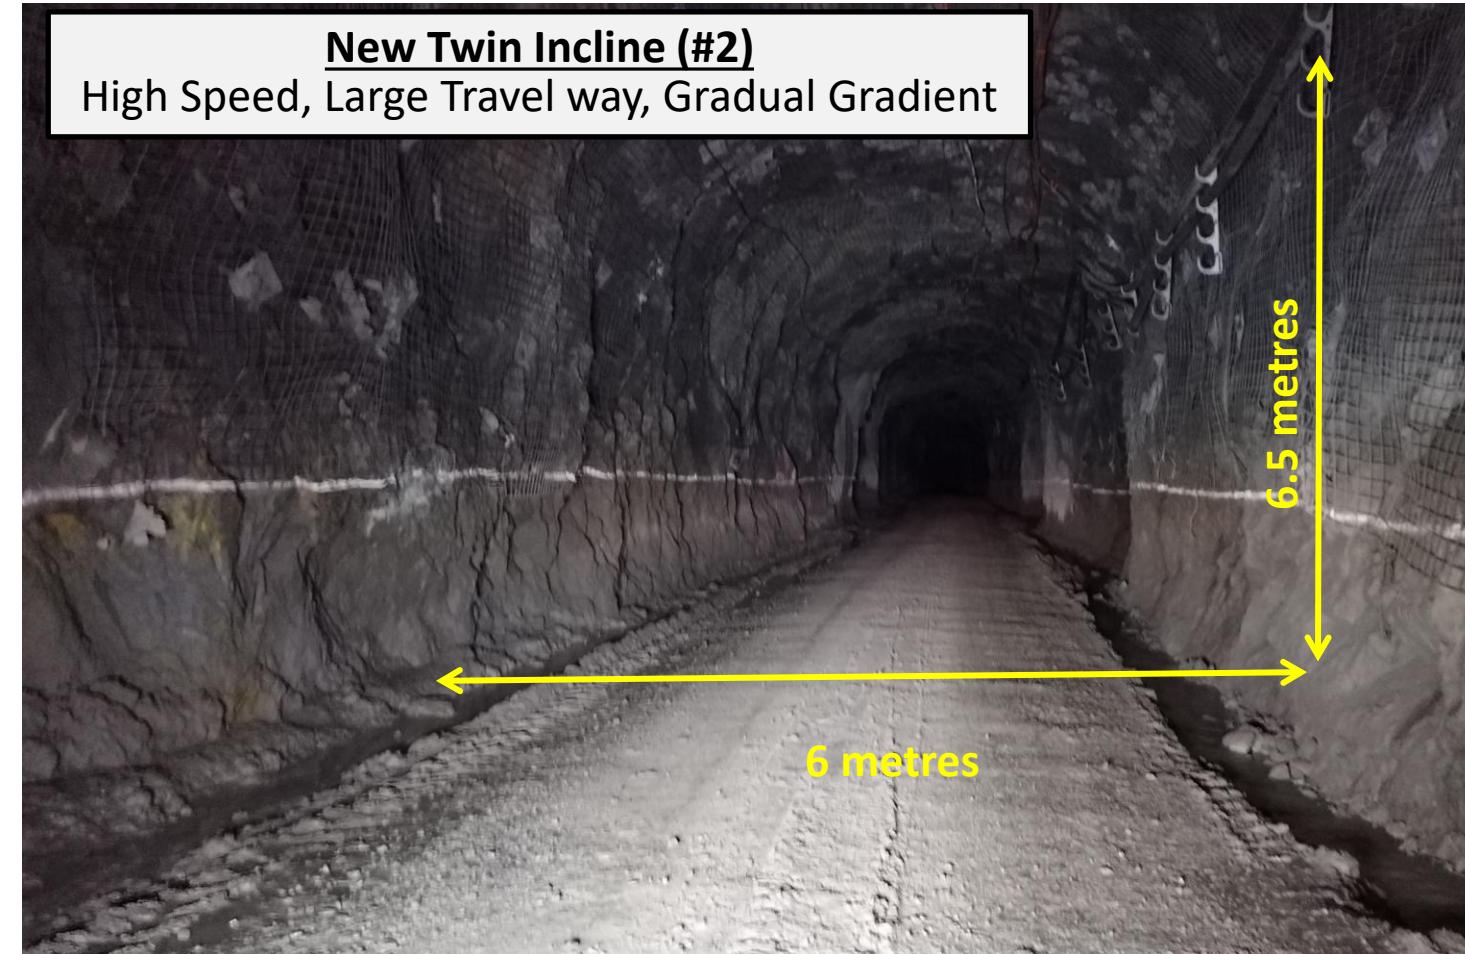

Existing Incline to Main Mine

Transported 1 mt (waste & ore) in 2022

New Twin Incline (#2)

High Speed, Large Travel way, Gradual Gradient

The Twin Inclines Are Effectively An Underground Expressway
Capable of Throughput Over 5 mtpa with Conveyors which is
Significantly Greater than the Stage 4 Expansion Requirements

Internal Ramp System – Major Underground Milestone

On January 24, 2026, the Main Mine's Internal Ramp (Decline) was connected to the Twin Incline's Internal Ramp (Incline) creating "One Mine", where all mining fronts are linked by common infrastructure to the highly productive Twin Incline, significantly improving traffic flow, mine flexibility and productivity.

Ore Pass System – Major Milestone with First Tonnes Moved

First Ore/Waste Pass Tonnes Moved in Early August
The Pass Significantly Improves Material Handling Productivity

Multiple surface haulage records achieved following material pass commissioning and integration of surface haulage trucks underground (eliminates need for rehandle)

Fan Chamber – New Primary Fans Commissioning Planned in Q1 2026

The new primary fans can deliver airflow up to 3x current rates to $+600\text{m}^3/\text{s}$ (expandable to $\sim 700\text{m}^3/\text{s}$ via benching of the Puma Ventilation Drive). To conserve power, the fans will initially operate at $\sim 350\text{m}^3/\text{s}$ ($+75\%$ increase from current flow-rates) and ramp up incrementally as required.

Mechanical installation completed in late Q4, with HV electrical work and associated infrastructure now advancing.
Electrification is scheduled for completion in Q1 2026

Improved Mine Power Delivery – Primary Standby Power Station Complete

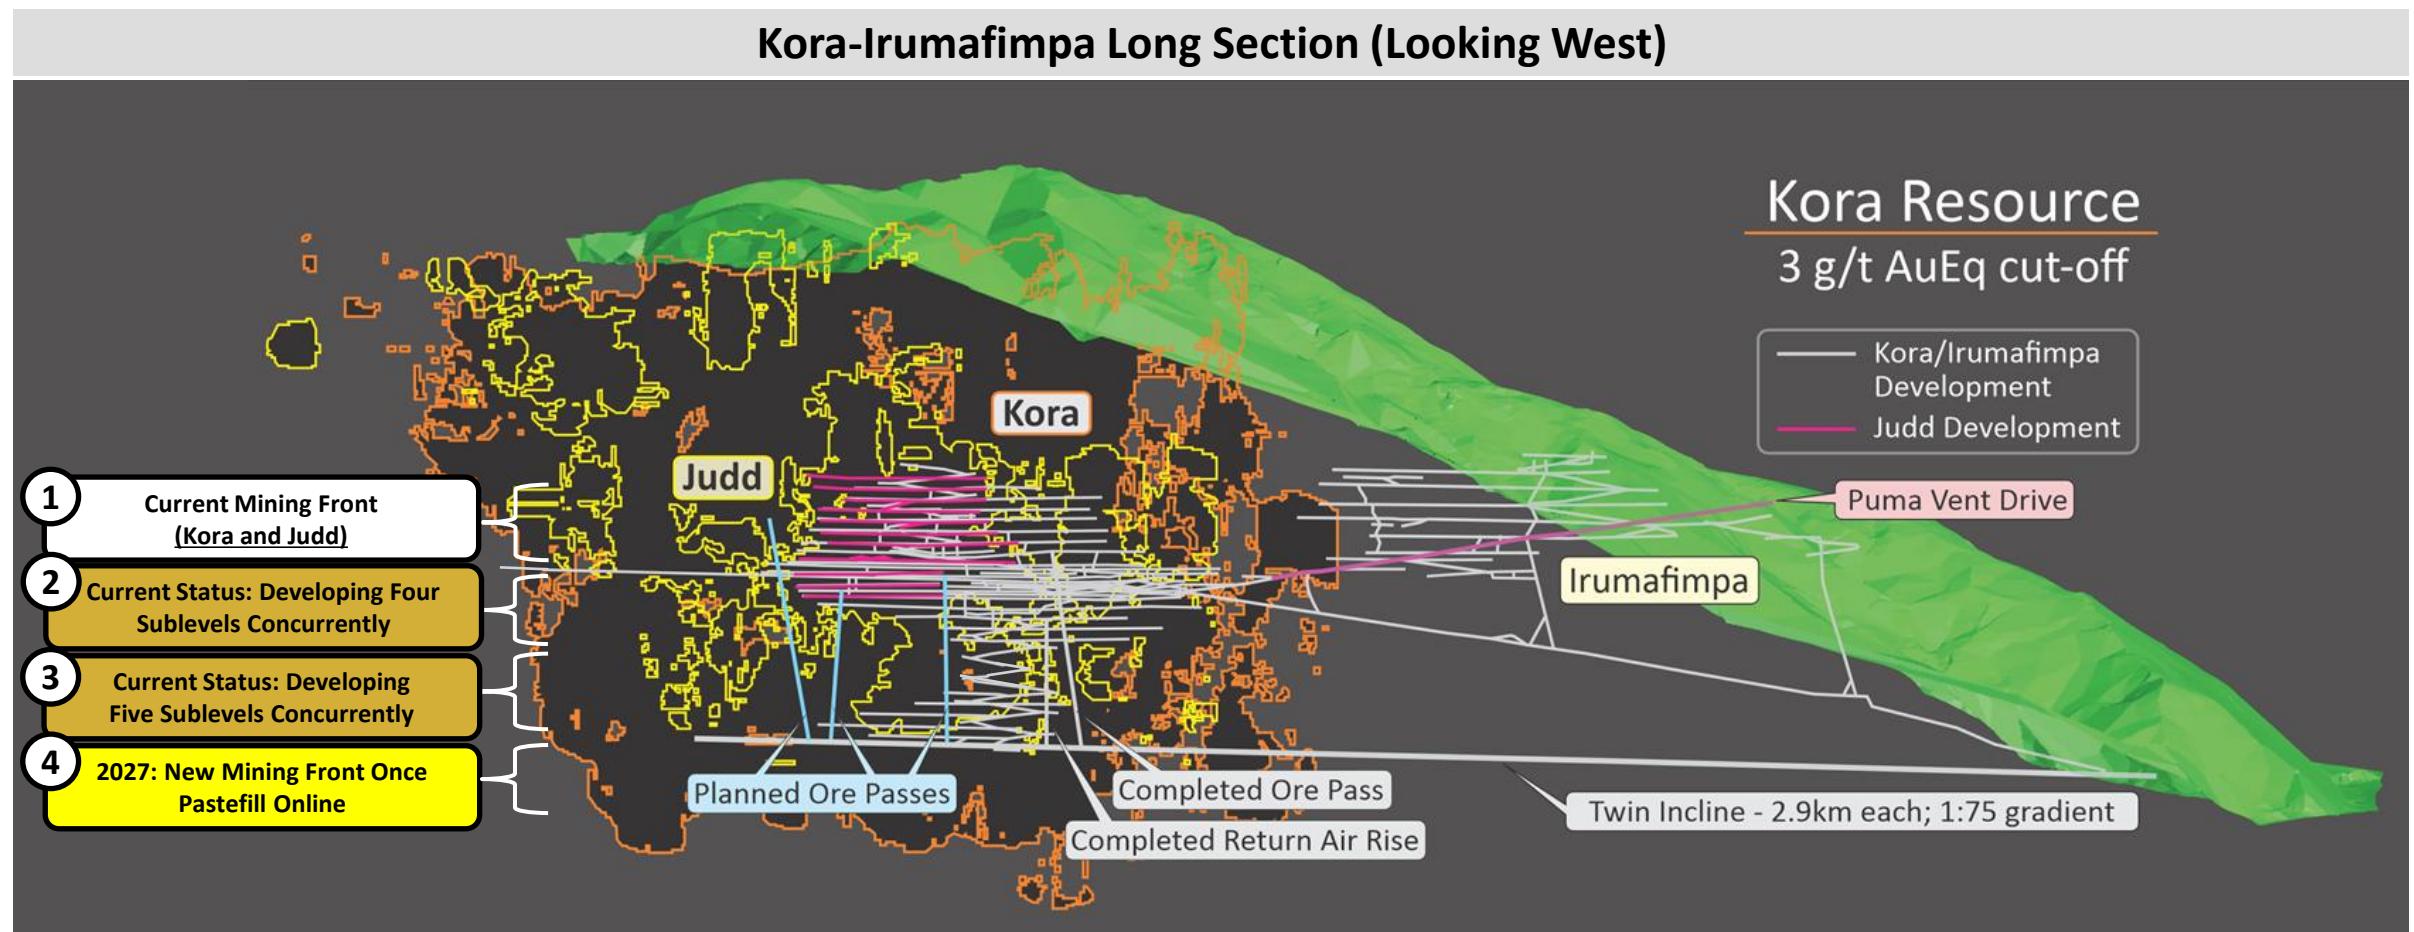

The 10.7 MW Prime Power Output Primary Standby Power Station commissioned in Q4 (from 8.8 MW). This significantly improves site power reliability and synchronizes with mains power (hydroelectricity) to improve electrical supply stability. **Positive impact most significant for the underground mine.**

Long-lead items ordered & civil works complete for further expansion to 15.3 MW Prime Power Output
Installed capacity is 1.5 MW Greater than Prime Power as 1 generator allocated for standby, supporting continuous load operation and preventative maintenance programs.

3x Increase of Mining Fronts

Kora-Irumafimpa Long Section (Looking West)

There Has Been Effectively One Mining Front Producing the Bulk of the Ore Since Commercial Production (Front #1)

Triples to Three Fronts Producing Ore in Q1 2026 and Increases to Four Fronts in 2027

Multiple Production Stoping Enhancements Being Introduced

Surface Operated Teleremote System – Commissioned

Two Sandvik 517i loaders on site; one operational, one commissioning Feb/2026. Two more arriving Q2 2026.

