The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. NATURE OF BUSINESS

K92 Mining Inc. (the "**Company**") was incorporated pursuant to the provisions of the Business Corporations Act (British Columbia) on March 22, 2010. The Company's shares are listed on the Toronto Stock Exchange (TSX) under the symbol "KNT" and quoted on the OTCQX under the symbol "KNTNF". The Company is currently engaged in the production of gold, copper and silver at the Kainantu Gold Mine as well as exploration and development of mineral deposits in the immediate vicinity of the mine, including Blue Lake, in Papua New Guinea.

The Company's head office, principal, registered and records office is 488 – 1090 West Georgia Street, Vancouver, British Columbia, V6E 3V7.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed consolidated interim financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These condensed consolidated interim financial statements are compliant with IAS 34 and do not include all of the information required for full annual financial statements.

Basis of Presentation

These condensed consolidated interim financial statements are presented in United States dollars. Financial information for the Company and each of its subsidiaries is measured using its functional currency, being the currency of the primary economic environment in which the entity operates.

The condensed consolidated interim financial statements were approved and authorized for issue by the Audit Committee on August 10, 2025.

3. MATERIAL ACCOUNTING POLICIES, ESTIMATES, JUDGEMENTS AND ASSUMPTIONS

The material accounting policy judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty are substantially the same as those that management applied in the consolidated financial statements for the year ended December 31, 2024. These condensed consolidated interim financial statements should be read in conjunction with the Company's most recent annual consolidated financial statements for the year ended December 31, 2024.

The Company's accounting policies are the same as those applied in the Company's annual consolidated financial statements for the year-ended December 31, 2024.

(Presented in thousands of United States Dollars, except share and per share amounts, unless otherwise noted)

6. PROPERTY, PLANT AND EQUIPMENT (cont'd…)

Mining Lease 150 ("ML 150")

The Company holds the mining rights to ML 150 and on December 6, 2022, the Government of Papua New Guinea granted an extension of ML 150 for a period of 10 years to June 13, 2034.

Capitalization of interest

During the six months ended June 30, 2025, the Company capitalized a total of $5.9 million in interest (2024 – $1.5 million), which included $2.6 million in interest on loan liabilities and $3.3 million in interest on early settlement of concentrate sales with the Company's offtaker.

7. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

As at	June 30, 2025	December 31, 2024
Trade payables	$ 6,355	$ 9,002
Other accounts payable and trade-related accruals	16,927	14,579
Employee accruals	9,402	9,545
Landowners' compensation accrual	19,334	17,517
Total	$ 52,018	$ 50,643

Landowners' compensation

The Company has obligations to compensate landowners annually who are affected by the operations of the Kainantu Gold Mine. The actual recipients of the compensation and landowners' share of sales royalty cannot be paid as required until the legitimate landowners have been identified by the Papua New Guinean Land Titles Commission ("**LTC**"). Therefore, compensation payments to landowners not yet confirmed by the LTC have been accrued but not paid.

8. LOAN

Loan Agreement with Trafigura: On June 19, 2024, the Company and its subsidiary, K92 Mining Limited, entered into two separate credit facilities with Trafigura Pte Ltd ("**Trafigura**"), under which each K92 entity may borrow up to US$100.0 million each, subject to a combined borrowing cap of US$120.0 million (the "**Loan**"). From the date of the agreement up to December 31, 2024, the aggregate commitment was limited to US$100.0 million. From January 1, 2025 onwards, if the credit facility associated with the Company's subsidiary is repaid (in whole or in part), the Company's borrowing capacity increases by the amount repaid, up to a maximum of US$120.0 million. The Loan also includes an accordion feature (the "**Accordion Feature**"), exercisable by mutual agreement between the Company and Trafigura, allowing the total commitment to be increased to up to US$150.0 million. Proceeds from the Loan may be used for general corporate purposes, working capital, and capital expenditures.

(Presented in thousands of United States Dollars, except share and per share amounts, unless otherwise noted)

8. LOAN (cont'd…)

The Loan matures on June 19, 2028, and bears interest at the applicable reference rate based on the Secured Overnight Financing Rate plus a margin of 3.4%. Principal payments are due quarterly in equal instalments on March 31, June 30, September 30 and December 31 of each year beginning September 30, 2025. Interest is treated on an accrual basis, with interest payable at the end of each three-month period commencing after the withdrawal date. The Loan has been recorded as a financial liability at amortized cost and is measured net of transaction costs. Transaction costs associated with the Loan were $1.3 million and are amortized over the life of the Loan.

All conditions precedent for the advance of $100.0 million under the K92 Mining Inc. credit facility ("**Canadian Credit Facility**") and up to $20.0 million of the $100.0 million under the K92 Mining Limited credit facility (the "**PNG Credit Facility**") were satisfied. The Canadian Credit Facility is secured by a pledge of the shares in the Company's subsidiaries and, in the event of a default, contains a conversion right into common shares of the Company.