Surface operated teleremote system commissioned, allowing for up to 24 hr/day operation (during shift change)

Significant Equipment (Load and Haul, Drills, Explosive & Ancillary) has been procured and arriving progressively over the next 12 months, with the majority arriving by mid-year 2026

Strong PNG Government and Key Stakeholder Support

February 2025 Site Visit – Delegation Led by the late Hon. Luther Wenge

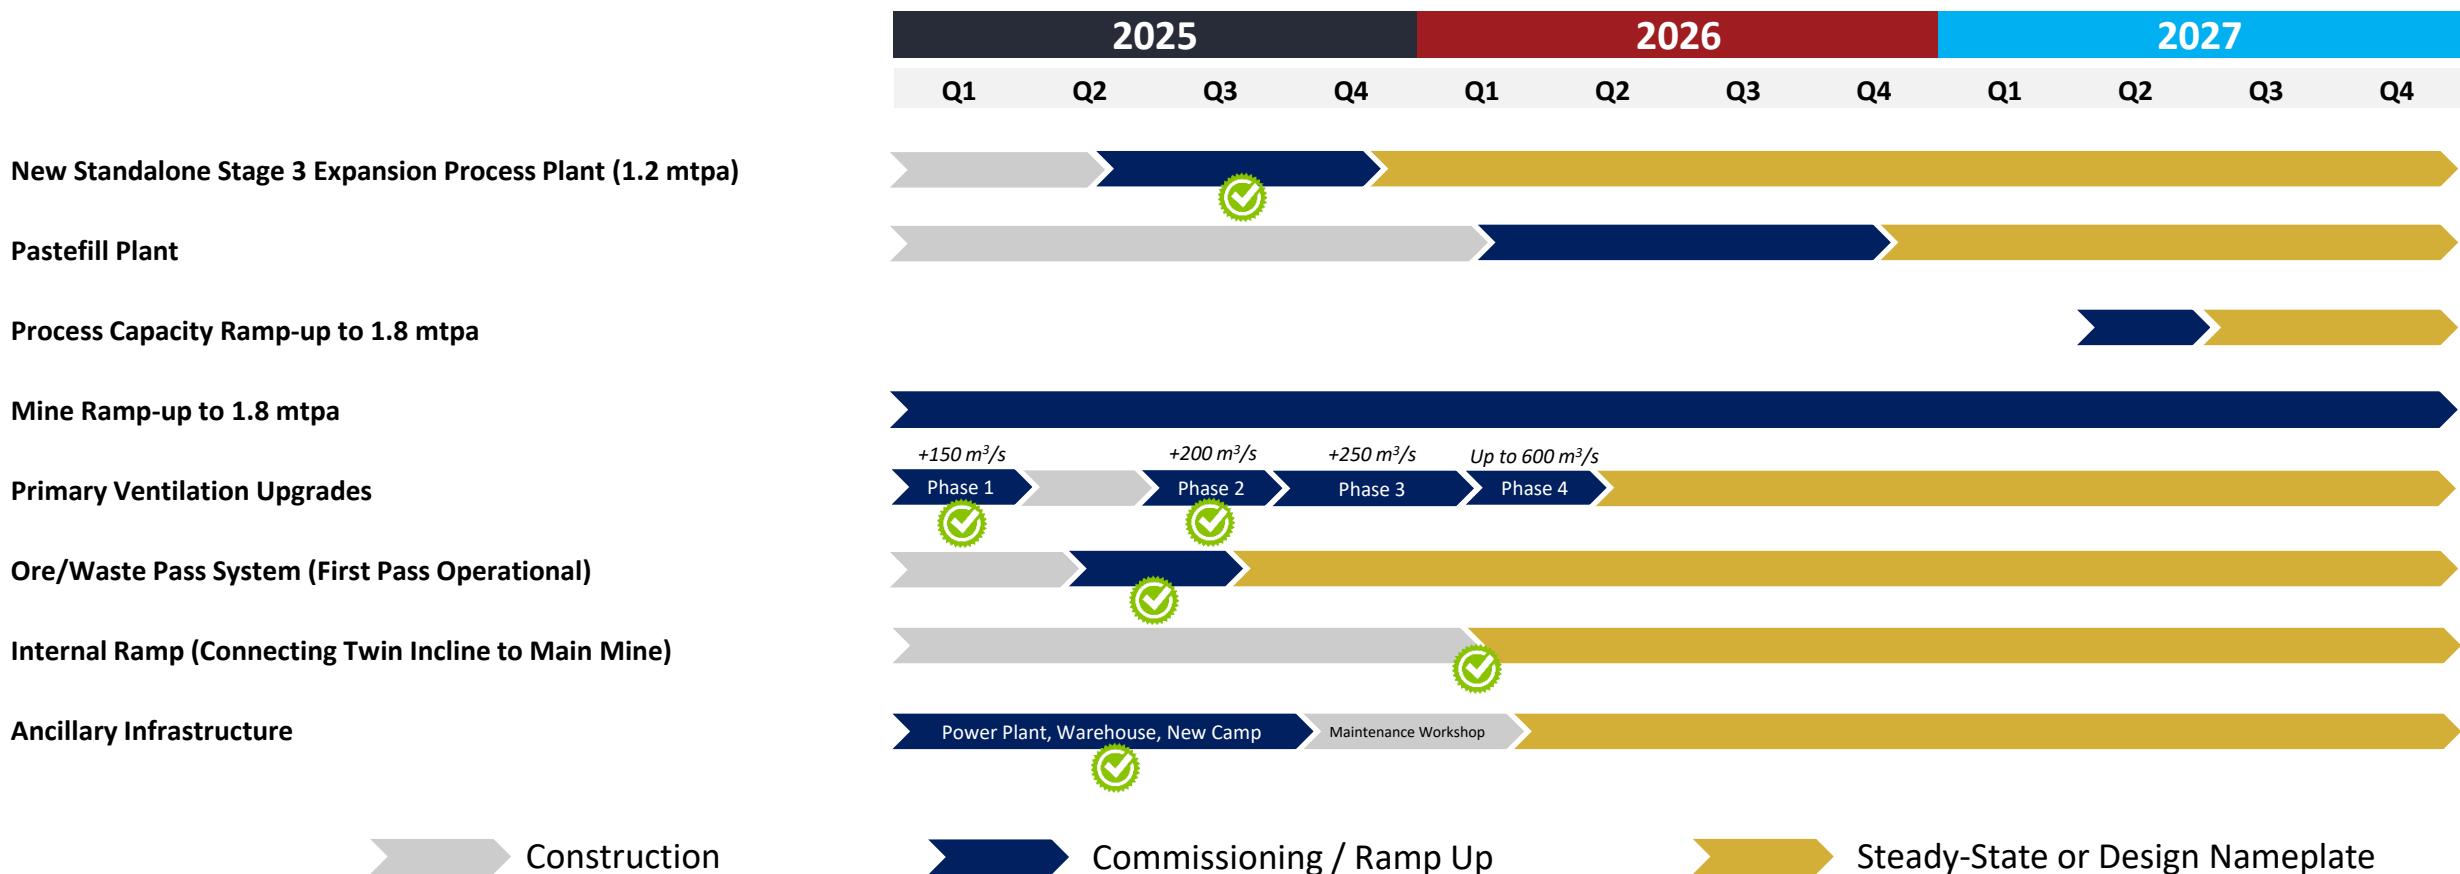

March 2025 Site Visit – Delegation Led by Governor of EHP Province Hon. Simon Sia

August 2025 Site Visit – Delegation Led by Minister for Mining Hon. Rainbo Paita

Near-Term Delivery of Stage 3 & 4 Expansions

**First saleable production from Stage 3 Expansion Process Plant recorded in early-October
Process Plant officially inaugurated on October 16th, 2025
Commissioning Completed December 2025**

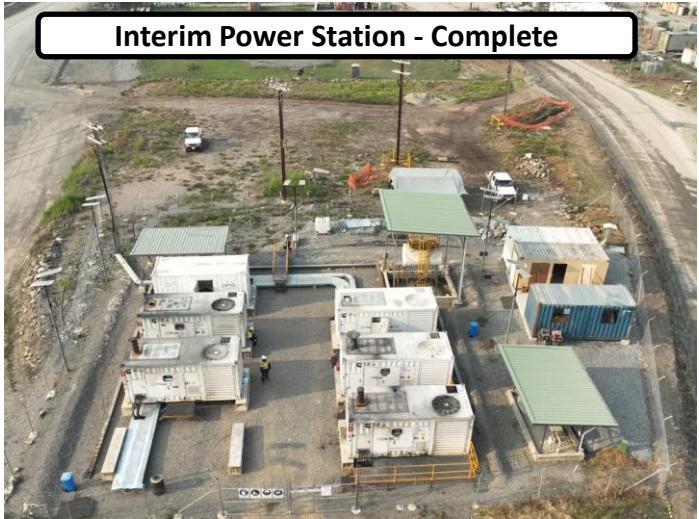

Stage 3 Expansion Process Plant

Commissioning of the New 1.2 Mtpa Process Plant Completed Under Budget

Ancillary Construction Projects Progressing Well

Interim Power Station - Complete

Warehouse Construction - Complete

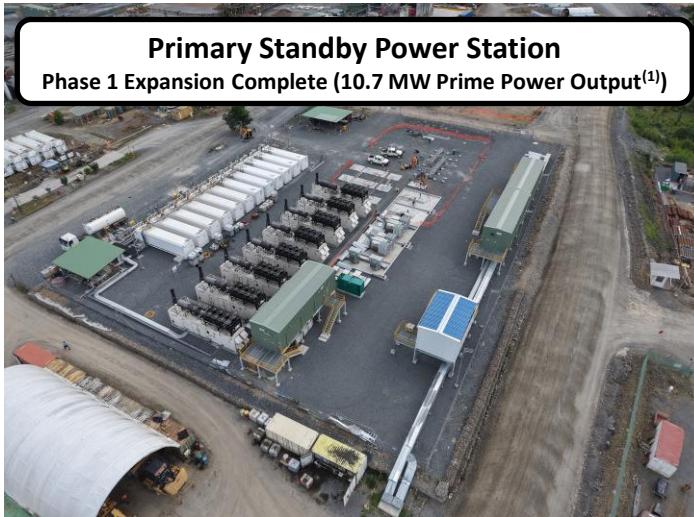

New Kumian Creek Camp - Complete

Primary Standby Power Station

Phase 1 Expansion Complete (10.7 MW Prime Power Output⁽¹⁾)

New Maintenance Facilities - In Progress

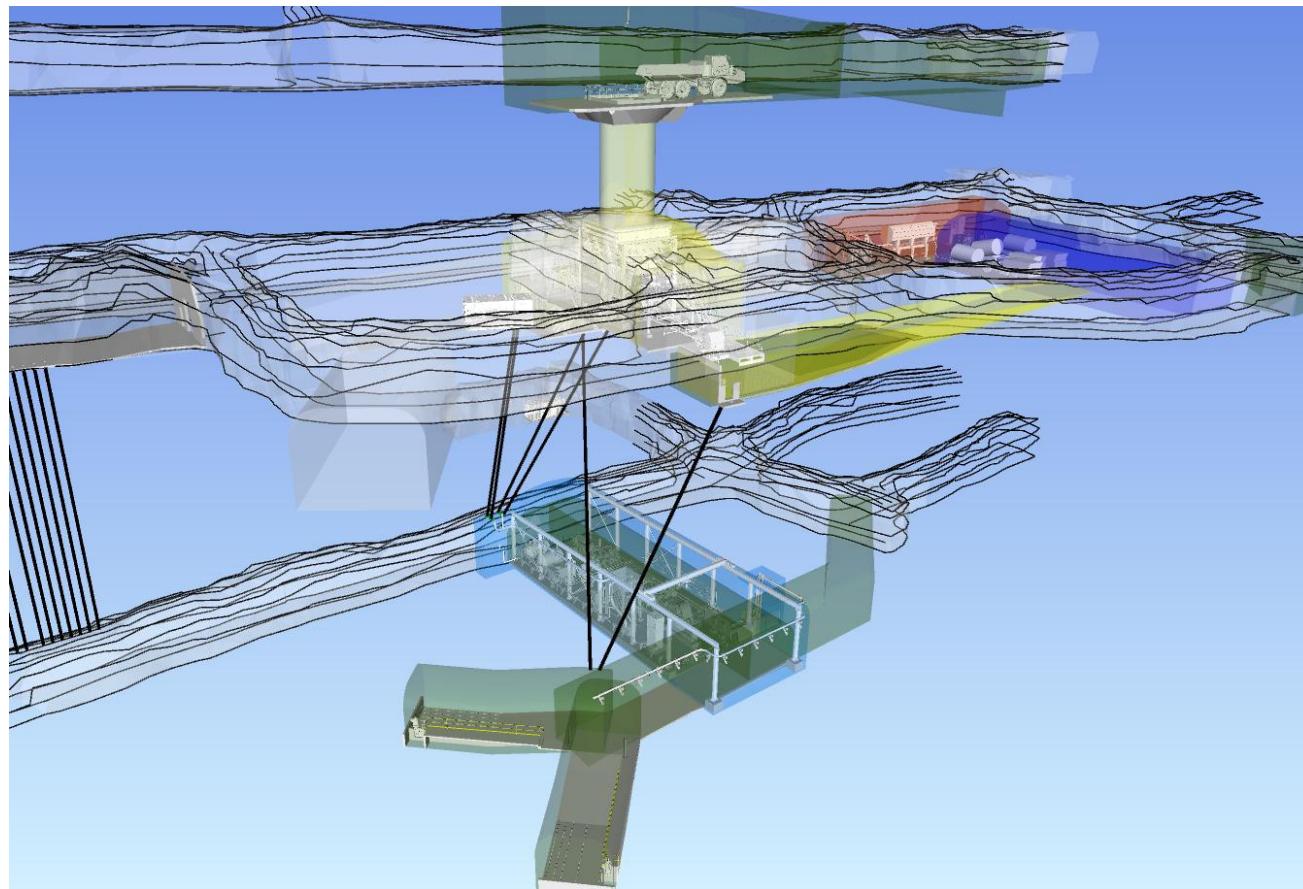

Significant amount of ancillary packages are complete, supporting the next phase of expansion

Note (1): Installed power capacity is 1.5 MW greater than prime power output as there has been an allowance made for one generator to be on standby, supporting continuous load operation and preventative maintenance programs.

Stage 3 Expansion Update – Underground Paste Plant Advancing

Underground Paste Plant

Surface Storage System Near Portal

Tailings Filtration Plant

Overall Underground Pastefill Plant Design Complete, All Pastefill Plant Long Lead Items Arriving on Site and All Major Construction Contracts Have Been Executed

Pastefill Plant Infrastructure Construction Advancing

Tailings filter plant structural steel install in progress, bulk earthworks for the surface storage facility are complete with civil and concrete work underway. Paste Plant commissioning targeting mid-Q1 2026 with practical completion of commissioning of the pastefill circuit scheduled for H2 2026.

Major Improvement to Mine-Mill Transport Capacity Underway

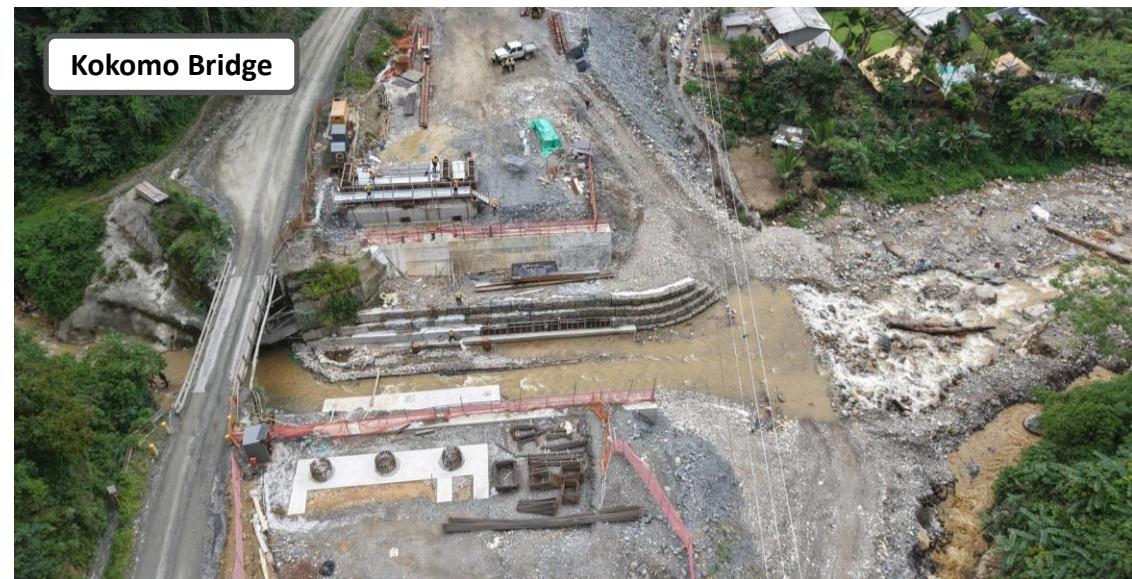

Kasese River Crossing

Baupa Bridge

Kokomo Bridge

Several roads and river crossings are concurrently being upgraded to improve haulage capacity and operational efficiency

Multiple High Priority Near-Mine Targets

Multiple High Priority Near-Mine Vein and Porphyry Targets

1

Kora & Kora Deep (Vein)

- Kora open to depth and along strike

2

Kora South & Judd South (Vein)

- Structure extends +1km beyond mining lease
- Outcrop and historical mining, previously undrilled

3

Judd & Judd Deep (Vein)

- Subparallel to Kora, high-grade historical & recent intersections
- ~150-200m from existing mine infrastructure

4

Maniape and Arakompa (Vein)

- Arakompa: +2km strike, +800m vertical, +400m wide mineralized corridor
- Maniape: +1km strike, +200m vertical

5

Wera (Vein)

- Large 3.5km x 3.5km low-sulphidation epithermal vein system
- ~10km from Kora and Judd deposits

6

Karempe (Vein)

- Artisanal workings, presumed porphyry below high-grade veins
- ~400-450m from existing mine infrastructure

7

Mati, Mesoan and Bona Creek (Vein)