During the six months ended June 30, 2025, the Company drew $20.0 million under the Canadian Credit Facility and fully repaid the $20.0 million outstanding under the PNG Credit Facility. The PNG Credit Facility had been secured by $20.0 million in restricted cash, funded through an advance from the Canadian Credit Facility. Following the full repayment of the PNG Credit Facility, the Company no longer holds any restricted cash designated as security under that loan. As at June 30, 2025, the Company had $60.0 million drawn under the Canadian Credit Facility, $Nil drawn under the PNG Credit Facility, and $60 million remaining available under the Loan.

Loan, current portion	$ 19,721	$ 26,423
Loan, non-current portion	$ 39,447	$ 32,788

9. RECLAMATION AND CLOSURE COST OBLIGATIONS

When the Company exhausts or abandons a mining property or an exploration site, it is required to undertake certain reclamation and closure procedures as a result of constructive obligations and to comply with legislative requirements established by the Government of Papua New Guinea.

	June 30, 2025	December 31, 2024
Balance, beginning of year	$ 6,882	$ 8,884
Change in estimate	333	(2,593)
Accretion	252	591
Balance, end of period	$ 7,467	$ 6,882

(Presented in thousands of United States Dollars, except share and per share amounts, unless otherwise noted)

9. RECLAMATION AND CLOSURE COST OBLIGATIONS (cont'd…)

The provision has been measured as the present value of the estimated future rehabilitation costs using an estimated mine life of 12 years. The estimated cash-flows used to measure the provision were discounted to a present value using a Papua New Guinea discount rate of 11.9% (2024 – 12.1%) and an inflation rate of 4.6% (2024 – 4.6%). The underlying costs in the provision are calculated using the Papua New Guinea Kina as the reclamation costs will be incurred in Papua New Guinea. As such, the discount and inflation rate used in the calculation reflect the economic factors for Papua New Guinea.

On an annual basis, the Company reviews the estimate of future costs of required reclamation and closure work. The current total estimate for all properties anticipates undiscounted future cash outflows to meet constructive obligations for reclamation and closure work in the amount of $19.4 million (2024 - $19.6 million), with first expenditures anticipated in 2037.

10. LEASE LIABILITIES

The Company leases assets including mining equipment and buildings. The assets associated with the lease liabilities are included as Right-of-Use assets within property, plant and equipment (Note 6). During the six months ended June 30, 2025, the Company incurred $0.3 million (2024 - $0.2 million) related to interest and finance expenses on the lease liabilities.

The following table summarizes the Company's lease activity and the carrying amounts of the lease liabilities at the present value of the remaining lease payments that are recognized in the statement of financial position:

Lease Liabilities as at	June 30, 2025	December 31, 2024
Lease liabilities, beginning of period	$ 6,738	$ 4,760

The Company's authorized share capital consists of an unlimited number of common shares without par value.

Issued share capital

As at June 30, 2025, the Company had 241,060,850 common shares issued and outstanding.

Share issuances

Except on the exercise of stock options and the conversion of RSUs and PSUs, no other shares were issued during the six months ended June 30, 2025.

Equity compensation

The Company's share compensation plan (the "**Share Compensation Plan**") provides for the issuance of stock options, RSUs, and PSUs. The Share Compensation Plan was amended effective June 27, 2024 (the "**Amended Plan**").

The Amended Plan allows the Company to grant stock options, RSUs and PSUs to its executive officers, directors, employees, and consultants. The total number of shares issuable under the Amended Plan cannot exceed 6.0% of the issued and outstanding common shares, on a non-diluted basis. The maximum number of common shares issuable through stock options cannot exceed 2.3% of the number of issued and outstanding common shares at the time of grant. For RSUs and PSUs, the total number of common shares that may be issuable cannot exceed 3.7% of the number of outstanding common shares at the time of grant.

Stock options

Stock option transactions are summarized as follows:

	Number Outstanding	Weighted Average Exercise Price (CAD)
Outstanding, December 31, 2023	7,328,850	$ 5.48
Exercised	(2,685,850)	3.18

Stock options (cont'd…)

The following stock options were outstanding at June 30, 2025:

Range of exercise prices (in $CAD)	Number of outstanding options	Number of options exercisable	Weighted-average exercise price (in $CAD)	Weighted-average years to expiry
6.00 – 8.99	1,943,700	1,943,700	7.31	0.42
	1,943,700	1,943,700	7.31	0.42

The fair value of stock options is determined by the Black-Scholes Option Pricing Model with assumptions for risk-free interest rates, dividend yields, expected volatility, forfeiture rate, and expected life of the options. Under the Amended Plan, the exercise price of each option equals the market price of the Company's stock as calculated on the date of grant.