- Surface geochemical sampling being conducted ahead of drill program

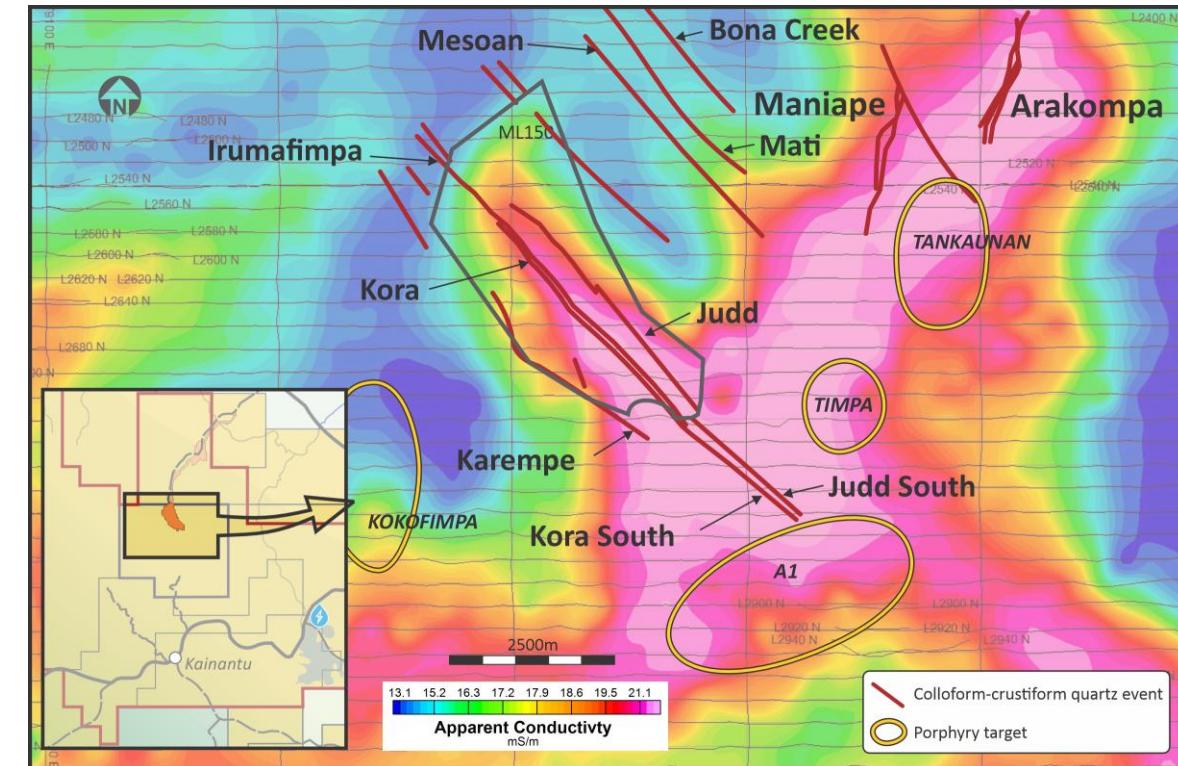

8

A1 (Porphyry)

- Latest advanced mobile MT geophysics confirms A1 as our #1 porphyry target

 = Drilling Underway

Airborne Geophysics and Target Locations

**Significant Resource Expansion at Highly Prospective Near-Mine Vein Field
Established Infrastructure = Rapid Transition from Discovery to Mining**

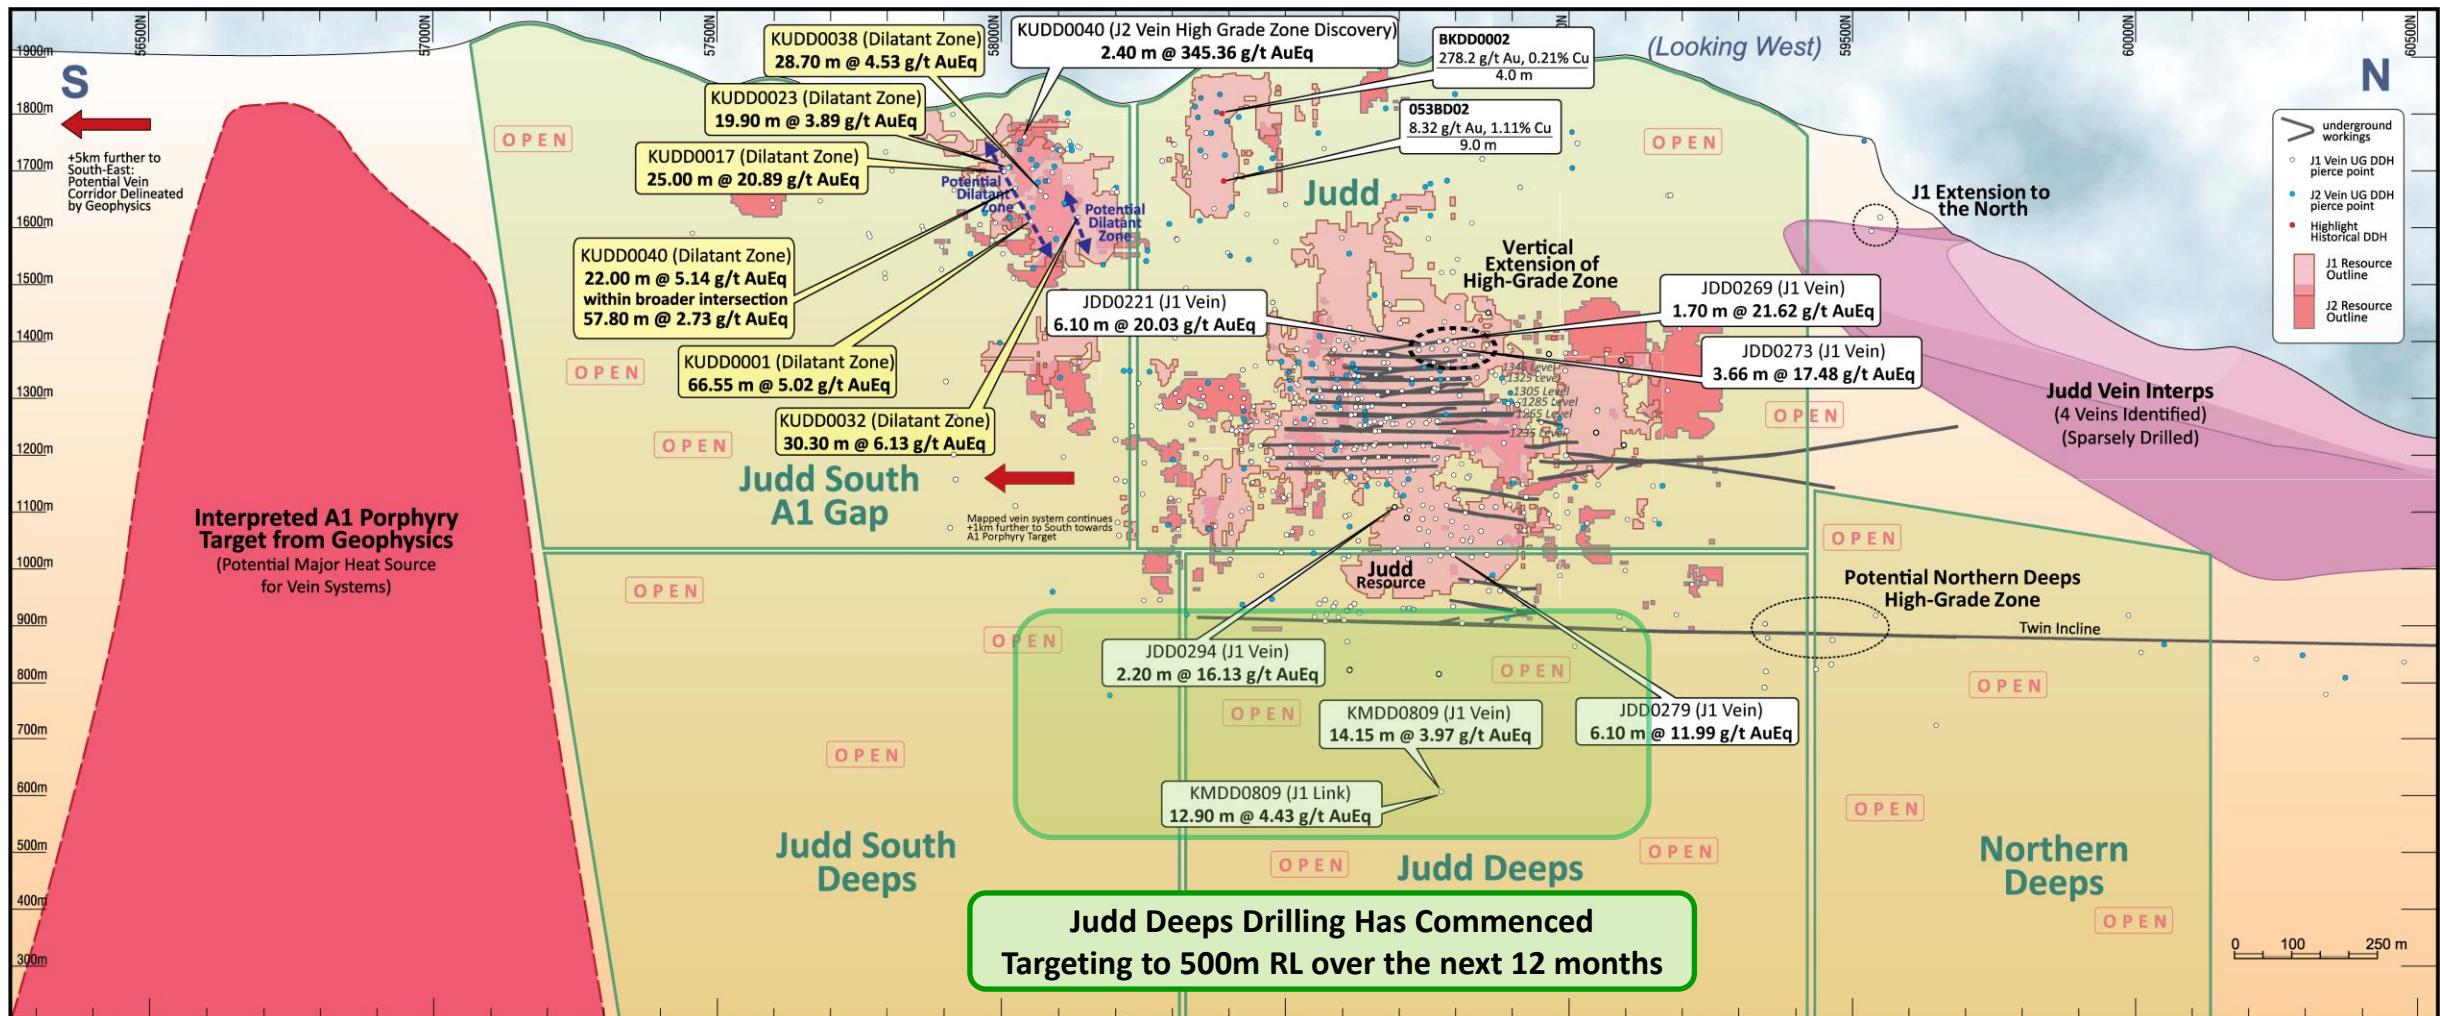

Exploration Target: Kora, Kora South, Kora North & Kora Deep

Multiple Highly Prospective Exploration Fronts Being Drilled Concurrently

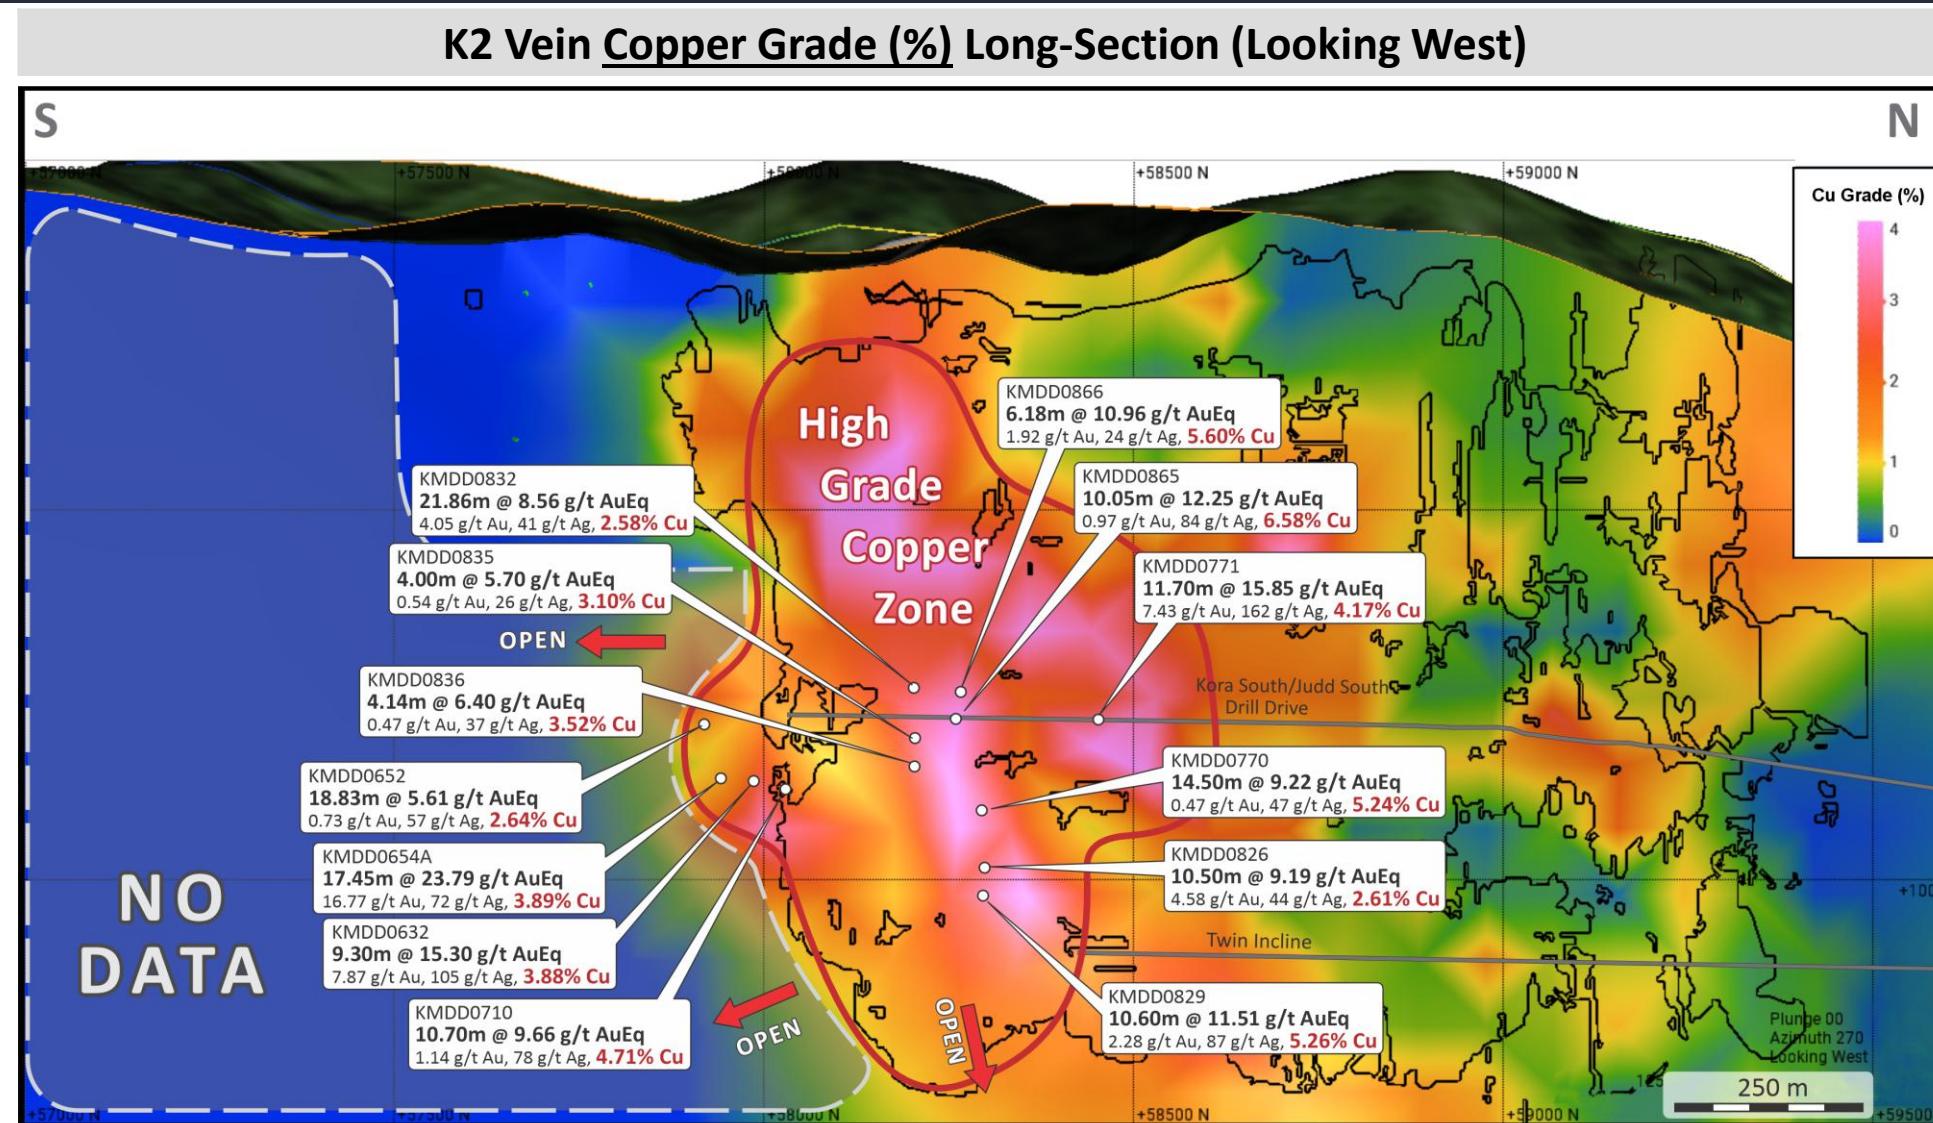

**Kora Deep, Kora North and South Deep Underway from
Twin Incline and Kora South Underway from 1205 Level Drill Drive**

Judd and Judd South Vein System is Very Underexplored

Judd is Sparsely Drilled, Has at Least 4 Known Veins and Open in All Directions
Significant Amount of Drilling Completed Since the Judd Resource and
Drill Defined Strike Length has Increased +130% Since End of 2021

Copper Grade Tenor Increasing to the South towards A1 Porphyry

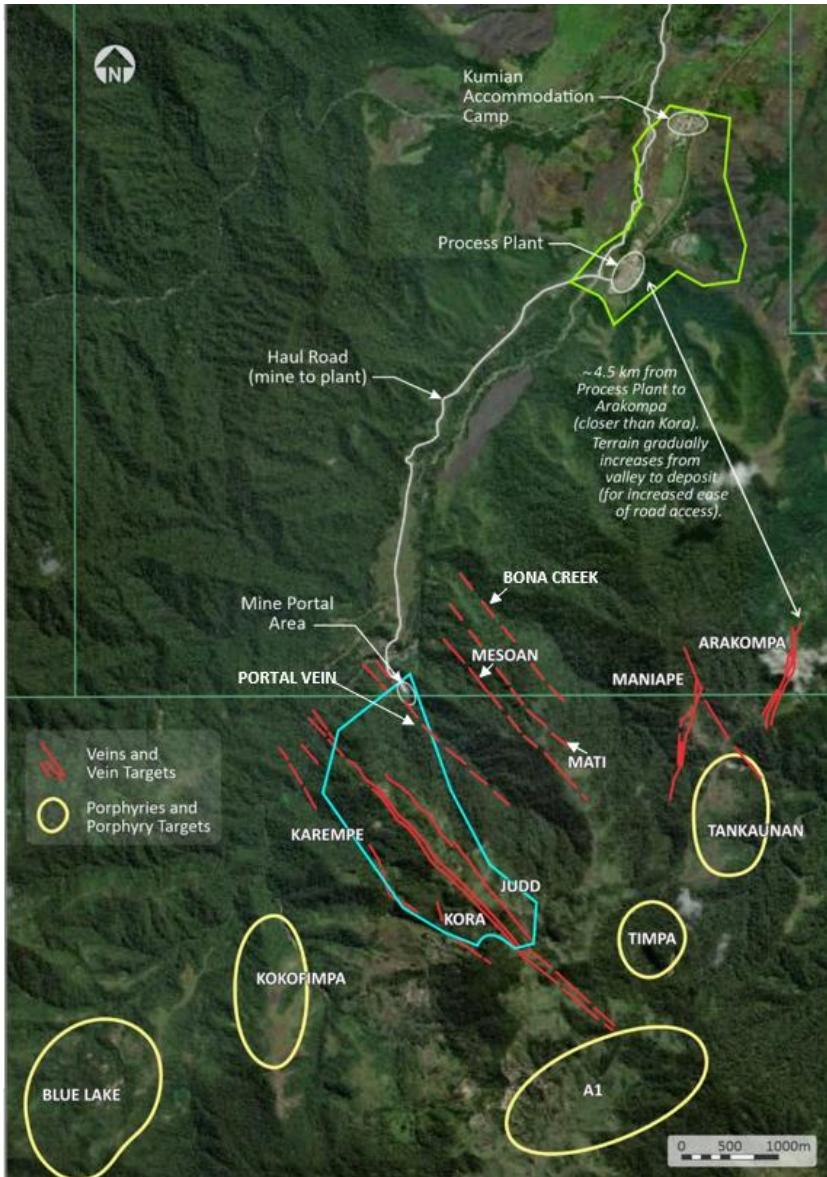

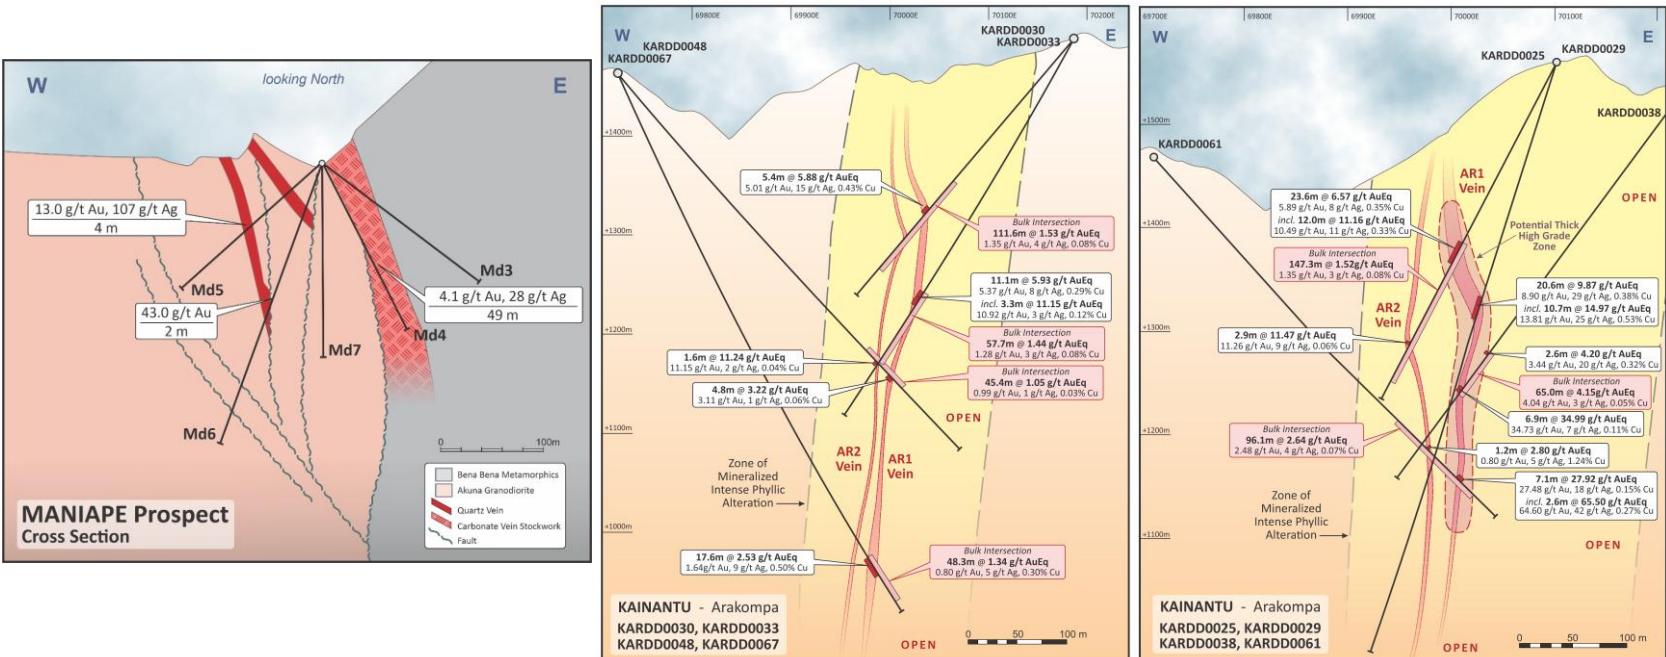

Kora South/Judd South Drill Drive Well Established for Step-Out Drilling

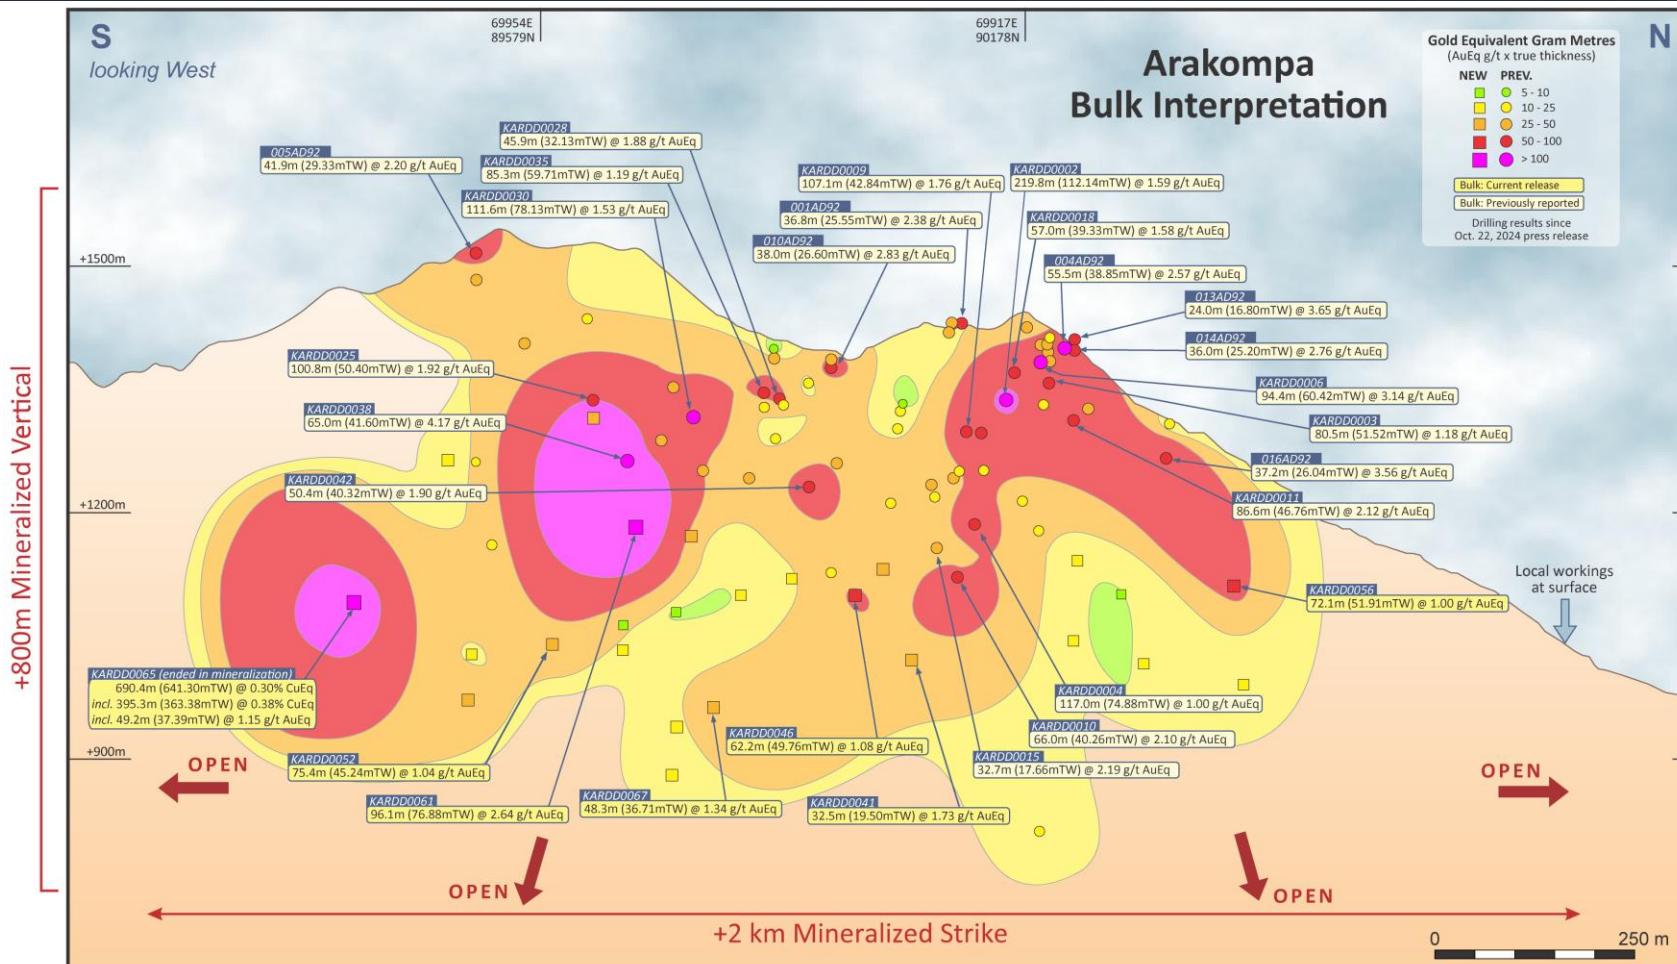

High Priority Exploration Targets: Arakompa and Maniape

Arakompa and Maniape Veins Key Facts

- **Arakompa** – Sparsely drilled, open along strike, at depth and along its width
 - Located ~4.5km from Kainantu process plant, with similar mineralization to the producing high grade Kora and Judd vein systems
 - The target size is very large, with mineralization demonstrated from drill holes, rock samples and surface workings for at least 2 km of strike, hosted within an +400 m wide mineralized intense phyllitic altered package, and exhibits a vertical extent of +800 m
 - **Maiden resource estimate targeting H1 2026**
- **Maniape** – ~1100m strike & 220m known vertical
 - 16 holes drilled, including: **49 m at 4 g/t Au (incl. 12.5 m at 8 g/t Au) and 7 m at 22 g/t**
 - Work to date indicates Maniape is similar geologically to Arakompa