During the six months ended June 30, 2025, the Company granted Nil stock options (2024 – Nil).

The weighted average share price at the time of exercise for the six months ended June 30, 2025, was CAD$11.30 (2024 – CAD$7.58).

During the six months ended June 30, 2025, the Company recorded share-based payment expense of $Nil (2024 – $Nil) related to the vesting of options.

Restricted share units

RSUs vest in three installments; one-third vesting one year from the grant date, one-third vesting two years from the grant date and the remainder vesting three years from the grant date. At the discretion of the Company, RSUs can be settled in either cash or common shares, or a combination of both. RSUs are recorded at fair value based on the Company's share price on the date of grant, adjusted for an estimated forfeiture rate, and then charged to share-based compensation over the period during which the RSUs vest.

During the six months ended June 30, 2025, the Company granted 168,870 RSUs. The estimated grant date fair value of $1.2 million is being recognized over the vesting period.

(Presented in thousands of United States Dollars, except share and per share amounts, unless otherwise noted)

Outstanding, June 30, 2025	1,719,468	$ 9,353

During the six months ended June 30, 2025, the Company recorded a share-based payment expense of $1.5 million (2024 – $1.3 million) related to the vesting of RSUs.

In 2023, the Kainantu Employee Trust Ltd. (the "**Trust**") was established with the purpose of managing RSUs to be used to pay performance incentives for certain employees. The Trust allows for the receipt of RSUs, facilitates the sale of these shares once they have vested and converted into common shares, and manages the distribution of the resulting proceeds to employees. As of June 30, 2025, the Trust held 287,500 RSUs.

Performance share units

PSUs vest in three installments; one-third vesting one year from the grant date, one-third vesting two years from the grant date and the remainder vesting three years from the grant date, subject to certain performance criteria having been met. The vesting of the PSUs is based on the Company's share price performance in comparison to its peer group with the final number of vested PSUs ranging from 25% to 150% of the initial number of PSUs granted. At the discretion of the Company, PSUs can be settled in either cash or common shares, or a combination of both.

PSUs are recorded at fair value based on a Monte Carlo pricing model at the date of grant, adjusted for an estimated forfeiture rate, and then charged to share-based compensation over the period during which the PSUs vest. For the fair value calculation of granted PSUs during the period ended June 30, 2025, the Monte Carlo pricing model used historical share price volatility of 47% (2024 – 49%), historical share price volatility of the Company's peer group ranging from 32% to 37% (2024 – 32% to 39%) and a Canadian risk-free rate of 2.8% (2024 – 4.2%).

During the six months ended June 30, 2025, the Company granted 253,306 PSUs. The estimated grant date fair value of $1.4 million is being recognized over the vesting period.

(Presented in thousands of United States Dollars, except share and per share amounts, unless otherwise noted)

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial assets and liabilities are classified in the fair value hierarchy according to the lowest level of input that is significant to the fair value measurement. Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect placement within the fair value hierarchy levels. The hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The levels in the fair value hierarchy into which the Company's financial assets and liabilities that are measured and recognized at fair value were categorized as follows:

As at	June 30, 2025		December 31, 2024	
	Level 1	Level 2	Level 1	Level 2
Trade receivables (Note 4)	$ -	$ 38,879	$ -	$ 20,208
Derivative assets (Note 17)	-	1,392	-	801
Derivative liabilities (Note 17)	-	-	-	(1,374)
	$ -	$ 40,271	$ -	$ 19,635

The fair value of the Company's trade receivables, derivative assets and derivative liabilities were determined using observable market prices and market-derived inputs. There were no transfers between Level 1 and Level 2 during the period ended June 30, 2025.

As at June 30, 2025, and December 31, 2024, the carrying amounts of cash and cash equivalents, term deposits, other receivables, current loan liability, and accounts payable and accrued liabilities approximate their fair values due to the short-term nature of these instruments. The fair value of the Company's non-current loan liability also approximates its carrying amount, as it bears a floating interest rate and the Company's credit spread has remained relatively stable.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk arises from the possibility that a counterparty may fail to meet its contractual obligations, resulting in a financial loss to the Company. This risk primarily relates to cash and cash equivalents as well as trade receivables. The Company mitigates credit risk by maintaining its cash and cash equivalents with high-credit-quality financial institutions. Trade receivables are associated with the sale of concentrates and doré, which are exclusively sold to well-established, creditworthy counterparties with a strong payment history. For the period ended June 30, 2025, the Company sold 100% of its concentrate to a single offtaker and 100% of its doré to a single refiner. The Company continuously monitors the creditworthiness of its customers and financial institutions and does not consider there to be a significant credit risk at this time.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd…)