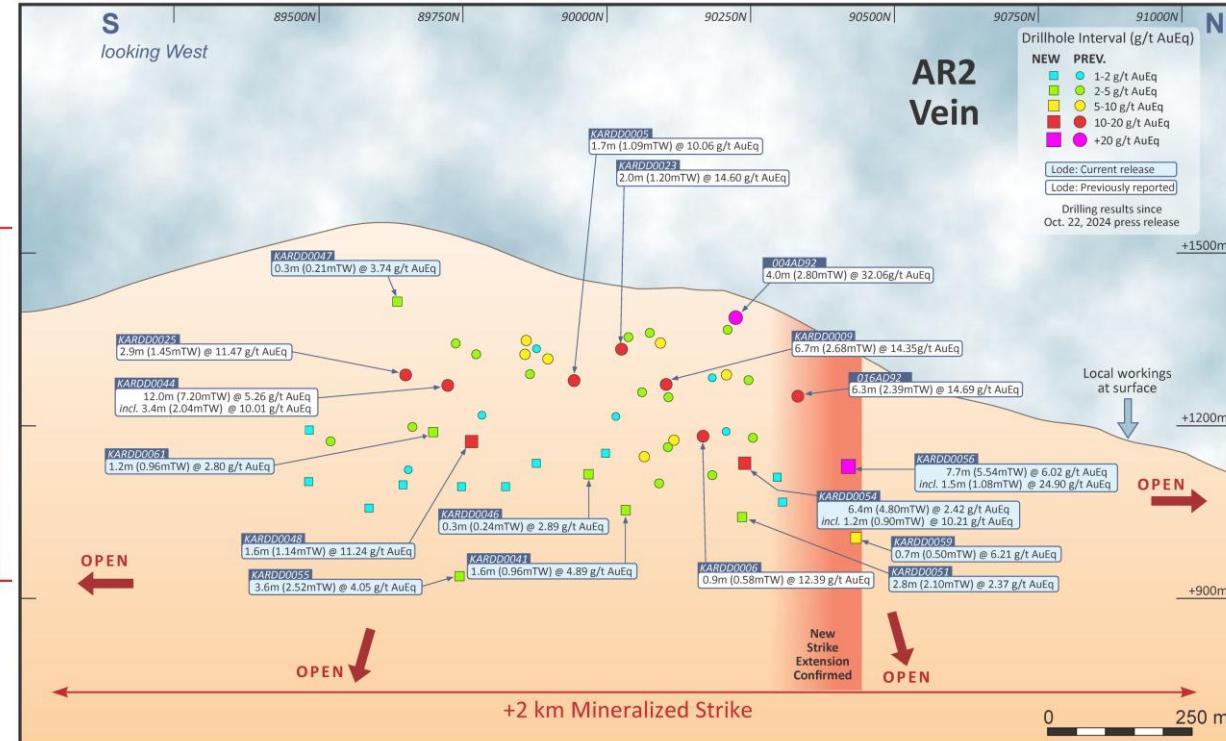

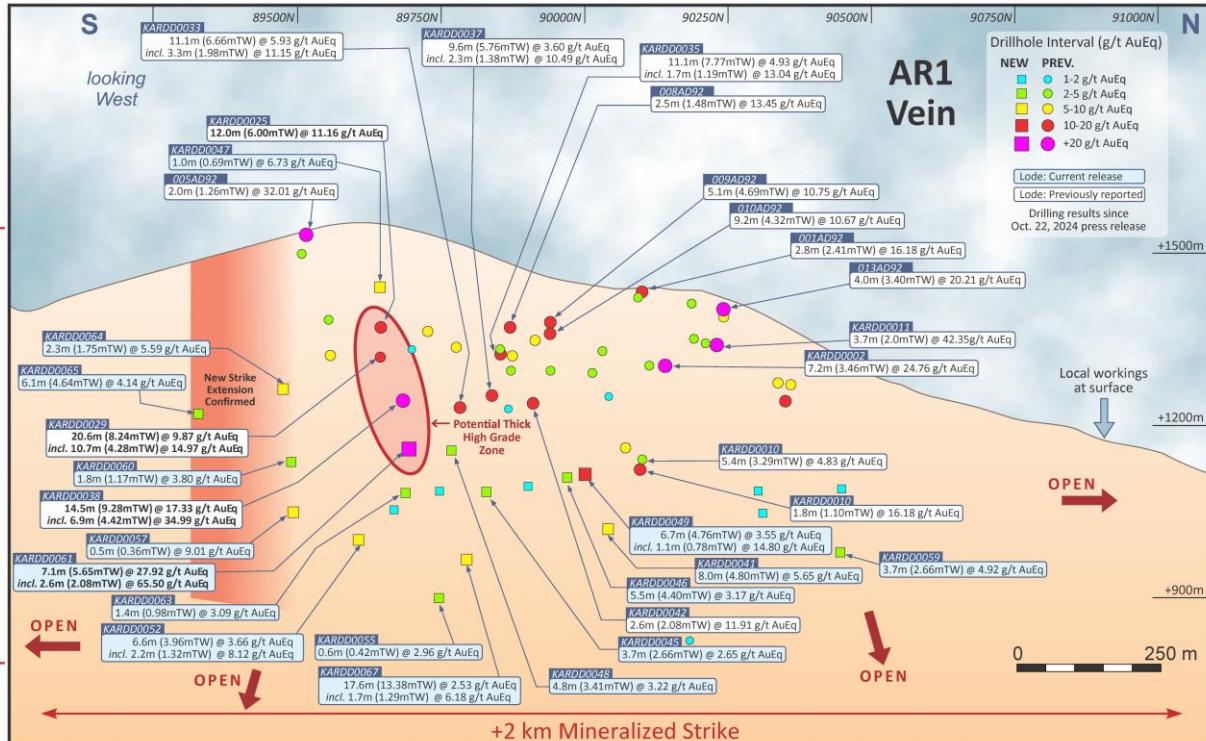

Sizeable Bulk Tonnage Zone Defined & Porphyry-Style Mineralization Discovered

Arakompa Target is Very Large: +2km Strike, +800m Vertical and +400m Wide Corridor – Open Along Strike, Depth & Width

**Southernmost step-out testing 600m x 600m copper-in-soil anomaly intersected significant Cu-Au mineralization
690m at 0.30% CuEq, incl 395m at 0.38% CuEq**

Two Major High-Grade Veins Confirmed to Date – AR1 and AR2

Drilling at Arakompa has delineated two major sub-parallel veins AR1 and AR2, defined over extensive strike and depth

Both veins open in multiple directions, with substantial average mineralisation widths of ~3 metres

Arakompa is a Growing Very Rapidly

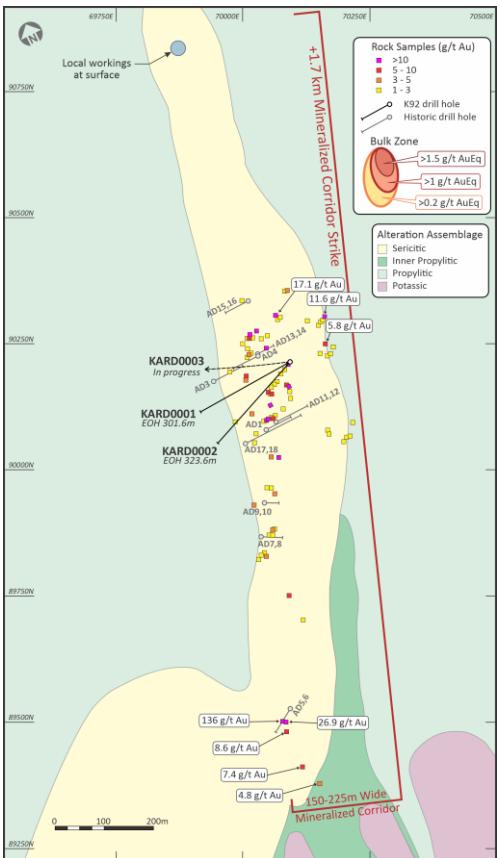

Feb 2024

June 2024

Oct 2024

Feb 2025

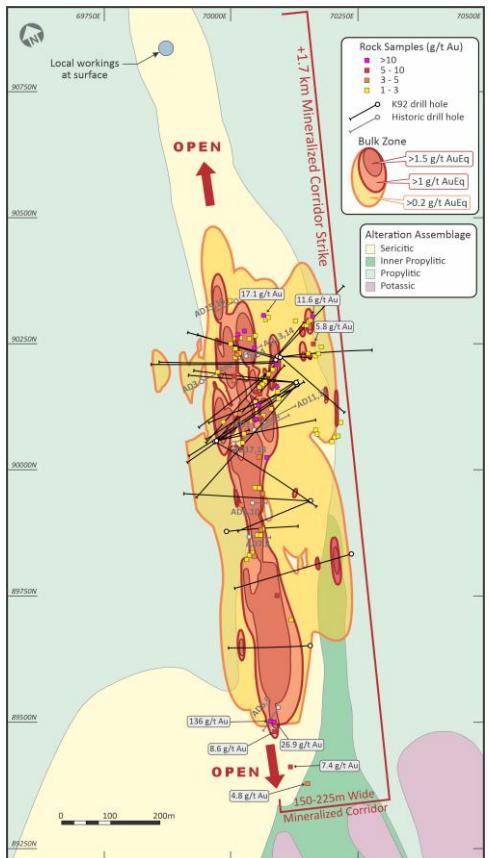

Sept 2025

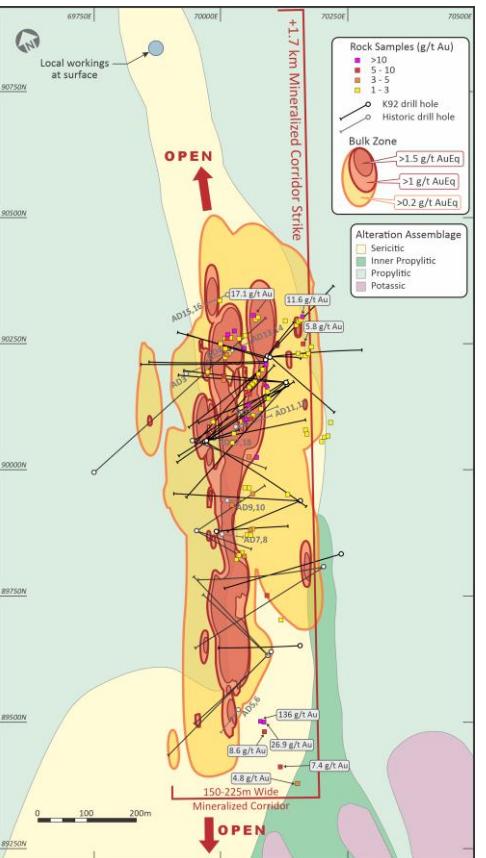

(2 Holes Reported)

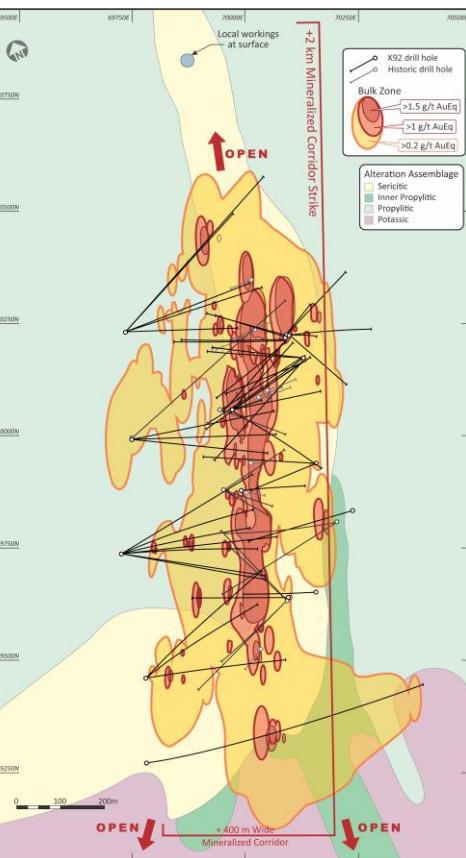

(11 Holes Reported)

(30 Holes Reported)

(43 Holes Reported)

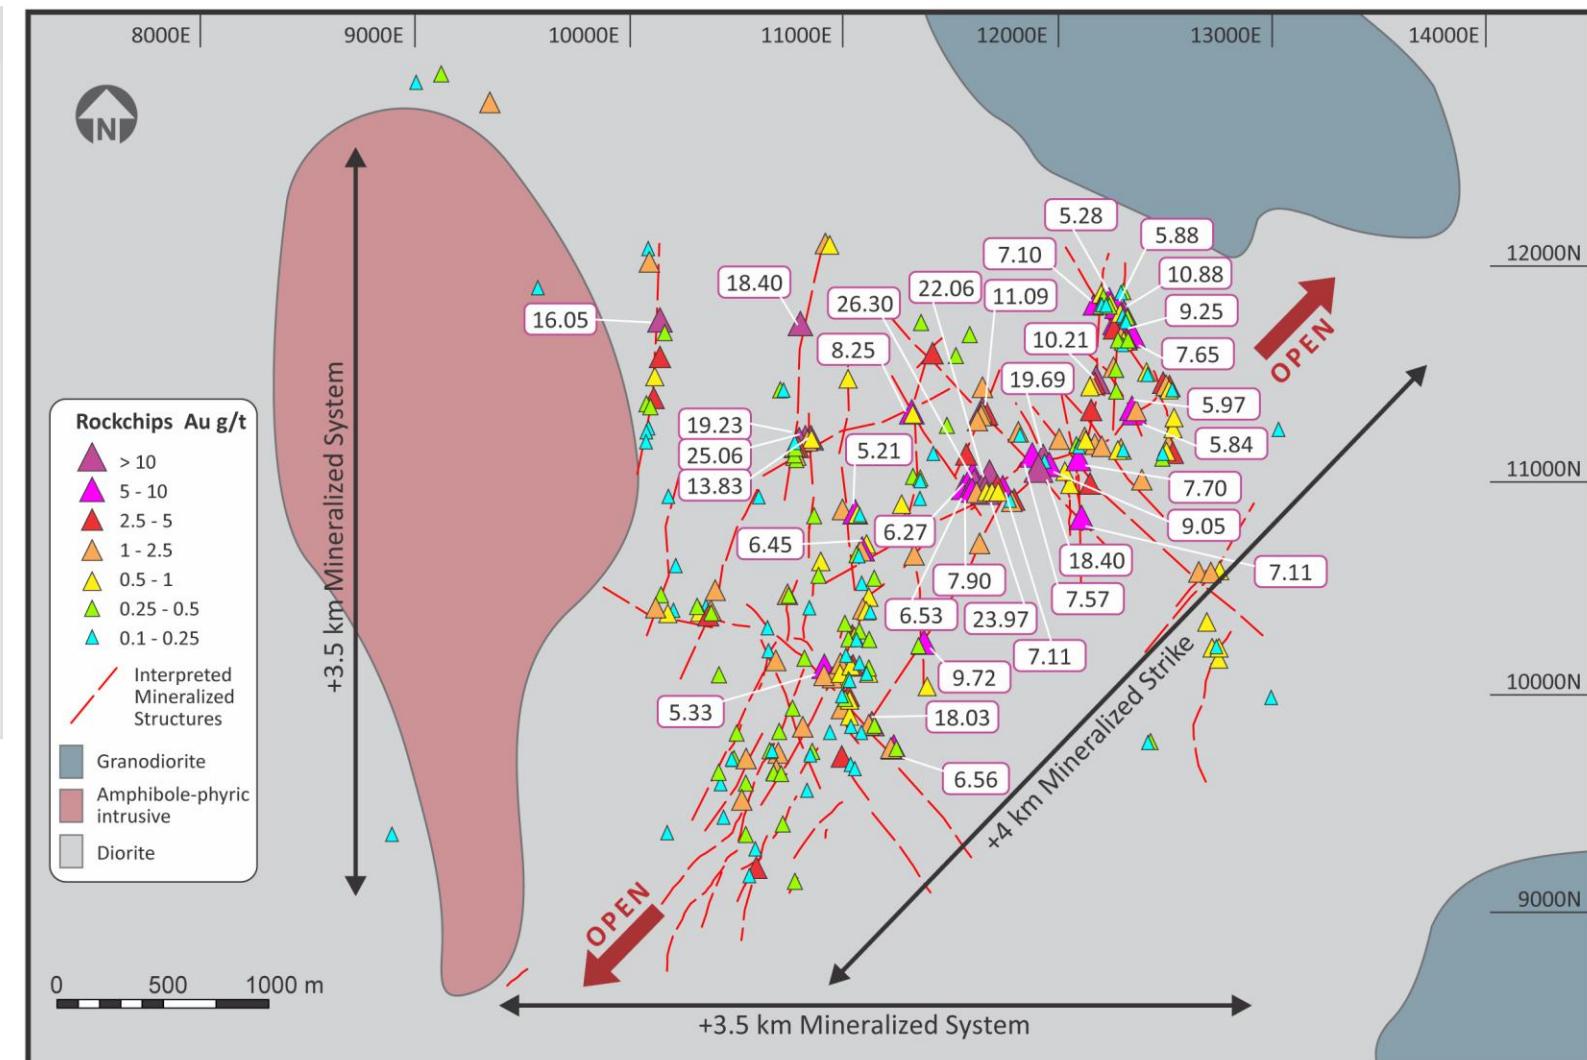

(67 Holes Reported)

Arakompa is rapidly & efficiently growing – just over 65% of strike has been tested. Two new surface diamond drill rigs are scheduled to arrive in mid-Q1 2026, supporting a significant ramp-up in exploration.

New Greenfields Discovery – Large Vein System at Wera

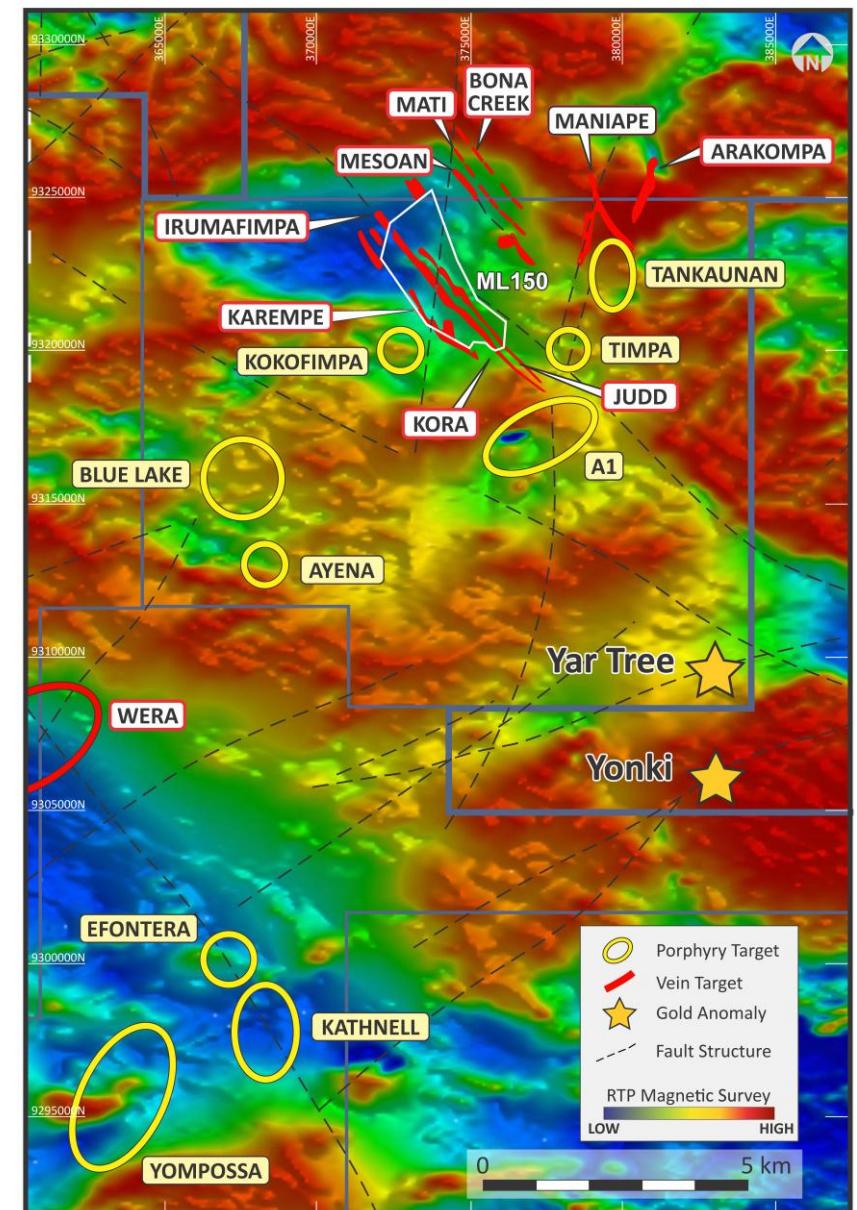

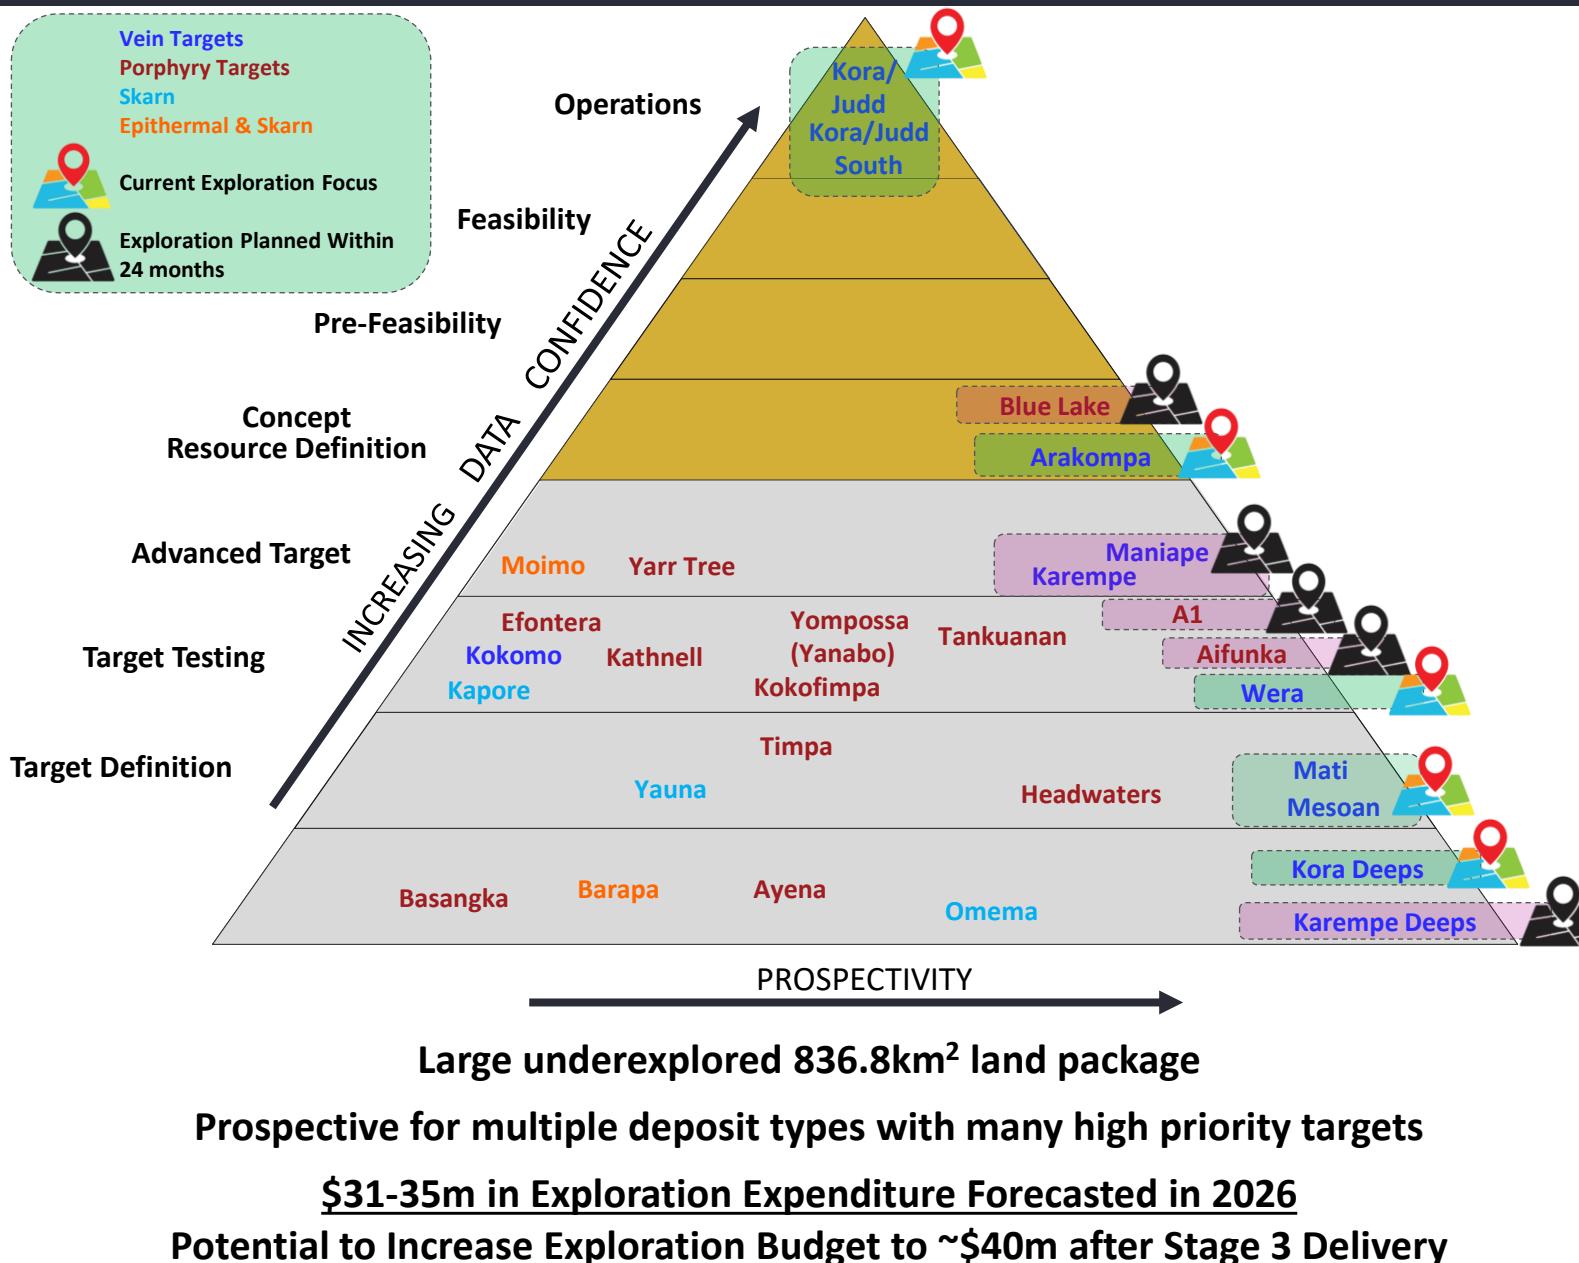

Wera Vein System Key Facts

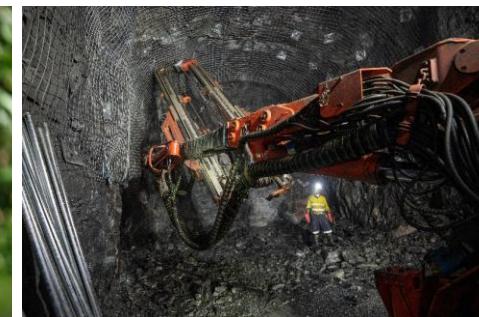

- **Wera** – low-sulphidation epithermal gold system
- Road accessible and located ~10km SW from Kora and Judd
- Target identified from airborne geophysics MobileMT Survey and review of historical data
- Maiden exploration program (commenced in July 2024), focusing on rock chip and trenching, has defined a large 3.5km by 3.5 km vein system that is open along strike in both directions
 - High-grade rock chip samples, include:
 - 26.30 g/t Au, 25.06 g/t Au, 23.97 g/t Au, 22.06 g/t Au, 19.69 g/t Au, 19.23 g/t Au, 18.40 g/t Au, 18.40 g/t Au, 18.03 g/t Au, 16.05 g/t Au, and 13.83 g/t Au
 - Lies within the major NNE regional mineralized structural corridor that hosts Kora, Judd, and Arakompa
- **Maiden scout drill program is currently underway at Wera**

Maiden Greenfields Exploration Program Has Defined a Large 3.5 km by 3.5 km Mineralized System Located 10km South-West from Kora and Judd – Drilling is underway

Significant Pipeline of Highly Prospective Exploration Targets

Appendix

Management & Directors

Management Team

John Lewins
CEO & Director

Mineral engineer with +35yrs of global experience (Africa, Australia, Asia, N. America & former Soviet Union) at project development, operational and corporate level. Former GM of MIM Holdings, MD of Platinum Australia and Executive Director of African Thunder Platinum SA. Became CEO of K92 in Aug 2017; previously COO.

David Medilek
President & COO

Mining professional with +18 yrs of mining capital markets, corporate strategy and technical operating experience. Former President and VP Business Development & Investor Relations of K92 Mining, Equity Research Analyst at Macquarie Group Limited, Mining Investment Banker at Cormark Securities Inc. and Mining Engineer at Barrick (Western Australia). Mr. Medilek is a licensed Professional Engineer in BC, Canada and CFA® charterholder*.

Justin Blanchet
CFO

Previously CFO of several TSXV-listed mining companies. Mr. Blanchet has 20 yrs of financial reporting, audit, treasury, business development, and regulatory compliance experience in the mining industry and has worked on international projects throughout the world. Mr. Blanchet is a Canadian Chartered Professional Accountant and a U.S. Certified Public Accountant (Washington).

Chris Kinver
VP Projects & Engineering

Mining engineer with 20yrs of underground operations and mine development experience in PNG, Australia, South America, Africa and the United Kingdom. Former Project Director Kora Expansion, Mining Manager and Evaluation and Studies Manager at K92. Held roles of Project Manager with OceanaGold, Underground Mine Manager with BHP, Underground Mine Manager with Barrick and Principal Engineer at Wardell Armstrong LLP. Mr. Kinver holds a First Class Western Australian Mine Managers' Certificate and registrations with the Institute of Engineers Australia, The Engineering Institution of Zambia, and Registered Engineers of Tanzania.

Robert Smillie
VP Exploration

Mr. Smillie is a geologist with over 35 years of experience specializing in epithermal gold and copper-gold systems across the Asia Pacific. While at Ok Tedi Mining, his team discovered the Townsville project, a major copper-gold find and the company's most significant near-mine discovery in over 30 years. He has led large exploration programs with budgets up to AUD\$25 million and worked with OceanaGold, WMC Resources, Calibre Mining, and others. Mr. Smillie holds an MBA from Victoria University, an MSc and BSc in Geology from Otago University, and is a Fellow of SEG and AusIMM.

Stanley Komunt
VP Community Affairs and External Relations

Mr. Komunt has over 25 years of experience in community and government relations in the mining industry. He served as Country Manager for Newcrest and Newmont in PNG, leading negotiations and managing regulatory, stakeholder, and community engagement. He has held senior roles at Nautilus Minerals, Morobe JV, Highlands Pacific, and Ok Tedi Mining. Mr. Komunt is a member of the Australian Institute of Company Directors and serves as VP PNG for the Australia PNG Business Council and Director of PNG MVL.

Philip Samar
Senior Advisor, Government & Community Affairs

Mr. Samar has spent 20 years through to 2018 working for the Mineral Resources Authority (MRA) of Papua New Guinea, the government body responsible for regulating the exploration and mineral sector. In his last six years as Managing Director, Mr. Samar had a significant leadership role within the country and has regularly interacted with multiple mining industry stakeholders including: government, international organizations, landowners and foreign investors.

Board of Directors

Anne Giardini
Chair

Over 35 years' experience as a lawyer, senior executive, director, journalist and author, and has held several senior advisory roles. Former General Counsel and President of Weyerhaeuser's Canadian subsidiary. Ms. Giardini currently serves on the boards of Pembina Institute and CMHC and as Chair of the BC Achievement Foundation. Former Chair of the Greater Vancouver Board of Trade and served on numerous boards including Weyerhaeuser, Nevsun Resources, Thompson Creek Metals, HydroOne, and TransLink. In 2016, Ms. Giardini was made an Officer of the Order of Canada and in 2018 she was admitted to the Order of British Columbia.

John Lewins

See Management Team

Cyndi Laval

Lawyer with +25 yrs of experience specializing in areas of mining law, corporate finance, M&A, corporate governance and securities. Currently a Partner in Gowling WLG's Vancouver office. Ms. Laval was also named one of Vancouver's 30 leading lawyers by the National Post and is recognized as a leading lawyer in multiple publications. Prior to joining private law practice, Ms. Laval worked in the TSXV Exchange's policy department.

Mark Eaton

Experienced investment professional with +20yrs experience in equity capital markets, focused on the resource sector. Held the role of MD Global Mining Sales at CIBC, Manager of US Equity Sales at CIBC, and former Partner and Director of Loewen Ondaatje McCutcheon Ltd. Mr. Eaton is the current Executive Chairman and former CEO of Belo Sun Mining and has served as director or executive of several mining companies.

Saurabh Handa

Chartered Professional Accountant with diverse senior experience in finance, mergers and acquisitions and multi-jurisdictional public company disclosures. Currently Principal of Handa Financial Consulting Inc. Former CFO of Titan Mining Corp., VP, Finance of Imperial Metals Corp., CFO of Meryllion Resources Corp., CFO of Yellowhead Mining Inc., Controller for SouthGobi Resources Ltd. and Senior Staff Accountant at Deloitte and Touche LLP.

Nan Lee

Professional Engineer with over 30 years of experience as a mining and geo-environmental engineer, project manager, senior executive, and advisor in the mining industry. Ms. Lee's experience in the uranium sector includes 15 years as an independent consultant leading environmental assessments and managing preliminary feasibility studies for tailings management facilities and a greenfield mine development proposals. More recently, Ms. Lee was with UEX Corporation as VP of Project Development, providing strategic direction for development of projects and project evaluations for potential acquisitions, in addition to managing economic studies.

2030 GHG Emissions Reduction Target

40%

**lower carbon intensity compared
to global average**

**K92 has set a target to reduce
Scope 1 and Scope 2 emissions
by 25% on a business-as-usual
basis by 2030**

**Kainantu has below industry average emissions and we are
committed to further improving our energy and GHG emissions profile further**

Kora Deposit Overview & Mining Conditions Summary

Deposit:	Intermediate Sulphidation Multiple sub-vertical Au-Cu-Ag sulphide veins Focus is on the K1 and K2 veins, with the system also hosting other veins and link structures
AuEq Reserve Grade:	✓ 8.6g/t – 6.6g/t Au, 19g/t Ag, 1.1% Cu (3.5g/t cut-off) with multiple higher-grade zones (+20g/t)
Thickness:	✓ ~3-5m average range
Orientation:	✓ Sub-Vertical
Continuity:	✓ Highly Continuous
Size Potential:	✓ +1.5km strike (open) by +1km vertical (open)
Access:	✓ Incline ramp access (deposit at higher elevation than portal), providing significant operational efficiencies (dewatering and materials transport) through leveraging gravity
Geotech:	✓ Competent – Amenable to long hole on both K1 and K2 Veins

**Kora has the ‘right ingredients’
for an efficient and productive underground mine**

Judd Deposit Overview & Mining Conditions Summary

Deposit:	Intermediate Sulphidation Multiple sub-vertical Au-Cu-Ag sulphide veins, located ~150-200m east of Kora Focus is on the J1 vein, with the system also hosting at least three other veins
AuEq Reserve Grade:	✓ 8.1g/t – 7.1g/t Au, 14g/t Ag, 0.5% Cu (3.5g/t cut-off) with higher grade zones (+15g/t)
Thickness:	✓ ~3-5m average range
Orientation:	✓ Sub-Vertical
Continuity:	✓ Highly Continuous
Size Potential:	✓ Open in all directions – high grade underground was discovered recently in Q4 2020 and limited exploration completed to date
Access:	✓ Leverages Kora's infrastructure resulting in limited waste development required to access the deposit. Like Kora, deposit is above main infrastructure, providing significant operational efficiencies (dewatering and materials transport) through leveraging gravity
Geotech:	✓ Competent – Amenable to highly efficient long hole on J1

Solid Performance to Date from Production Stoping at Judd

Kora and Judd Independent Reserve Estimate

Kora and Judd Deposit Reserve Summary (January/2024)

	Tonnes	Gold		Silver		Copper		Gold Equivalent

Consolidated									
Total Proven	3.19	7.5	0.77	19	2.0	1.0	33	9.4	0.96
Total Probable	2.99	5.8	0.56	18	1.8	1.0	28	7.6	0.73
Total Proven & Probable	6.18	6.7	1.32	19	3.7	1.0	61	8.5	1.69

- The long-term metal prices used for calculating the financial analysis are USD \$1,900/oz gold, USD \$4.50/lb Copper, USD \$25/oz Silver.
- Gold Equivalents are calculated as $AuEq = Au\ g/t + Cu\ % * 1.62404 + Ag\ g/t * 0.01316$, based on commodity pricing. Metal payabilities and recoveries are not incorporated into this formula.
- A minimum mining width of 3.0 m has been applied for stoping, inclusive of a 1.0 m dilution skin at contained Mineral Resource grade.
- In addition to the 1.0 m dilution skin, dilution of 5% has been added for Avoca mined stopes and 2.5% for long hole stoping with pastefill. Where a stope is within 5.0 m proximity of the HW or FW of the fault gouge, an additional 1.0m of dilution was added at a grade averaging 1.42 g/t AuEq. This results in a total average dilution of 27.8%.
- Mining recoveries of 90% have been applied to Avoca mined stopes, and 95% for long hole stoping with pastefill.
- A cut-off grade of 3.5 g/t AuEq was used to define stoping blocks. Stope shapes with uneconomic development were excluded. The cut-off grade takes into account site operating costs, G&A costs, sustaining capital costs and relevant processing and revenue inputs.
- Measured Mineral Resources were used to report Proven Mineral Reserves.
- Indicated Mineral Resources were used to report Probable Mineral Reserves. No Measured Mineral Resources were used to report Probable Mineral Reserves.
- Tonnage and grade estimates include dilution and recovery allowance.
- The Mineral Reserves reported are not added to Mineral Resources.