Financial risk factors (cont'd…)

Liquidity risk

The Company has in place a planning and budgeting process to manage its liquidity risk and ensure it has sufficient liquidity to meet liabilities when due. As at June 30, 2025, the Company had cash and cash equivalents of $182.9 million (2024 - $140.1 million), and operating cash-flow for the period ended June 30, 2025 of $108.9 million (2024 – $40.7 million) to settle current liabilities of $91.9 million (2024 - $92.3 million). The Company's accounts payable and accrued liabilities typically have contractual maturities of 30 days and are subject to normal trade terms or are due on demand.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

a) Interest rate risk

The Company's financial assets and liabilities that are exposed to interest rate risk consist of cash and cash equivalents, term deposits and loan liabilities. The Company's current policy is to invest excess cash in highly liquid short-term interest-bearing investments issued by its banking institutions. The following outlines the impact to pre-tax earnings (loss) of a 1% change in interest rates on cash and cash equivalent balances held as of June 30, 2025:

	Impact of interest rate change on pre-tax earnings (loss)	
	1% increase	1% decrease
Interest income	$ 1,381	$ (1,381)

The following outlines the impact of a 1% change in interest rates on capitalized interest amounts included in property, plant, and equipment related to loan liability balances held as of June 30, 2025:

	Impact of interest rate change on capitalized interest amounts	
	1% increase	1% decrease
Capitalized interest	$ 525	$ (525)

b) Foreign currency risk

The Company is subject to foreign currency risk on financial instruments denominated in currencies other than the United States Dollar. Through this, the Company is exposed to foreign currency risk on fluctuations related to cash and cash equivalents, receivables, prepayments, income tax prepayments, accounts payable, accrued liabilities, and reclamation and closure cost obligations, which may be denominated in Australian Dollars, Papua New Guinean Kina, or Canadian Dollars. The Company does not use derivative instruments to reduce its exposure to foreign currency risk nor has it entered into foreign exchange contracts to hedge against gains or losses from foreign exchange fluctuations. As these exchange rates fluctuate against the United States Dollar, the Company will experience foreign exchange gains and losses.

b) Foreign currency risk (cont'd…)

The following table outlines the impact to pre-tax earnings (loss) of a 10% change in foreign exchange rates on cash and cash equivalent balances held in currencies other than the United States Dollar as of June 30, 2025:

	Impact of foreign exchange rate change on pre-tax earnings (loss)	
Funds held in	10% increase	10% decrease
Canadian Dollars	$ 2,424	$ (2,424)
Australian Dollars	$ 542	$ (542)
Papua New Guinea Kina	$ 1,850	$ (1,850)

c) Price risk

The Company is exposed to commodity price risk from fluctuations in market prices of the commodities that the Company produces. Gold concentrate is "provisionally priced" whereby the selling price is subject to final adjustment at the end of a period normally ranging from 30 to 90 days after delivery to the customer. Revenue is recognized on provisionally priced sales based on estimates of fair value of the consideration receivable which is based upon then current market prices. At each reporting date, the trade receivable is marked to market based on the estimated settlement price. As at June 30, 2025, the fair value of trade receivables was calculated using an estimated forward gold price of $3,298 per ounce (2024 - $2,649 per ounce) and using an estimated forward copper price of $4.89 per pound (2024- $4.08 per pound).

The following table outlines the trade receivables impact of a 10% change in gold and copper commodity prices to pre-tax earnings (loss) as of June 30, 2025:

	Impact of price change on pre-tax earnings (loss)	
	10% increase	10% decrease
Trade receivables – gold	$ 12,546	$ (12,546)
Trade receivables – copper	$ 702	$ (702)

Concentration of Credit Risk

The Company's cash and cash equivalents are held with financial institutions in Canada, Papua New Guinea, and Australia. As of June 30, 2025, a single Canadian chartered bank holds approximately 51% of the total cash and cash equivalents. Substantially all of the Company's cash and cash equivalents exceed government insured limits. The Company continually assesses and manages its exposure to the credit risk of financial institutions.

Concentration of sales

The Company sells exclusively to well-established, creditworthy counterparties with a strong payment history. For the period ended June 30, 2025, the Company sold 100% of its concentrate to a single offtaker and 100% of its doré to a single refiner.

13. SEGMENTED INFORMATION

Operating segments are components of an entity that engage in business activities from which they incur expenses and whose operating results are regularly reviewed by a chief operating decision maker to make resource allocation decisions and to assess performance. The Chief Executive Officer is responsible for allocating resources and reviewing operating results of each operating segment on a periodic basis.

The Company's only operating segment is the operating and development of gold mining activities at the Kainantu Project in Papua New Guinea. Corporate & Other includes the Company's head office function in Canada.