Kainantu Consolidated NI 43-101 Resources

Kora and Judd Deposit Resource Summary (September/2023)

Efficient and Systematic Exploration – Kora and Judd

M&I – Kora and Judd (moz AuEq)

Inferred – Kora and Judd (moz AuEq)

Total – Kora and Judd (moz AuEq)

**K92 Has Successfully Executed on A Systematic Exploration Program
Significantly Growing the Resource Base and Ramping Exploration
While Keeping Discovery Costs Low at <US\$7.5/oz AuEq**

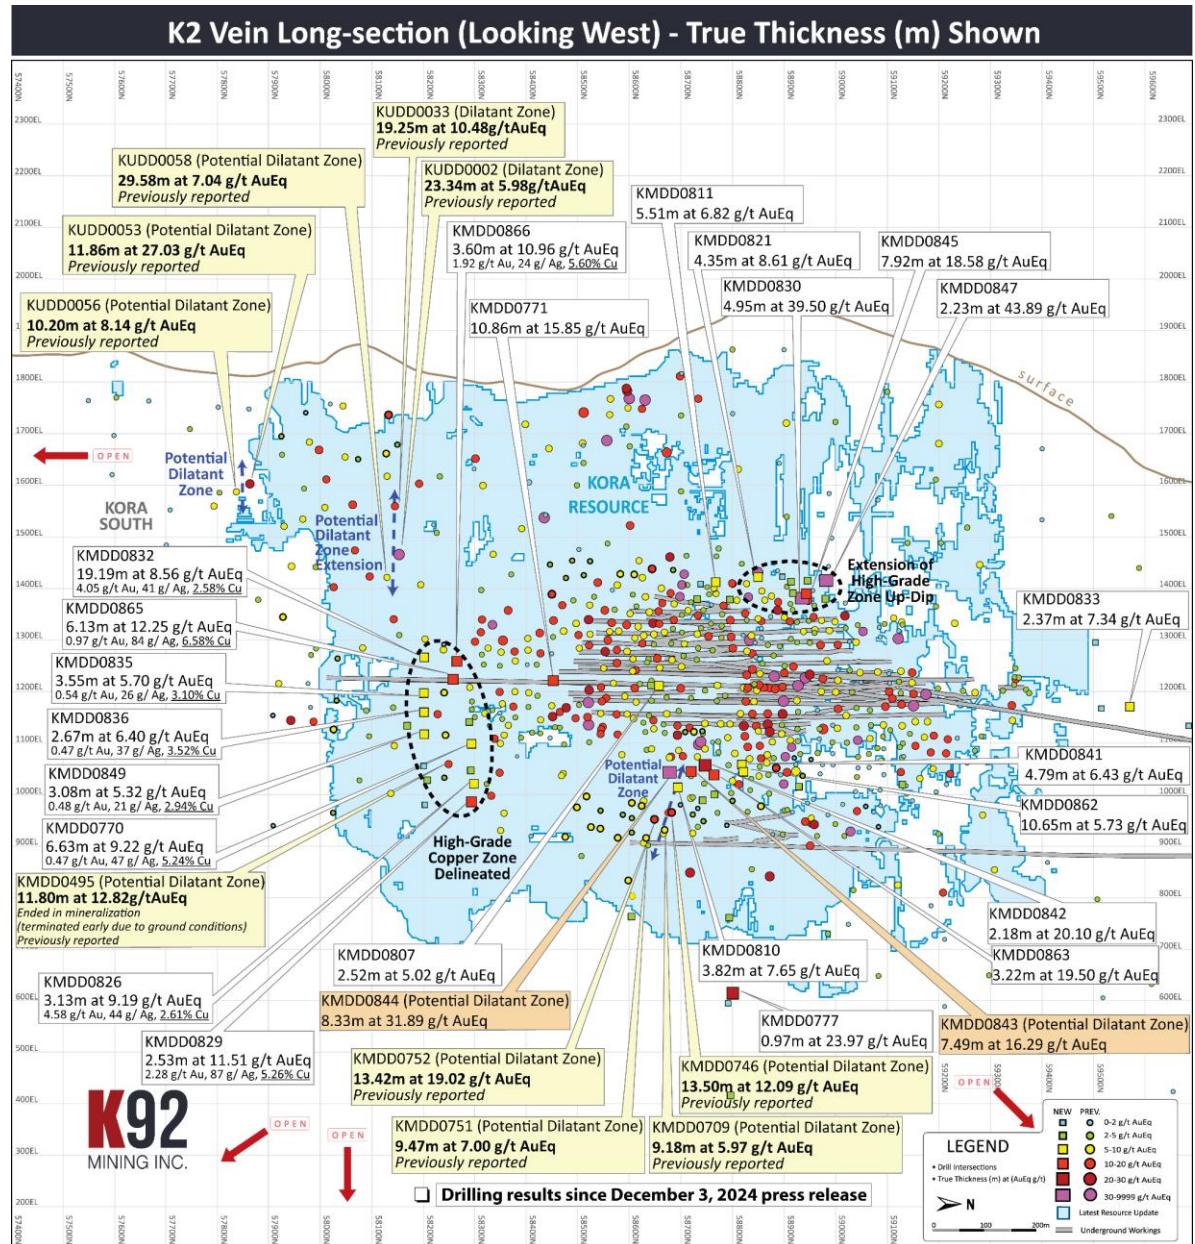

Note (1): Production depletion allocated entirely to M&I category for illustrative purposes.

Kora and Judd resource estimates - refer to technical report dated March 21, 2025, with an effective date of January 1, 2024 and titled, "Independent Technical Report, Kainantu Gold Mine, Updated Definitive Feasibility Study, Kainantu Project, Papua New Guinea"

Latest Drilling Results Kora-Kora South – K2 Vein (June 5, 2025)

Key Facts

- All holes intersected mineralization
- Dilatant zone significantly expanded up-dip, located ~100m from existing underground infrastructure — supporting near-term bulk mining potential:
 - **KMDD0844 – 12.80 m at 31.89 g/t AuEq (8.33 m true thickness)**
 - **KMDD0843 – 10.10 m at 16.29 g/t AuEq (7.49 m true thickness)**
- Infill and step out drilling within Kora-Kora South extended high-grade zones in multiple directions, including up-dip from main underground mining area:
 - **KMDD0830 – 7.17 m at 39.50 g/t AuEq (4.95 m true thickness)**
 - **KMDD0845 – 12.30 m at 18.58 g/t AuEq (7.92 m true thickness)**
 - **KMDD0847 – 4.00 m at 43.89 g/t AuEq (2.23 m true thickness)**
- High-grade copper zone delineated at K2 to the south, over a +300m vertical extent from latest drilling:
 - **KMDD0865 – 10.05 m at 12.25 g/t AuEq (6.13 m true thickness)
0.97 g/t Au, 84 g/t Ag, 6.58% Cu**
 - **KMDD0829 – 10.60 m at 11.51 g/t AuEq (2.53 m true thickness)
2.28 g/t Au, 44 g/t Ag, 5.26% Cu**
 - **KMDD0770 – 14.50 m at 9.22 g/t AuEq (6.63 m true thickness)
0.47 g/t Au, 47 g/t Ag, 5.24% Cu**

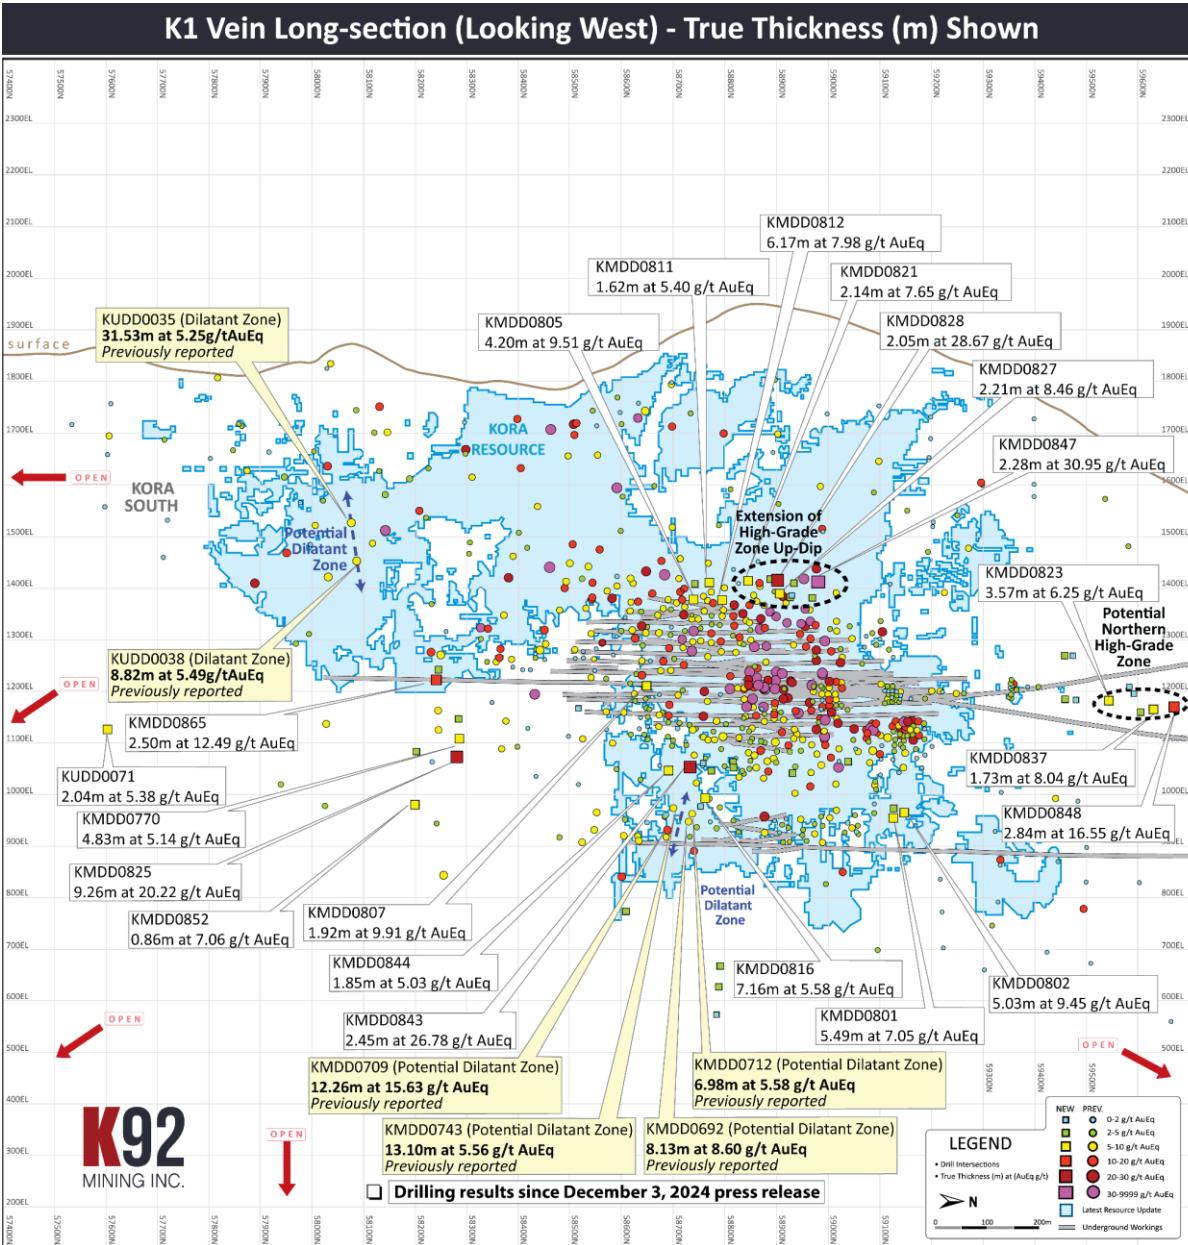

Exploration at Kora significantly ramping up from twin incline and 1205 Drill Drive

Latest Drilling Results Kora-Kora South – K1 Vein (June 5, 2025)

Key Facts

- All holes intersected mineralization
- High-grade zone extended up-dip from main underground mining area with higher grades than resource model in multiple zones, including:
 - **KMDD0847 – 4.08 m at 30.95 g/t AuEq (2.28 m true thickness)**
 - **KMDD0828 – 2.80 m at 28.67 g/t AuEq (2.05 m true thickness)**
- New potential high-grade zone identified to the north, outside the 2023 MRE:
 - **KMDD0848 – 3.90 m at 16.55 g/t AuEq (2.84 m true thickness)**
 - **KMDD0823 – 6.00 m at 6.25 g/t AuEq (3.57 m true thickness)**
- Multiple high-grade copper zone intersected to the south:
 - **KMDD0825 – 26.15 m at 20.22 g/t AuEq (9.26 m true thickness)
7.32 g/t Au, 165 g/t Ag, 7.01% Cu**
 - **KMDD0865 – 4.10 m at 12.49 g/t AuEq (2.50 m true thickness)
0.63 g/t Au, 69 g/t Ag, 7.06% Cu**
- Kora has shown increased grade tenor at depth making the extended strike defined in both the K1 and K2 veins highly prospective
 - Underground drilling of Kora South underway from the 1205RL Drill Drive
 - Kora Deeps drilling underway from twin incline
- Kora remains open along strike and at depth.

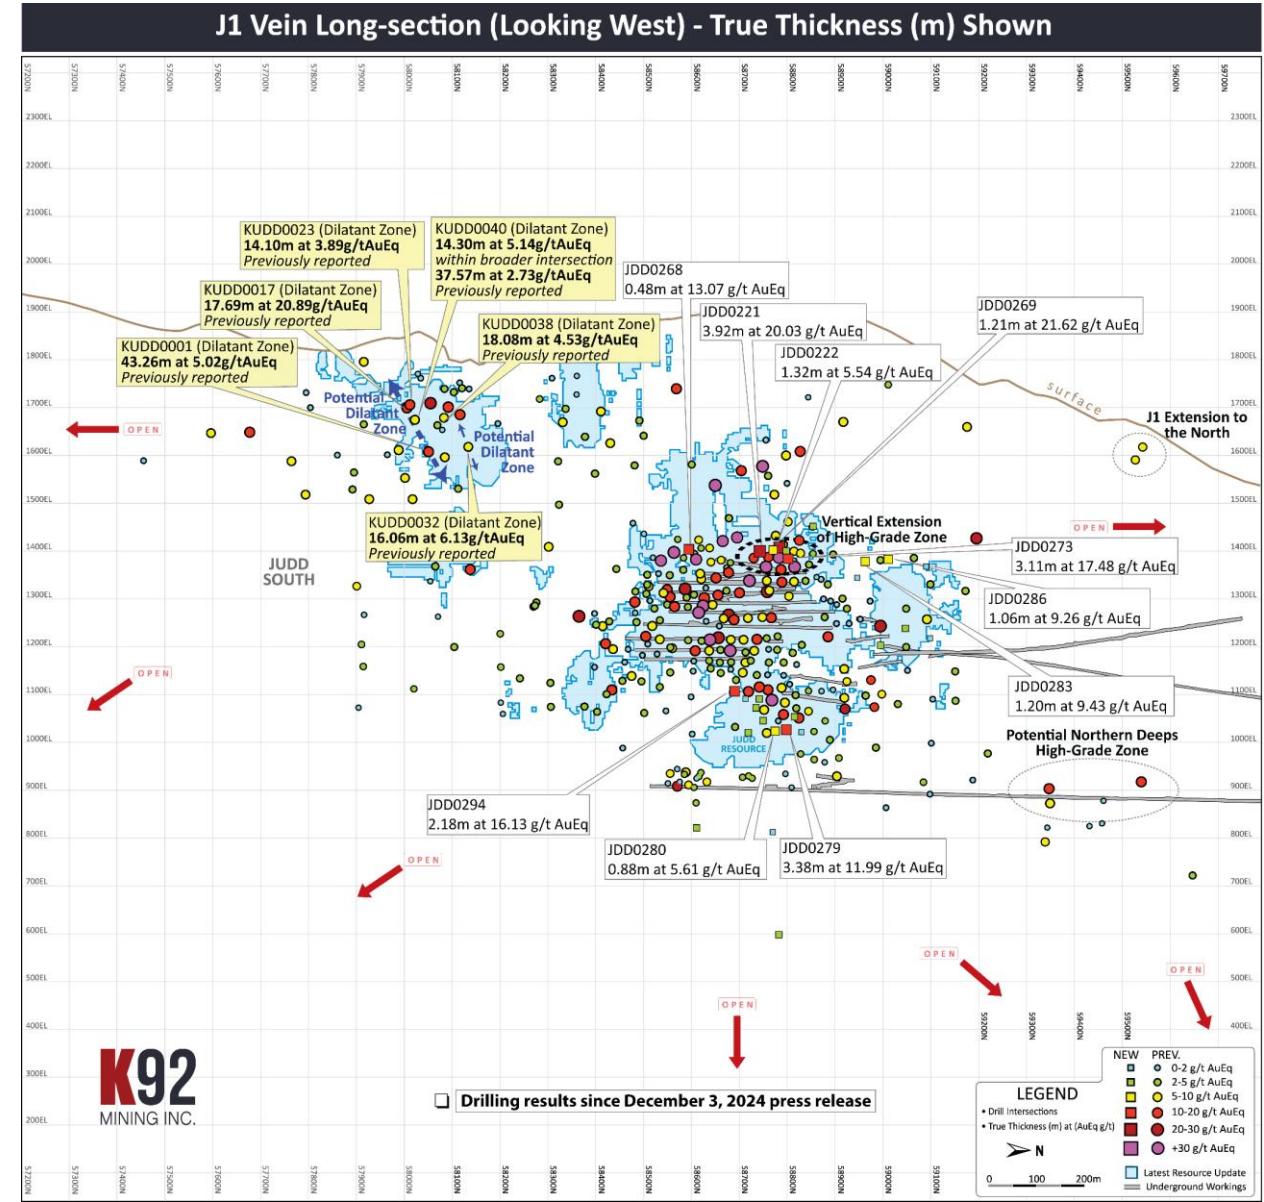

Latest Drilling Results Judd-Judd South – J1 Vein (June 5, 2025)

Key Facts

- All holes intersected mineralization
- Multiple high-grade intersections recorded continuing to extend high-grade mineralization up-dip and below the main mine:
 - **JDD0221 – 6.10 m at 20.03 g/t AuEq (3.92 m true thickness)**
 - **JDD0273 – 3.66 m at 17.48 g/t AuEq (3.11 m true thickness)**
 - **JDD0269 – 1.70 m at 21.62 g/t AuEq (1.21 m true thickness)**
 - **JDD0279 – 6.10 m at 11.99 g/t AuEq (3.38 m true thickness)**
 - **JDD0294 – 2.20 m at 16.13 g/t AuEq (2.18 m true thickness)**
- Drilling since maiden Judd Resource (Dec 31, 2021 effective date) has extended the known strike length of the Judd-Judd South Vein system by +130%.

Judd, Judd South & Northern Deeps is very underexplored and open in all directions

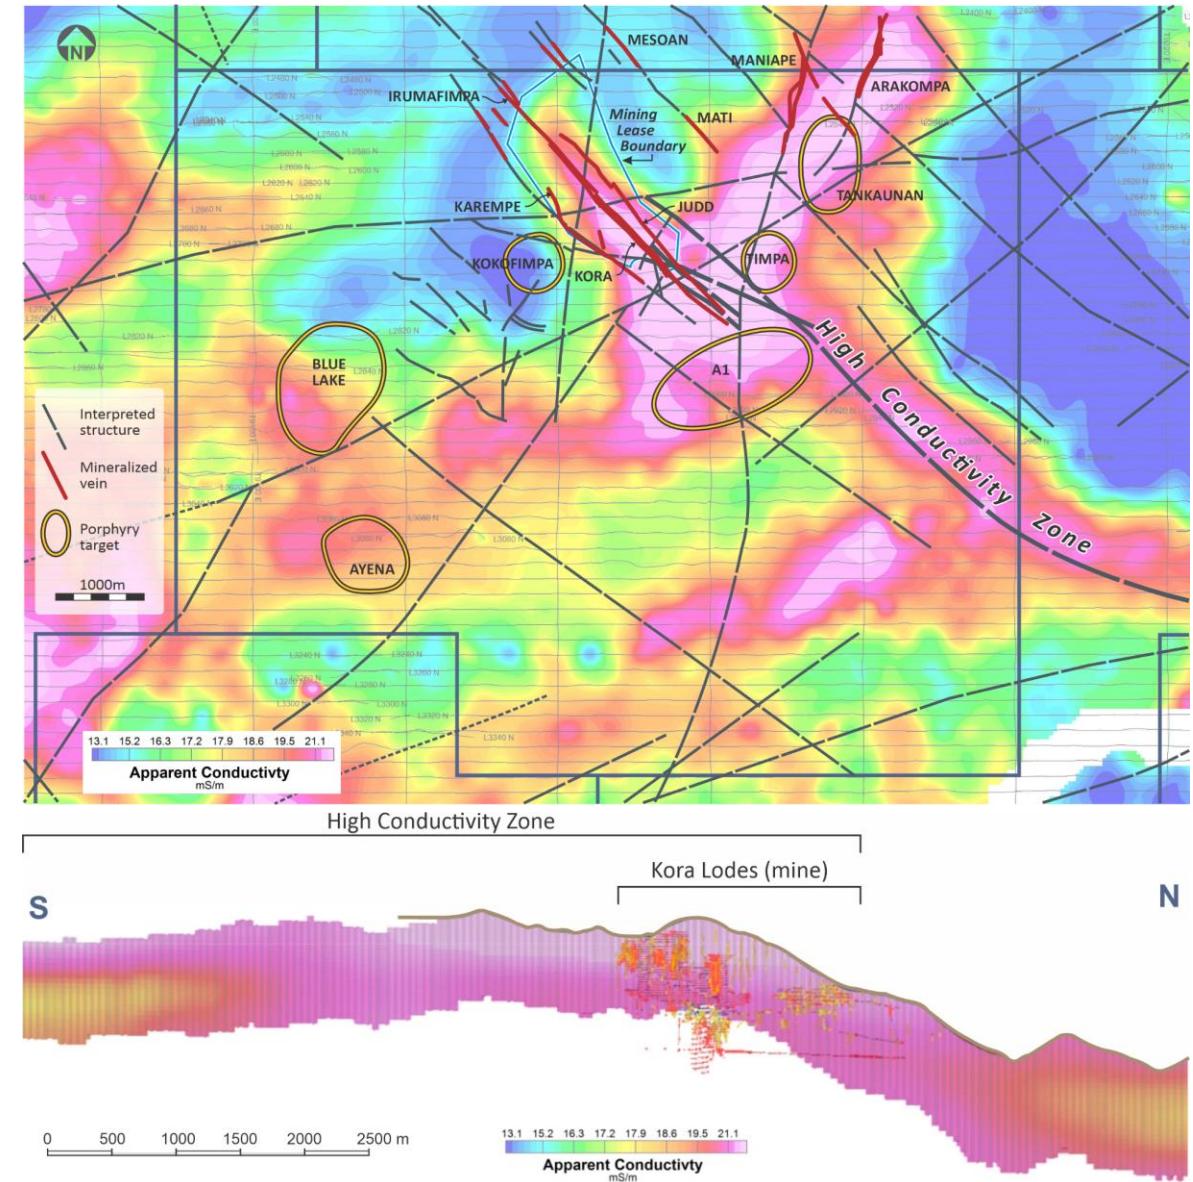

Airborne Geophysics Identifies Many New Targets

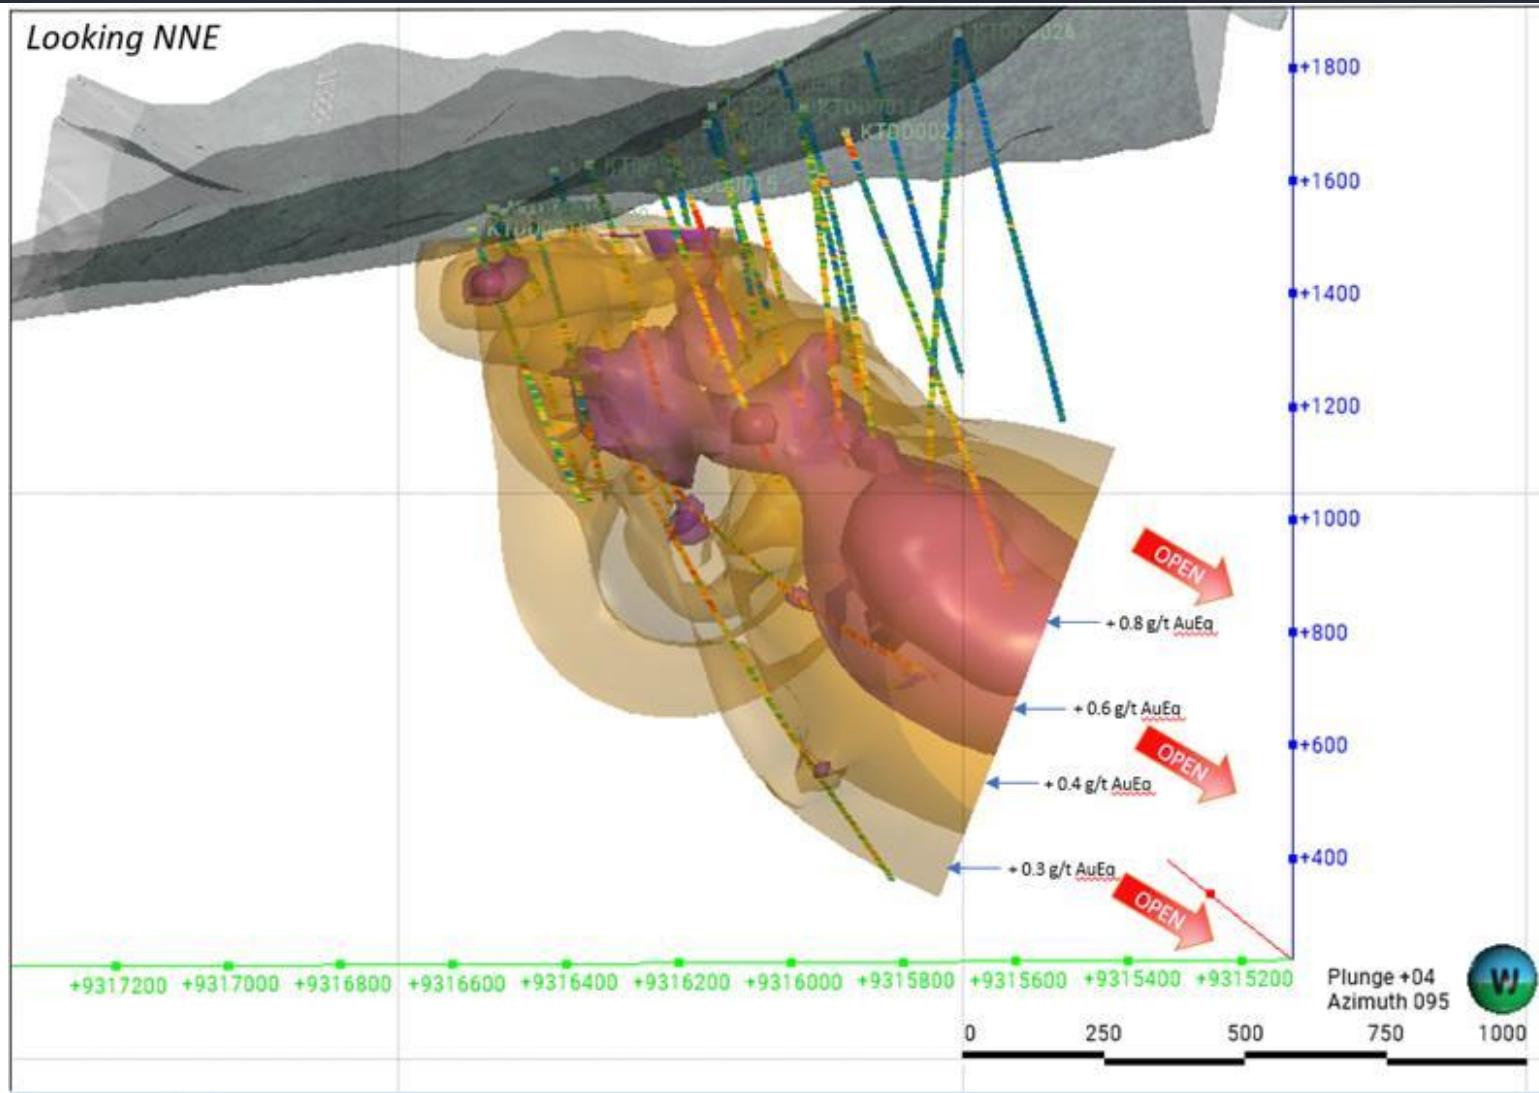

Key Facts

- Advanced MobileMT deep penetrating airborne geophysics flown over the entire ~830 km² land package
- First major geophysics program completed on property in +10 years
- Results demonstrate an extensive untested potential strike length to Kora-Kora South and Judd-Judd South vein systems beyond the A1 porphyry for several kilometres to the SE.**
 - This is demarcated via a High Conductivity Zone
- Results also correlated well with other known mineral deposits and conductive bodies
- Multiple new vein and porphyry targets on all licenses have also been identified.

Geophysics has outlined the potential to extend Kora-Kora South & Judd-Judd South for kilometres

Blue Lake Porphyry Project - Significant Potential to Grow Resource Size

10.8 moz AuEq / 2.9 blbs CuEq Maiden Inferred Resource Declared in August 2022
Grade Tenor Increasing with Depth & High Grade Potassic Core is Open at Depth

Blue Lake Porphyry Project – 14.6 moz Maiden Resource (August 2022)

Large 14.6 moz AuEq Inferred Resource

Nearly every hole hit – Discovery Cost of ~\$650/oz AuEq per m or <\$1/oz AuEq

In-pit resource and higher grade core open at depth

In Papua New Guinea, Porphyries Tend to Cluster – Multiple Targets Nearby

Blue Lake Resource Summary (August 2022)

Blue Lake Resource Summary (August 2022)									
	Tonnes	Gold		Silver		Copper		Gold Equivalent	
	mt	g/t	moz	g/t	moz	%	mt	g/t	moz
Blue Lake									
Inferred	686	0.19	4.2	2.4	53.6	0.21	1.4	0.66	14.6

- Estimates are based on Technical Report titled, "Independent Technical Report, Mineral Resource Estimate Blue Lake Porphyry, Kainantu Project, Papua New Guinea".
- The Independent and Qualified Person responsible for the mineral resource estimate is Simon Tear, P.Geo. of H & S Consultants Pty. Ltd., Sydney, Australia, and the effective date of the Mineral Resource is 1st August, 2022.
- Mineral resources are not mineral reserves and do not have demonstrated economic viability.
- Resources were compiled at 0.1, 0.2, 0.3, 0.4, 0.5, 0.6 g/t AuEq cut-off grades.
- Density was based on 2,473 measured density data recordings (weighed core trays and measured core) which were composited and subsequently modelled unconstrained using Ordinary Kriging. Reported tonnage and grade figures are rounded from raw estimates to reflect the order of accuracy of the estimate.
- Minor variations may occur during the addition of rounded numbers.
- Estimations used metric units (metres, tonnes and g/t)
- Gold equivalents are calculated as $AuEq = Au\ g/t + Cu\% * 2.0629 + Ag\ g/t * 0.0125$. Gold price US\$1,600/oz; Silver US\$20/oz; Copper US\$3.75/lb. Metal recoveries are incorporated in the formula and are Au 67%, Ag 67% and copper 86% respectively.
